the United States of America, the Continent of Europe and Abroad, of
T. FISHER UNWIN, LONDON, W.C.

PRINTED BY ALEXANDER THOM & CO., LIMITED, ABBEY STREET, DUBLIN.

Price One Shilling.

Marriages:—OCTOBER, NOVEMBER, DECEMBER, 1912. **Births and Deaths:**—JANUARY, FEBRUARY, MARCH, 1913.

During the quarter ended 31st March last, there were registered in the 829 Registrars' Districts in Ireland 25,594 births—a number equal to an annual birth-rate of 23·4 in every 1,000 of the estimated population*—and 21,849 deaths, representing an annual rate of 19·9 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 3,721 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 23·4 in every 1,000 of the estimated population, and the death-rate 15·9 per 1,000.

The birth-rate in Ireland for the quarter is 0·3 below the average rate for the corresponding quarter of the ten years, 1903–1912, and also 0·8 below the rate for the first quarter of 1912. The deaths are 84 above those registered in the corresponding quarter of 1912; the death-rate is 0·4 above the rate for that quarter, but 0·3 under the average for the first quarter of the ten years, 1903–1912.

In comparison with those for the corresponding quarter of 1912, the returns of pauperism furnished by the Local Government Board show a decrease of 865 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 1,040 in the average number of persons on out-door relief.

Compared with the averages for the first quarter of the ten years, 1903–1912, the number of Workhouse inmates shows a decrease of 5,787, and the number of persons on out-door relief shows a decrease of 15,122, the total under both heads being 20·8 per cent. under the average for the first quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 0·3 per cent.

* See page 64.

The annual marriage-rate (4·9 per 1,000 of the population) represented by the marriages registered during the fourth quarter of 1912, is 0·1 above the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each PROVINCE and COUNTY in Ireland, the Annual Rate per 1,000 of the population,* represented by the number of MARRIAGES registered during the Quarter ended 31st December, 1912, and by the BIRTHS and DEATHS registered in the Quarter ended 31st March, 1913.

* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry Co. and Co. Borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1911. See note (*) page 64.

MARRIAGES.

The Marriages (5,369) registered in Ireland during the fourth quarter of 1912 are equivalent to an annual rate of 4·9 per 1,000 of the estimated population, being 0·2 below the rate for the corresponding quarter of 1912, but 0·1 above the average rate for the fourth quarter of the ten years 1902–1911. Of the total number of marriages, 3,613 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,756 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4·5 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·1 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·3 above, and that under the latter heading 0·3 below the average rate for the corresponding quarter of the previous ten years.

Of the 23,329 marriages registered last year, 6,654 were registered in the first quarter, 5,624 in the second, 5,682 in the third, and 5,369 in the fourth.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the eleven years 1902–1912, and the average number for the ten years 1902–1911.

BIRTHS.

The number of births registered during the quarter ended 31st March last was 25,594—13,009 boys and 12,585 girls—being equal to an annual ratio of 1 in every 42.8, or 23.4 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years, 1903–12, was 26,065, equivalent to an annual rate of 23.7 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 23.8 per 1,000 of the population according to the Census of 1911; Munster, 22.3; Ulster, 23.7; and Connaught, 23.2.

The highest county or county borough birth-rate* is 32.2 for Dublin county borough, and the lowest 17.7 for Dublin County. Of the intermediate rates the highest five are—Belfast county borough, 28.1; Limerick county and county borough, 25.2; Mayo, 24.6; Donegal, 24.0; and Galway, 23.7. The lowest five are—Tipperary, South Riding, 19.6; Tipperary, North Riding, 19.7; Tyrone, 20.4; Wicklow, 20.5; and Fermanagh, 20.6.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st March last was 21,849—10,986 males and 10,863 females—affording an annual ratio of 1 in every 50.1, or 19.9 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1903–12, was 20.2 per 1,000.

The death-rate in Leinster was 21.0 per 1,000 of the population according to the Census of 1911; in Munster, 18.7; in Ulster, 21.5; and in Connaught, 15.8.

The county or county borough death-rates* range from 14.2 in Mayo to 25.8 in Armagh county. Between these rates the lowest five are—Leitrim, 14.7; Clare, 15.5; Roscommon, 16.5; Kerry, 16.7; and Galway, 16.8; and the highest five are—Dublin county borough, 24.8; Belfast county borough, 22.4; Carlow, 22.3; Kilkenny, 21.9, and Tyrone 21.6.

See note () on page 2.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years 1903–1912, and the average number for that period; also the number registered during the first quarter of the year 1913:—

AGES.—Of the 21,849 deaths registered last quarter, 2,774, or 12·7 per cent., were of infants under one year of age; and 9,553, or 43·7 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 108·4 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under one year old equalled 14·2 per cent. of the total deaths registered therein; in Munster, 12·3 per cent.; in Ulster, 12·7 per cent.; and in Connaught, 9·6 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 38·1 per cent.; in Munster, to 46·1 per cent.; in Ulster, to 43·6 per cent.; and in Connaught, to 53·8 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

DISEASES.—The total number of deaths from the principal epidemic diseases* is 1,015, and is equivalent to an annual rate of 0·93 per 1,000 living.

The following tabular statement shows the mortality from some of the principal epidemic diseases, as registered during the March quarter of 1913, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years, 1908–1912.

Name of Disease.	Number of Deaths in March quarter, 1913.	Average number of Deaths in March quarter of the 5 years, 1908–1912.
Enteric Fever,	80	73
Typhus,	21	15
Small-pox,	—	—
Measles,	329	153
Scarlet Fever,	66	43
Whooping-cough,	173	319
Diphtheria,	96	101

* See note (†) on page 9.

ENTERIC FEVER.—Deaths from enteric fever numbered 80, as compared with an average of 73, and 56, 40, and 53 deaths registered in each of the 3 preceding quarters. The 80 deaths are equivalent to an annual rate of 0·07 per 1,000 of the population of Ireland estimated to the middle of the year 1913. Of the deaths, 11 were registered in Dublin county borough; in Sligo union 6 deaths were registered; in Omagh, 5; and in each of Cork, Limerick, Newry unions 4 deaths were registered.

TYPHUS.—There were 21 deaths registered from typhus for the whole of Ireland during the quarter, the average for the corresponding period in the past 5 years being 15, and the numbers in the 3 preceding quarters being 10, 4, and 6, respectively. Of the 21 deaths, 6 were in Stranorlar union; 4 in Middleton; 3 in each of Newcastle and Dublin, North; 2 in Oughterard; in each of the following unions one death from typhus was registered:—Clones, Galway, and Loughrea.

SMALL-POX.—During the quarter under notice there was no record of mortality from small-pox.

MEASLES.—The mortality from measles, amounting to 329 deaths, and representing an annual death-rate of 0·30 per 1,000, was in excess of the average (153) by 176 deaths. In the 3 quarterly periods preceding, deaths from measles were 182, 105, and 413, respectively. Of the total deaths, 138 were in Belfast county borough; in Newry union there were 43 deaths; in Tralee, 24; in Dingle, 15; in Enniscorthy, 10 deaths, and in Kilrush, 10 deaths.

SCARLET FEVER.—An increase of 23 deaths over the average, namely, from 43 to 66, appears to have taken place in the period under notice, the deaths (66) being equal to an annual rate of 0·06 per 1,000; in the three quarters before deaths from this disease were 74, 78 and 85.

WHOOPING-COUGH.—There was a decrease in the mortality from whooping-cough, the deaths numbering 173, equal to an annual rate of 0·16 per 1,000, and the average, 319. Deaths from whooping-cough occurred as follows in certain unions:—in South Dublin, 28; in North Dublin, 15; in Waterford, 19; in Coleraine, 9; and in each of Belfast and Rathdrum, 8 deaths.

DIPHTHERIA.—The total number of deaths registered from diphtheria in the whole of Ireland was 96, corresponding to an annual death-rate of 0·09 per 1,000; the number is 5 below the average, but above the numbers 81, 70, and 82 registered in the 3 preceding quarters. Among the deaths from diphtheria there were 6 in Belfast union; 10 in North Dublin union; 13 in South Dublin union; 21 in Lisburn union; and 8 in Naas union.

DIARRHŒAL DISEASES.—The mortality of children under 2 years of age from diarrhœa and enteritis numbered 205 and represents an annual death-rate of 0·23 per 1,000 for the whole of Ireland. There were 40 deaths of persons aged 2 years and upwards registered from diarrhœa.

TUBERCULOUS DISEASE.—As returned by the Registrars the aggregate number of deaths in Ireland registered during the quarter was 2,476, the average being 2,697, and the number returned in the March quarter of 1912 being 2,520.

The following notes, which bear upon the status of tuberculosis and other matters affecting public health have been furnished by the Registrars:—

Dublin, South; Crumlin.—“I find the local branch of the Women's National Health Association a constant and unfailing source of help in every way. The Nurse who has been appointed to the district is unsparing in her efforts, which are keenly appreciated by the poor.”

Granard; Scrabby, No. 2.—“One death is recorded of a woman aged 60 years from tubercular enteritis. She belonged to a phthisical family. A second case of pulmonary tuberculosis has made its appearance in a labourer's family, where a death from this disease took place in February of last year. The dwelling is a thatched damp hovel.”

Tullamore; Kilbeggan.—“Tuberculous disease appears to be on the wane, largely due to better housing and a more intelligent conception of the infectivity of the disease.”

Wexford; Bridgetown.—“There has been no death from any form of tubercular disease registered in this district for past eight months.”

Kanturk; Newmarket.—“One case of pulmonary tuberculosis. Patient came from America to die.”

Middleton; Aghada.—“Old age and tuberculous disease are the chief causes of death in this district.”

Kenmare; Tuosist.—“A few cases of pulmonary tuberculosis—returned American emigrants.”

Limerick; Caherconlish.—“Two deaths from tuberculosis. One of these had been in a sanatorium, which prolonged his life considerably.”

Rathkeale; Pallaskenry.—“Two deaths were caused by pulmonary tuberculosis. Those patients lived in insanitary houses. The prevention of this disease can be best accomplished by better housing of the people, their using more home-grown food and being more attentive to laws of hygiene. The removal of patients to sanatoria and after a few weeks allowing them home to the former surroundings is very futile and not inexpensive.”

Callan; Mullinahone.—“Three deaths registered from tuberculosis (one of them recently returned from America).”

Youghal; Ardmore.—“An increase in pulmonary tuberculosis. I have noticed the cases always associated with badly ventilated bedrooms. Two cases due to drink.”

Lisburn; Drumbeg.—“Five deaths from phthisis, a proportion of more than one-third registered.”

Tuam; Tuam, No. 2.—“One of the cases of pulmonary tuberculosis registered was a young woman who returned from America 5 years ago.”

Castlereaugh; Loughglinn.—“There is a diminution of deaths due to tuberculosis. There has been an unusual number of large windows put into the dwelling-houses in this district. The people are now recognising the importance of more light and air.”

CANCER.—There were 867 deaths classified under the head of cancer; the total corresponds to a rate of 0·79 per 1,000, compared with the rates 0·77, 0·76 and 0·79 for each of the preceding quarterly periods.

VIOLENCE.—The number of deaths from violence, including accident or negligence, homicide and suicide, was 238.

The Registrars, in their Notes, report the presence of the following diseases :— Measles in 58 districts, scarlet fever in 22, whooping-cough in 37, diphtheria in 18, enteric fever in 13, influenza in 96, typhus in 4, mumps in 5, chicken-pox in 2, cerebro-spinal fever or cerebro-spinal meningitis in 3, and German measles in one district. [See Appendix to this Report commencing on page 65.]

INQUESTS.—There were 487 inquests reported to the Registrars during the quarter ; this number being equal to 1 in every 45 of the total deaths registered.

In Leinster there was 1 inquest to every 43 deaths registered, in Munster 1 to 61, in Ulster 1 to 36, and in Connaught 1 to 76.

DEATHS IN PUBLIC INSTITUTIONS.—Of the 21,849 deaths registered, 4,443, or 20·3 per cent., occurred in public institutions. In Leinster the percentage was 28·4, in Munster 22·7, in Ulster 15·5, and in Connaught 12·5.

UNCERTIFIED DEATHS.—According to the returns, 5,396 of the 21,849 deaths which were registered during the quarter were uncertified, being nearly 25 per cent. of the total. In Leinster the percentage was 18, in Munster 29, in Ulster 20, and in Connaught the uncertified deaths were 50 per cent. of the total deaths registered in the province.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 31st March, 1913, and in each of the eight quarters immediately preceding ; with the ratio of these deaths to the deaths from all causes and to the population :—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.										
		Enteric Fever.	Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Diarrhoeal Diseases.	Total.	Percentage of Total Deaths.	Number in every 100,000 of the Population.

(a) Including the deaths of 3 persons from enteric fever, 10 from scarlet fever, 18 from diphtheria, 3 from tuberculous disease, and one from infective enteritis admitted from the City of Belfast to the hospital for infectious diseases at Purdy'sburn, in the Registrar's District of Ballylesson, and Union of Lisburn, and 3 deaths from cerebro-spinal fever or cerebro-spinal meningitis registered in Belfast.

† Enteric fever, typhus, small-pox, measles, scarlet fever, whooping-cough, diphtheria, dysentery, and diarrhoeal diseases.

The rates for the districts in the Dublin Registration Area and for Belfast and Londonderry have been calculated on the population estimated to the middle of 1913.

B

URBAN DISTRICTS—continued.

REGISTRATION, FIRST QUARTER, 1913.

[illegible]

† See note (†) on page 9.

VACCINATION.

According to the Returns of Primary Vaccinations received for the first quarter of the year 1913, there were 11,981 persons successfully vaccinated.

EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 31st March last was 3,721 (2,436 males and 1,285 females), being 54 more than in the corresponding quarter of the year 1912, but 440 below the average number for the first quarter of the ten years 1903-1912.

TABLE VI.—EMIGRATION from IRELAND during the months of January, February and March in 1912 and 1913:—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1912.	1913.	In-crease.	De-crease.	1912.	1913.	In-crease.	De-crease.	1912.	1913.	In-crease.	De-crease.
January,	400	405	5	—	253	202	—	51	653	607	—	46
February,	495	547	52	—	316	339	23	—	811	886	75	—
March,	1,369	1,484	115	—	834	744	—	90	2,203	2,228	25	—
TOTAL,	2,264	2,436	172	—	1,403	1,285	—	118	3,667	3,721*	54	—

* Including 2,071 emigrants to the United States of America, viz.:—311 in the month of January, 464 in February, and 1,296 in March. Of 1,806 steerage passengers, 406 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 6*d.*, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the first quarter of the year 1912 the average price was 6*d.*, and in the corresponding quarter of 1903 it was 5½*d.*

The average price of oatmeal (1st quality) in Dublin for the quarter was 16*s.* 0*d.* per cwt. For the corresponding quarter of the year 1912 the average price was 13*s.* 6*d.*, and for the first quarter of 1903 the average price was 15*s.* per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 4*s.* 0*d.* to 4*s.* 5*d.* In the first quarter of 1912 the average prices were 3*s.* 5*d.* to 3*s.* 11*d.*, and the prices for the corresponding quarter of 1903 were 2*s.* 3*d.* to 4*s.*

The average price per cwt. of beef at the Dublin Cattle Market was 49*s.* to 67*s.*

The price (including cartage) of Whitehaven coal in the City of Dublin during the quarter was 24*s.* per ton nett.

The highest price of Consols at the Dublin Stock Exchange for the quarter was 75½ and the lowest 73⅙.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during last quarter was 5 per cent.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the first quarter of 1913 was 39,578, or 865 below the average for the corresponding period in 1912.

The average weekly number of persons receiving out-door relief during the quarter was 39,871, being 1,040 below the average for the first quarter of 1912.

Of the persons receiving in-door relief during the first quarter of 1913, an average number of 1,659 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1912 the average weekly number was 1,654.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FIRST QUARTER of the year 1913, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES OF PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM.			
									NO. OF PERSONS RELIEVED.			
	BREAD (4lb. Loaf.)		OATMEAL (Corn Exchange), per Cwt. 1st quality.	POTATOES (at Potato Market) per Cwt.		BEEF (at the Dublin Cattle Market), per Cwt.			Out-door.			
	(a)	(b)						In-door.	Ordinary relief.	By means of works devised for the relief of distress.	Total Outdoor.

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4-lb. loaf delivered; the price in Messrs Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4-lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the "Dublin Gazette"; and the arrange prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of persons receiving In-door and Out door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the first

* Latitude 53° 21' 48.25" north; longitude 6° 20' 59.15" west. Height above the mean sea level 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

quarter of the years 1908 to 1913, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 14).

The mean height of the barometer during the first quarter of 1913 was 29·823 inches, being ·058 above the average for the corresponding quarter of the five years 1908–1912; the highest reading (30·644 inches) was on the 11th February, at 9 P.M., wind W.S.W., and the lowest (28·879 inches) on the 20th January, at 9 A.M., wind E.

The mean temperature of the air during the quarter was 41·4°, being ·2° above the average for the first quarter of the 5 years, 1908–1912.

The maximum temperature of the air during the quarter was 56·4° and the minimum 18·8°. The maximum heat in sun was 104·8°.

Rain or snow fell on 54 days during the quarter. The rain-fall measured 7·300 inches, being 1·773 inches above the average for the first quarter of the five years, 1908–1912. The greatest monthly rainfall was in January, when 4·105 inches were registered.

The wind blew on 21 days from W., on 16 days from S.W., on 14 days from S., on 12 days from E., on 5 days from S.E., on one day from N.W., and the air was calm on 21 days at 9 A.M.

January.—The mean height of the barometer during this month was 29·620 inches; the highest reading (30·305 inches) was on the 26th, at 9 A.M., air calm; and the lowest (28·879 inches) on the 20th, at 9 A.M., wind E. The mean temperature of the air was 41·2°, the maximum registered was 56·0°, and the minimum 18·8°. The 24th was the warmest day, and the 13th the coldest night. The mean of the dry bulb was 41·3°, and of the wet bulb, 39·8°. The maximum heat in the sun was 70·0°, and the minimum on the grass 13·4°. The total amount of sunshine recorded was 47·8 hours, the greatest daily amount being 5·3 hours on the 25th. The minimum on the grass was below 30° on 13 nights. The maximum ozone was 0·8, the minimum 0·0, and the mean 0·4. Rain or snow fell on 21 days. The rain-fall measured 4·105 inches; the greatest amount in 24 hours was 0·700 inch on the 10th.

February.—The mean height of the barometer during this month was 30·100 inches; the highest reading (30·644 inches) was on the 11th, at 9 P.M., wind W.S.W., and the lowest (29·423 inches) on the 7th, at 9 P.M., wind W. The mean temperature of the air was 41·3°, the maximum registered was 55·0°, and the minimum 27·6°. The 27th was the warmest day, and the 22nd the coldest night. The mean of the dry bulb was 41·3°, and of the wet bulb 39·6°. The maximum heat in sun was 87·1°, and the minimum on the grass 20·0°. The total amount of sunshine recorded was 45·1 hours, the greatest daily amount being 5·7 hours on the 19th. The minimum on the grass was below 30° on 16 nights. The maximum ozone was 0·8, the minimum 0·0, and the mean 0·4. Rain or snow fell on 12 days. The rain-fall measured 0·720 inch; the greatest amount in 24 hours was 0·135 inch on the 25th.

March.—The mean height of the barometer during this month was 29·750 inches, the highest reading (30·482 inches) was on the 8th at 9 P.M., wind W.S.W., and the lowest (28·992 inches) on the 19th, at 9 A.M., wind W.S.W. The mean temperature of the air was 41·6°; the maximum registered was 56·4°, and the minimum 21·0°. The 30th was the warmest day, and the 18th the coldest night. The mean of the dry bulb was 42·0°, and of the wet bulb 40·2°. The maximum heat in sun was 104·8°, and the minimum on the grass 15·6°. The total amount of sunshine recorded was 125·7 hours, the greatest daily amount being 9·8 hours on the 30th. The minimum on the grass was below 30° on 13 nights. The maximum ozone was 0·8, the minimum 0·0, and the mean 0·6. Rain or snow fell on 21 days. The rain-fall measured 2·475 inches; the greatest amount in 24 hours was 0·480 inch on the 2nd.

METEOROLOGY.

[*Prepared in the Meteorological Office under the direction of W. N. Shaw, Esq., LL.D., Sc.D., F.R.S.*]

During the opening quarter of this year the weather was generally rough and unsettled, with a deficiency in the amount of bright sunshine, and an excess of rain, especially over the southern half of the country. The winds were mainly from some Southerly quarter (South-East to South-West) and temperature was therefore above the average, the frosts experienced being, as a rule, slight, and of the briefest possible character.

January was mild, stormy and wet, the only frost of any consequence occurring on the 13th or 14th, when the sheltered thermometer fell at least 10° below the freezing point in many parts of the country. At Phoenix Park the minimum on the 13th was as low as 19° , while at Clongowes Wood College the thermometer on that and the following day sank to 14° . On the 7th, and again on the 23rd or 24th, the maxima were slightly above 55° at many places in the south and east. Gales were unusually frequent, the strongest occurring between the 2nd and 4th, the 9th and 12th, the 14th and 16th, and in the last four days of the month. At Roche's Point the wind on the 10th blew in gusts with a velocity of 70 miles, and on the 14th with a velocity of 75 miles per hour. The gales of the 9th-12th were accompanied at first by considerable quantities of rain, daily amounts varying between an inch and a-half and an inch and three-quarters being recorded in many parts of Ireland both on the 9th and 10th. The rain was followed by heavy snow, and in some northern districts the drifts were of considerable depth. The sunshine of the month was very deficient, and rainfall largely in excess of the average, more than double the normal quantity being recorded at Belfast, and at various stations in the neighbourhood of Dublin.

February opened with a continuation of rough changeable weather, but with a moderation in the amount of rainfall. On the 7th a severe gale from South, veering to West, was experienced over the whole country, the wind rising, in gusts, to a velocity of 79 miles an hour at Dwyran (Anglesea), 80 miles at Quilty, and 83 miles at Holyhead. The gale was accompanied by a high tide, the highest that had been known in the Shannon for 50 years, and as a result many houses were flooded, trout being found in some as the water subsided. For the remainder of the month the weather was fairly quiet, with much fog or mist, especially between the 10th and 15th. Temperature was, as a rule, above the average, the mildest weather occurring about the 7th or 11th, when the thermometer rose slightly above 55° in many places and touched 58° at Killarney and Foynes. Frost was rare, and was of slight intensity, the lowest screen temperatures recorded being 25° at Clongowes Wood on the 22nd, and 26° at Mountmellick on the 1st, and at Markree Castle, Birr Castle and Killarney on the 19th or 20th. Bright sunshine was again deficient, and rainfall was considerably below the average, several places in the northern and eastern parts of the country receiving less than half, and Dublin City and Glasnevin less than one-third of the normal quantity.

March was boisterous and unsettled, gales from the Southward or South-Westward being again frequent and occasionally blowing with considerable severity. After about the 22nd, however, the wind shifted to the South-Eastward or Eastward and the weather became much quieter than in the earlier part of the month. Temperature maintained a fairly uniform level, mostly a trifle above the average, but the frosts recorded about the 17th or 18th were sharper than at any time in February, the sheltered thermometer falling 5° or 6° below the freezing point in many places, and reaching 23° at Clongowes Wood and Kilkenny, and 25° at Belfast, Mountmellick, Dublin (Glasnevin) and Birr Castle. At Clongowes Wood a reading of

22° was recorded, locally, on the 13th. The highest temperatures were observed at some stations on the 4th, and at others on the 29th or 30th, the thermometer rising on each occasion to 55° and upwards in most districts. Bright sunshine was slightly above the average in most places, but was appreciably below it at Valencia. Rainfall was everywhere in excess of the normal, considerably so at some of the southern stations.

The *Mean Temperature* of the quarter was above the average, but the difference was slight, and the period was, upon the whole, not nearly as mild as in 1912. The highest readings occurred mostly about March 4th or 30th, when the thermometer rose appreciably above 55° in many places and touched 60° (on the 30th) at Lisburn. Almost equally high temperatures were observed, however, about February 7th, and in some few places between January 7th and 9th. The lowest readings occurred nearly everywhere on January 13th or 14th, but in very few places did the sheltered thermometer fall below 20°. At Clongowes Wood it sank to 14°.

The *Rainfall* of the quarter was in excess, especially over the southern half of the country, where the number of rain-days (67) was 12 more than the average, and the total fall 36 per cent. in excess. Heavy falls in 24 hours were unusually rare, the chief instances occurring on January 9th and 10th. On one or other of those days amounts varying between an inch and an inch and a-half were recorded in many places; at Kingstown on the 10th the measurement was 1·7 in.

The *Bright Sunshine* of the quarter was very deficient, the mean daily duration over the southern half of Ireland being only 2·2 hours—just half an hour below the normal. During the entire period there were only three weeks in which the total duration was in excess of the average, and in only one of them (that ended March 29th) was the excess at all large.

ABSTRACTS I., II., III., IV.

MARRIAGES Registered during the Quarter ending 31st December, 1912, in PROVINCES, COUNTIES,* and SUPERINTENDENT REGISTRARS' DISTRICTS (or POOR LAW UNIONS) of IRELAND; **BIRTHS AND DEATHS** Registered during the Quarter ending 31st March, 1913; Deaths from ENTERIC FEVER, TYPHUS, SMALL-POX, MEASLES, SCARLET FEVER, WHOOPING-COUGH, DIPHTHERIA, DYSENTERY, TUBERCULOUS DISEASE, CANCER, DIARRHŒA AND ENTERITIS OF CHILDREN under 2 years, DIARRHŒA OF PERSONS aged 2 years and upwards; also VIOLENT DEATHS,† INQUEST CASES, DEATHS IN PUBLIC INSTITUTIONS, and NUMBER of UNCERTIFIED DEATHS Registered during the Quarter ending 31st March, 1913, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS OF IRELAND; with a Return of **VACCINATIONS** for that Quarter.

ABSTRACT I.—PROVINCES AND COUNTIES.

PROVINCES and COUNTIES.	Area in Statute Acres.	Popula- tion in 1911.	Marriages.		Births.		Deaths.		The Deaths registered during the Quarter are stated by the Registrars to include													Number of successful Vaccinations in the Quarter ending 31st March, 1913.

* Throughout this Return the Unions and Districts have been grouped according to the Administrative Counties as formed under the Local Government (Ireland) Act, 1898.

† Including accidental deaths, homicides, and suicides.

‡ The Returns for Roundstone No. 1 District, in Clifden Union, and for Abbeystown, in Tuam Union, not having been received in time for press, the numbers of Births and Deaths registered in the corresponding Quarter of 1912 have been adopted.

WILLIAM J. THOMPSON,
Registrar-General.

GENERAL REGISTER OFFICE,
CHARLEMONT HOUSE,
DUBLIN, 16th May, 1913.

Estimated Population of Ireland.

POPULATION OF IRELAND (including Army, Navy, and Merchant Seamen on shore and in port) *estimated to the middle of each of the Seventy-five Years 1839 to 1913.*

Middle of the years.	Estimated POPULATION.			Middle of the years.	Estimated POPULATION.			Middle of the Years.	Estimated POPULATION.		
	Persons.	Males.	Females.		Persons.	Males.	Females.		Persons.	Males.	Females.
1839	8,111,438	3,988,132	4,123,306	1865	5,594,589	2,740,800	2,853,789	1891	4,680,376	2,306,122	2,374,254

1864	5,640,527	2,761,866	2,878,661	1890	4,717,959	2,322,883	2,395,076				

NOTE.—This table has been constructed for the years 1839 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1913.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—All forms of tubercular disease are very prevalent in this district, especially phthisis pulmonalis. Cancer is fairly common also.

CARLOW; *Bagenalstown*.—Measles and whooping-cough prevalent amongst children during the past quarter; otherwise the district is healthy.

CARLOW; *Borris*.—There were slight outbreaks of scarlatina and one case of typhus fever. Sanitary condition of district good.

CARLOW; *Fennagh and Myshall*.—During the last part of the quarter there was an epidemic of influenza, generally of the bronchial form.

CARLOW; *Leighlinbridge*.—Epidemic of measles and bronchitis prevalent among children. Children very delicate. Weather very severe; wet and cold. Influenza prevalent. No tubercular cases in the district. Sanitation of district fairly good, otherwise health of district fairly good.

NEW ROSS; *St. Mullins*.—Sanitation needs improvement. Eight cases of diphtheria occurred, the first two succumbed. Otherwise the quarter has been average.

Dublin County.

BALROTHERY; *Kilsallaghan*.—District healthy and free from infectious diseases.

DUBLIN, SOUTH; *Crumlin*.—Influenza of the bronchial type has been very prevalent during the past two months. Otherwise the health of the district is normal. I find the local branch of the Women's National Health Association a constant and unfailing source of help in every way. The nurse who has been appointed to the district is unsparing in her efforts, which are keenly appreciated by the poor.

DUBLIN SOUTH; *Donnybrook, No. 1*.—Amongst the cases of infectious disease was one of nasal diphtheria, which came under my notice.

RATHDOWN; *Blackrock and Stillorgan, No. 2*.—District healthy.

RATHDOWN; *Kingstown, No. 1*.—There has been a great prevalence of influenza during February and March; otherwise health of district very good.

Dublin County Borough.

DUBLIN, NORTH; *North City, No. 2*.—The sanitary condition of the district is very good; careful supervision is being exercised. No epidemic prevalent.

Kildare County.

ATHY; *Castledermot*.—District healthy.

BALTINGLASS; *Baltinglass, No. 2*.—Influenza very prevalent amongst adults and children.

CELBRIDGE; *Maynooth*.—District very healthy, except for slight epidemic of measles.

EDENDERRY; *Carbury*.—Three mild cases of scarlatina removed to Fever Hospital.

NAAS; *Ballymore Eustace*.—The health of the district is fairly good. Whooping-cough prevails; low death-rate.

NAAS; *Naas and Carragh, W*.—A case of cerebro-spinal fever in the rural district from a school. Source not known. The place thoroughly disinfected, and no further outbreak.

NAAS; *Robertstown and Kilmeage*.—This district is in a good sanitary condition.

Kilkenny County.

CALLAN; *Kilmaganny*.—District healthy.

CASTLECOMER; *Ballyragget*.—There was a widespread epidemic of measles, accompanied by pulmonary complications, during the quarter.

CASTLECOMER; *Castlecomer, W*.—Measles prevalent during the quarter.

KILKENNY; *Freshford*.—Measles very prevalent since middle of quarter—one death.

KILKENNY; *Gowran*.—Sanitary arrangements are good.

KILKENNY; *Tiscoffin*.—District in a healthy condition. Sanitary arrangements satisfactory.

KILKENNY; *Tullaroan*.—Health of district continues good.

NEW ROSS; *Dysartmoon*.—District healthy. No case of infectious disease occurred during past quarter.

THOMASTOWN; *Graigue*.—One man died at the age of 107 years.

THOMASTOWN; *Inistioge*.—There are some cases of whooping-cough at present in district. Two deaths were registered during the quarter as the result of phthisis; otherwise the district is healthy.

THOMASTOWN; *Knocktopher*.—District in a very healthy condition.

URLINGFORD; *Balleen*.—Measles is very prevalent for some weeks past.

URLINGFORD; *Urlingford, W.*—Health of district fairly good.

King's County.

BIRR; *Banagher*.—The health of the district is good.

BIRR; *Frankfort*.—District fairly healthy. Five of the nine deaths were of persons from 67 to 84 years of age. No death from tuberculosis. A mild epidemic of measles occurred during quarter; no deaths from same.

BIRR; *Kinnitty*.—Health of district good. Sanitation satisfactory.

EDENDERRY; *Rhode*.—A number of children ill with whooping-cough and measles.

TULLAMORE; *Clara*.—District in good sanitary condition. There has been an outbreak of measles in district during quarter; several of the cases developed broncho-pneumonia.

TULLAMORE; *Killoughy*.—Health of district very fair.

TULLAMORE; *Phillipstown*.—District healthy. Sanitary arrangements fairly up to date.

Longford County.

BALLYMAHON; *Abbeyshrule*.—Of the 24 deaths registered, seven had attained the age of 80 years and upwards, including one at 86, two at 90 and one 94 years.

BALLYMAHON; *Ballymahon, W.*—The sanitary condition of the district is satisfactory.

GRANARD; *Ballinalee*.—The district is in good sanitary condition, and free from contagious disease.

GRANARD; *Granard, W.*—The district is in fair sanitary condition, and free from contagion.

GRANARD; *Scrabby, No. 2*.—Health of the district fairly good. Influenza was prevalent during the end of February. One death is recorded of a woman aged 60 years from tubercular enteritis. She belonged to a phthisical family. A second

case of pulmonary tuberculosis has made its appearance in a labourer's family, where a death from this disease took place in February of last year. The dwelling is a thatched, damp hovel.

Louth County.

ARDEE; *Castlebellingham*.—Sanitary condition of district fair. District very healthy.

ARDEE; *Collon, No. 1*.—District healthy.

ARDEE; *Dunleer*.—District healthy.

DROGHEDA; *Drogheda, No. 2*.—Whooping-cough prevalent during the quarter.

DUNDALK; *Barronstown*.—Sanitary arrangements in district good.

Meath County.

ARDEE; *Collon, No. 2*.—District free from all zymotic disease.

ARDEE; *Drumcondra*.—Influenza has been prevalent for the past three weeks.

DROGHEDA; *St. Mary's*.—The sanitary state of district is good.

DUNSHAUGHLIN; *Killeen*.—Health of district good, and sanitation improving. Broncho-pneumonia and influenza very prevalent.

EDENDERRY; *Ballyboggan*.—Influenza very prevalent during the quarter.

KELLS; *Moynalty*.—Pneumonia and influenza very prevalent since February. The district otherwise free from serious sickness.

KELLS; *Nobber*.—District free from infectious diseases. Pneumonia was very prevalent during quarter, but only two deaths occurred from it. Influenza also affected very many; except in a few cases, it was rather of a mild type.

OLDCASTLE; *Oldcastle, W.*—The district continues in a satisfactory condition.

TRIM; *Innfield*.—The eight deaths registered of people over 65 years ranged from 66 to 84 years, but there are four other deaths not yet registered of women from 80 to 90 years. One of the deaths registered from cancer was that of the tongue, which within the past year had been operated on twice. His age was given as 63 years.

TRIM; *Summerhill*.—There was a widespread and rather severe epidemic in this district during the quarter.

Queen's County.

ABBEYLEIX; *Rathdowney*.—The sanitary arrangements are good.

MOUNTMELICK; *Clonaslee*.—The sanitary condition of the district is, on the whole, good. An epidemic of influenza during present month now dying out.

MOUNTMELICK; *Mountmellick, W.*—Registered during the quarter the death of a man 104 years.

ROSCREA; *Borris-in-Ossory*.—The health of this district has been fair during the past quarter.

Westmeath County.

ATHLONE; *Glassan*.—Epidemic of influenza; otherwise district healthy.

BALLYMAHON; *Ballymore*.—Four deaths from pulmonary tuberculosis were registered during the quarter.

GRANARD; *Finnea, No. 1*.—There was a severe epidemic of influenza during this quarter.

MULLINGAR; *Ballynacarrigy*.—The winter and spring of this year have been the most trying and unhealthy since I began to practice medicine—the continuous rain having a very debilitating effect on old and young.

MULLINGAR; *Castletown Geoghegan*.—Nearly 60 per cent. of the deaths were of people aged 65 and over. Three deaths of children under one year; all from delicacy from birth.

MULLINGAR; *Killucan*.—Influenza is very prevalent in this district for the last three weeks.

MULLINGAR; *Milltown*.—An epidemic of *grippe* made its appearance in the district early in January, and has shown no signs of disappearing since. Fortunately, only two deaths up to the present have resulted from it. There were two deaths of children from violence and two of old people nearly ninety years, who were never attended by a doctor.

MULLINGAR; *Mullingar, W*.—Health of the district good.

MULLINGAR; *Multyfarnham*.—Influenza prevalent during quarter.

TULLAMORE; *Kilbeggan*.—Sanitary arrangements of district continue to be in a satisfactory state. Measles prevailed extensively in the district in the early part of quarter, but most cases pursued an uneventful course. Tuberculous disease appears to be on the wane, largely due to better housing and a more intelligent conception of the infectivity of the disease.

Wexford County.

ENNISCORTHY; *Killann*.—One case of diphtheria.

GOREY; *Camolin*.—District continues healthy.

GOREY; *Coolgreany*.—The high death-rate is accounted for by the prevalence of influenza and chest affections among old people.

GOREY; *Killenagh and Wells*.—The public health of district is good.

NEW ROSS; *Fethard, No. 2*.—District healthy.

WEXFORD; *Bannow*.—The sanitary condition of the district is satisfactory.

WEXFORD; *Bridgetown*.—There has been no death from any form of tubercular disease registered in this district for past eight months. A slight outbreak of scarlatina, which has not spread from the two houses originally infected, and which is of a very mild type.

Wicklow County.

BALTINGLASS; *Baltinglass, No. 1, W*.—Influenza very prevalent amongst adults and children.

BALTINGLASS; *Kiltegan*.—Two cases of diphtheria during quarter; neither fatal. Some of the uncertified cases have been returned as incurable by Dublin Hospitals.

NAAS; *Blessington*.—The health of the district has been good during the past quarter. Only a few cases of influenza. The death of a man aged 91 years has been registered.

RATHDOWN; *Bray, No. 1*.—Births and deaths about the average.

RATHDOWN; *Delgany*.—Health of the district good. No case of infectious notifiable disease. Nine of the deaths over 65 years of age.

RATHDRUM; *Annamoe*.—District healthy during quarter.

RATHDRUM; *Newcastle*.—Health of district very good. No infectious diseases during quarter.

II. PROVINCE OF MUNSTER.

Ciarc County.

BALLYVAGHAN; *Ballyvaghan, W*.—An epidemic of scarlatina, one death resulting. Pulmonary complaints very common.

COROFIN; *Corofin, W*.—District, on the whole, very healthy during the quarter.

ENNIS; *Crusheen*.—Health of district good.

ENNIS; *Newmarket*.—The sanitary condition of the district is satisfactory. There has been a good deal of influenza amongst the children, with a broncho-pneumonic complication.

ENNISTIMON; *Ennistimon, W*.—The health of the district is satisfactory.

ENNISTIMON; *Roadford*.—District healthy. No infectious or contagious disease. Sanitary arrangements satisfactory. Houses in district much better kept.

KILLADYSERT; *Labasheeda*.—Health of the district continues good.

KILRUSH; *Carrigaholt*.—Measles was prevalent during months of January and February and scarlet fever last month; otherwise health of district good.

KILRUSH; *Craggacknock*.—There has been an epidemic of measles through the district since January.

KILRUSH; *Kilkee*.—The sanitary state of district fairly good. Measles present in district at the end of the past quarter.

KILRUSH; *Kilrush, W*.—Health of district good. Measles rather prevalent amongst children.

LIMERICK; *Bridgetown*.—District healthy. No death registered from tuberculosis during the quarter.

LIMERICK; *Coolacasey*.—The district is fairly healthy, and the sanitary condition satisfactory.

SCARRIFF; *Feakle*.—One death from typhus.

SCARRIFF; *Kilkishen*.—There was no case of infectious disease during the quarter.

SCARRIFF; *Mountshannon, W.*—District very healthy generally.

SCARRIFF; *Quin*.—General health of district good. Sanitary arrangements imperfect.

Cork County and County Borough.

BANDON; *Innishannon*.—Ages of uncertified deaths, 62 and 82 years. Measles of a very mild type has been universal throughout district; no deaths from it.

BANDON; *Murragh*.—A severe epidemic of measles and whooping-cough existed during the quarter. There was also a great amount of illness, chiefly of a bronchial nature.

BANTRY; *Bantry, W.*—Sanitary condition is fairly good.

BANTRY; *Durrus and Kilcrohane*.—District very healthy, and sanitary arrangements fair.

BANTRY; *Glengarriff*.—Only 3 deaths registered during quarter ended, two of which were over 80 years, the other, pulmonary tuberculosis, of a man of 49 years; the lowest number since quarter ended December, 1908. The district is fairly healthy, though there were a few cases of influenza in children.

BANTRY; *Kealkill*.—Health and sanitary condition of district good.

CASTLETOWN; *Kilcatherine*.—District healthy. No case of cancer. Five deaths registered of persons of 80 years of age.

CLONAKILTY; *Timoleague*.—A small epidemic of measles prevailed in the first month of the quarter in the district.

CORK; *Ballincollig*.—District healthy.

DUNMANWAY; *Coolmountain*.—The death-rate was unusually high, due, no doubt, to the very severe weather experienced. Five deaths were registered as occurring from tuberculous disease.

DUNMANWAY; *Dunmanway, W.*—The sanitary condition of the district continues fairly satisfactory. There was one death certified as being due to carcinoma of the liver and two to pulmonary tuberculosis.

FERMOY; *Ballynoe*.—Influenza prevailed extensively during the quarter, children being particularly affected. Complications were very common.

FERMOY; *Rathcormack*.—Pertussis was prevalent during the quarter.

KANTURK; *Milford*.—The district is healthy. There were a few cases of measles.

KANTURK; *Newmarket*.—One case of pulmonary tuberculosis. Patient came from America to die.

KILMALLOCK; *Charleville*.—The district is fairly healthy. We have had an epidemic of measles. It is now abating.

KINSALE; *Ballyfeard*.—Health of district fair. A large number of cases of influenza, complicated with bronchitis and in three instances with pleuropneumonia, treated during quarter.

KINSALE; *Courceys*.—District is in a fairly good sanitary condition.

MALLOW; *Ballyclogh*.—District healthy.

MALLOW; *Buttevant*.—A number of the labouring class are still living in unsanitary houses. The district is fairly healthy.

MALLOW; *Kilshannig*.—There was an epidemic of mumps for the past quarter.

MALLOW; *Rahan*.—Two cases of enteric fever and some cases of influenza; otherwise the district has been healthy.

MIDDLETON; *Aghada*.—Old age and tuberculous disease are the chief causes of death in this district.

MIDDLETON; *Cloyne*.—An epidemic of acute bronchitis, complicated with pneumonia, in 15 per cent. of the cases.

MIDDLETON; *Middleton, No. 2*.—The health of my district has been very good during the period of this return.

MITCHELSTOWN; *Mitchelstown, No. 1, W.*—Whooping-cough, influenza and pneumonia very prevalent during the last two months.

SKIBBEREEN; *Dromdaleague*.—District healthy.

SKIBBEREEN; *Unionhall*.—Whooping-cough and measles prevalent.

SKULL; *Goleen*.—A few cases of scarlet fever in the early part of the quarter.

Kerry County.

CAHERSIVEEN; *Caher, W.*—I beg to report there were two deaths from typhoid fever during the quarter. This disease was prevalent in a few localities, but is now completely eradicated. Prompt steps were taken to have the houses and yards thoroughly cleaned, thereby preventing a spread of the malady.

CAHERSIVEEN; *Emlagh*.—The district healthy.

CAHERSIVEEN; *Glanbehy*.—There are no deaths from cancer in my district for the quarter now ended. District healthy.

CAHERSIVEEN; *Valencia*.—The district is healthy; no epidemic. Of the six deaths registered the ages average 77 years.

DINGLE; *Anascaul*.—District healthy.

DINGLE; *Castlegregory*.—There was a severe epidemic of measles in the district during the quarter.

DINGLE; *Dingle, W.*—Health of district fairly good.

KENMARE; *Kenmare, W.*—One death was registered, the age stated being 101 years; two over 90 years; five over 80 years, and eight over 70 years. Seven died in hospital, and nine were not medically attended.

KENMARE; *Tuosist*.—District healthy. A few cases of pulmonary tuberculosis—returned American emigrants.

KILLARNEY; *Coom*.—District healthy during past quarter.

KILLARNEY; *Killarney, No. 1, W.*—Bronchopneumonia amongst children very prevalent.

KILLARNEY; *Killorglin*.—Sanitary arrangements primitive.

KILLARNEY; *Molahiffe*.—The sanitary state of the district is satisfactory.

LISTOWEL; *Ballyhorgan*.—District healthy.

LISTOWEL; *Ballylongford*.—District very healthy for quarter, most of deaths occurring from ripe old age. There was one death from consumption, probably accelerated by unsanitary surroundings.

LISTOWEL; *Listowel, W.*—District exceptionally healthy, and free from all forms of infectious disease.

LISTOWEL; *Tarbert*.—The general state of the district is satisfactory.

TRALEE; *Ardfert*.—A bad epidemic of measles in one district; about 100 cases; had the schools closed; only two fatalities; both delicate children; deaths not yet registered.

TRALEE; *Brosna, No. 1*.—No infectious disease was prevalent in the district.

TRALEE; *Castlemaine*.—Health of this district very good.

TRALEE; *Kilgobban*.—District healthy.

TRALEE; *Tralee, No. 1, W.*—Continuation of the measles epidemic which began in the previous quarter. During the quarter there were registered fourteen deaths of people between 70 and 80 years of age, six deaths between 80 and 90 years, and one death at 98 years.

TRALEE; *Tralee, No. 2*.—A severe epidemic of measles was prevalent during the quarter. The mortality and severity of the disease were greatest in unsanitary localities.

Limerick County and County Borough.

CROOM; *Castletown*.—With miserable climatic conditions the quarter has been unhealthy. Bronchitis and influenza were prevalent. Diphtheria occurred in three households.

KILMALLOCK; *Bruff*.—There were some cases of measles in the early and middle periods of quarter, otherwise the district was healthy. The sanitary condition fairly good.

KILMALLOCK; *Bruree*.—One case of scarlatina removed to hospital; one death, female, age 92 years, registered; a few cases of measles during quarter.

KILMALLOCK; *Hospital*.—District fairly healthy up to March, when influenza and pertussis appeared.

KILMALLOCK; *Kilmallock, W.*—District healthy.

LIMERICK; *Annacotty*.—Sanitary arrangements very fair; district healthy.

LIMERICK; *Caherconlish*.—Two deaths from tuberculosis. One of these had been in a sanatorium, which prolonged his life considerably. Health of district good.

LIMERICK; *Clarina*.—There was an epidemic of measles in the district during the quarter, a few cases of scarlatina, and two cases of typhoid fever; otherwise district in a fairly healthy condition.

LIMERICK; *Limerick, No. 3*.—The health of the district has been good during the past quarter; no epidemic; only three cases of all forms of tuberculous disease registered. There were 22 deaths of persons of 65 years and upwards, and only six of children under one year of age.

LIMERICK; *Moroe*.—District in fairly good sanitary condition. Three cases of scarlatina during quarter, one complicated by broncho-pneumonia died. One death from tubercular disease; none from cancer.

LISTOWEL; *Glin*.—Whooping-cough was very rife in district, and is so still.

MITCHELSTOWN; *Galbally*.—The district exceptionally healthy, save an epidemic of whooping-cough.

NEWCASTLE; *Ardagh*.—The sanitary state of the district is pretty fair.

NEWCASTLE; *Feenagh*.—Sanitary condition of the district is fairly good.

RATHKEALE; *Askeaton*.—Of the deaths registered two were women, whose ages were given as 94 and 95 years. The sanitary state of the district is fair; there was no epidemic during the quarter.

RATHKEALE; *Pallaskenry*.—Of the eight deaths registered, six died at the ages 67, 70, 74, 86, 88, 90. The other two deaths were caused by pulmonary tuberculosis. Those patients lived in insanitary houses. The prevention of this disease can be best accomplished by better housing of the people, their using more home-grown food, and being more attentive to laws of hygiene. The removal of patients to sanatoria and after a few weeks allowing them home to the former surroundings is very futile and not inexpensive.

RATHKEALE; *Rathkeale, No. 1, W.*—The district is free from infectious and contagious disease. Five deaths from tuberculous disease and one from cancer.

RATHKEALE; *Rathkeale, No. 2*.—My district was in a very healthy condition, and free from all contagious diseases.

TIPPERARY; *Grean*.—District healthy. Deaths at 80 and over occurred during the quarter, viz., 90, 90, 86, 84, 83, 80, 80 years.

Tipperary County, North Riding.

BORRISOKANE; *Borrisokane, W.*—District healthy, excepting for an outbreak of a mild type of scarlatina; five cases in all; four of whom were adults, and never had the fever before.

BORRISOKANE; *CloghJordan*.—One death from pulmonary tuberculosis was registered during the quarter ended. The death of a woman was registered whose age was 104 years.

BORRISOKANE; *Terryglass*.—The district generally is healthy, and the sanitary arrangements good.

NENAGH; *Nenagh, W.*—Mumps was prevalent during the quarter; no deaths from same.

NENAGH; *Newport*.—District free from infectious or contagious diseases.

NENAGH; *Portroe*.—District in a very healthy condition. Sanitary arrangements fairly good.

THURLES; *Borrisoleigh*.—Whooping-cough is very prevalent throughout the district.

THURLES; *Moyne*.—Whooping-cough is very prevalent in the district.

THURLES; *Thurles, W.*—Whooping-cough, pneumonia, and influenza prevalent during the quarter.

Tipperary County, South Riding.

CALLAN; *Ballingarry*.—Influenza and pneumonia were prevalent during the quarter.

CALLAN; *Mullinahone*.—The sanitary condition of district fairly good; no disease prevalent except influenza. Three deaths registered from tuberculosis (one of them recently returned from America). No death from cancer.

CASHEL; *Cashel, W.*—Whooping-cough is still prevalent in district.

CASHEL; *Kilpatrick*.—Whooping-cough prevalent during quarter.

CLOGHEEN; *Caher*.—Whooping-cough has been prevalent in the district during the past quarter. Two deaths from same were registered; otherwise the district is in a very healthy state.

CLOGHEEN; *Clogheen, W.*—District free from epidemic diseases.

CLONMEL; *Kilsheelan, No. 1.*—Four cases of pulmonary tuberculosis treated during quarter. One case of diphtheria. Whooping-cough prevalent.

TIPPERARY; *Cappagh*.—Influenza prevalent.

TIPPERARY; *Emly*.—The district is healthy. A large mortality amongst the aged.

URLINGFORD; *Kilcooly*.—Influenza with lung complication was prevalent during quarter. There was one death from croup. The sanitary arrangements are good.

Waterford County and County Borough.

CARRICK-ON-SUIR; *Rathgormuck*.—Some few cases of whooping-cough have come under my notice during the past quarter, otherwise the district is quite free from infectious disease. The sanitary condition of the district is satisfactory.

CLONMEL; *Ballymacarbry*.—Sanitary condition good. One case of simple continued fever and one of typhoid during quarter.

CLONMEL; *Kilsheelan, No. 2.*—Whooping-cough prevalent.

DUNGARVAN; *Dungarvan, W.*—District healthy during past quarter.

DUNGARVAN; *Seskinan*.—One death registered aged 96.

KILMATHOMAS; *Bunmahon*.—Whooping-cough and influenza very prevalent during the quarter; practically all the children in the district invalided.

LISMORE; *Ballyduff*.—Sanitation and general health of district very satisfactory.

WATERFORD; *Kilmeadan*.—The health of the district during the quarter was good. There was a great prevalence of bronchitis and rheumatism.

WATERFORD; *Waterford Rural, No. 1.*—The district is generally in good sanitary condition.

WATERFORD; *Waterford Urban, No. 1, W.*—The sanitary condition of the district is being steadily improved. A widespread epidemic of whooping-cough exists in the district.

WATERFORD; *Woodstown*.—The health of the district is good.

YOUGHAL; *Ardmore*.—An increase in pulmonary tuberculosis; I have noticed the cases always associated with badly ventilated bedrooms. Two cases due to drink.

III. PROVINCE OF ULSTER.**Antrim County.**

ANTRIM; *Doagh*.—There has been a widespread epidemic of measles during the quarter; also numerous cases of influenza.

ANTRIM; *Randalstown*.—A widespread epidemic of measles during the quarter.

ANTRIM; *Templepatrick*.—The sanitary arrangements of district, with few exceptions, are good. Measles very prevalent in some parts of the district.

BALLYCASTLE; *Ballycastle, W.*—Influenza has been very prevalent in the district during the quarter. The death-rate has been unusually high; of the 35 deaths registered, 24 were of persons over 65 years of age. The sanitary arrangements are fairly satisfactory.

BALLYCASTLE; *Croagh*.—Sanitary arrangements fairly good. No epidemics unless influenza.

BALLYCASTLE; *Cushendall*.—Health of this district during the winter exceptionally good. No infectious disease; only one case (imported) of tubercular disease.

BALLYMENA; *Ahoghill*.—Bronchitis and other chest troubles were prevalent during the past quarter, and during the damp weather.

BALLYMENA; *Ballymena, W.*—A severe epidemic of influenza, with the usual complications, occurred during the quarter. Town and district at present healthy.

BALLYMENA; *Broughshane*.—A severe epidemic of measles existed in the early part of the quarter in one end of my district. No deaths.

BALLYMENA; *Clogh*.—Some cases of whooping-cough during quarter; only one death.

BALLYMENA; *Glenwhirry*.—Influenza of a mild type prevalent, but health of district, on the whole, good. Birth-rate exceptionally low.

BALLYMENA; *Portglenone*.—Influenza was prevalent during the quarter.

BALLYMENA; *Toome*.—There has been an epidemic of whooping-cough of a mild character during the last quarter, but no deaths have resulted therefrom.

BALLYMONEY; *Castlequarter*.—A most virulent epidemic of whooping-cough for the past six months.

BALLYMONEY; *Dervock*.—Influenza of a mild type was widely prevalent throughout the district.

BALLYMONEY; *Dirraw*.—Many cases of influenza with pulmonary complications during the past quarter.

BELFAST; *Belfast Rural No. 4.*—The sanitary arrangements in the district are pretty well up-to-date and satisfactory. There was one death registered from diphtheria.

LISBURN; *Dunmurry*.—The sanitary condition of district very good. No epidemic of any kind.

LISBURN; *Glenavy*.—There has been a severe epidemic of influenza during the quarter; otherwise the district is healthy and sanitation good.

Armagh County.

ARMAGH; *Keady*.—There was a severe epidemic of measles during the quarter, but only five deaths resulted from the disease.

ARMAGH; *Markethill*.—Owing to the damp cold winter chest affections were very prevalent. Diphtheria was prevalent in the district.

ARMAGH; *Rich Hill*.—There was a severe epidemic of influenza during this quarter, and pneumonia following this disease caused the deaths of several elderly people.

ARMAGH; *Tynan*.—District in a healthy condition.

CASTLEBLAYNEY; *Crossmaglen No. 1*.—Measles has been prevalent for past month.

LURGAN; *Lurgan No. 1, W*.—A very severe epidemic of influenza occurred during the quarter.

LURGAN; *Lurgan No. 2*.—This district is in a fairly healthy condition.

NEWRY; *Forkill*.—There was a widespread epidemic of measles in the first two months of the quarter. The death-rate is very high.

NEWRY; *Mullaghglass*.—There is an epidemic of measles all over district for past three months.

NEWRY; *Poyntz Pass*.—An epidemic of measles.

Belfast County Borough.

BELFAST; *Belfast, Urban, No. 4, W*.—One death from cerebro-spinal fever.

BELFAST; *Belfast, Urban, No. 5*.—No outbreak of any infectious disease.

BELFAST; *Belfast, Urban, No. 9*.—No deaths from cerebro-spinal fever occurred during the quarter.

BELFAST; *Belfast, Urban, No. 11*.—Measles, bronchitis, and pneumonia have been prevalent in the district during the quarter.

BELFAST; *Belfast, Urban, No. 13*.—The district is in a fairly healthy state. A great number of cases of measles occurred during the quarter. The mortality was low. The number of cases of uncertified deaths is very much above the average; the cases are those whose deaths occurred suddenly. These were reported to the Coroner, who, after inquiry, did not consider an inquest necessary. No deaths from cerebro-spinal meningitis.

Cavan County.

BAILIEBOROUGH; *Bailieborough, W*.—District in a healthy condition.

CAVAN; *Belturbet*.—The sanitary condition fair. Influenza very prevalent, chicken-pox, and broncho-pneumonia.

CAVAN; *Killashandra*.—No death from tuberculous disease nor cancer registered during past quarter. District healthy.

CAVAN; *Kilnaleck*.—Excessive number of chest disease cases, due to severe weather.

CAVAN; *Stradone*.—Influenza prevalent.

COOTEHILL; *Tullyvin*.—Whooping-cough was prevalent. There was also a slight outbreak of measles.

ENNISKILLEN; *Dowra*.—The sanitary condition of the district is very good, no case of infectious disease having occurred during quarter.

GRANARD; *Scrubby, No. 1*.—Health of the district good. During the end of February influenza was rather prevalent.

OLDCASTLE; *Ballyjamesduff*.—Pneumonia and influenza prevalent.

OLDCASTLE; *Virginia*.—District healthy.

Donegal County.

BALLYSHANNON; *Ballintra*.—The sanitary conditions of district good. Of the twelve deaths registered, only six had medical attendance.

DONEGAL; *Donegal, W*.—Influenza has been prevalent during the quarter.

DONEGAL; *Dunkineely*.—Influenza and bronchitis prevalent during March; also a few cases of pneumonia. Sanitary condition of district fair.

DONEGAL; *Laghy*.—Influenza has been prevalent during the quarter, otherwise the district was free from any epidemic.

DONEGAL; *Mountcharles*.—One death registered at 112 years. A few cases of diphtheria in the district during the quarter; one death registered.

DONEGAL; *Pettigoe*.—Influenza and colds very prevalent in district during last quarter. District otherwise healthy.

DUNFANAGHY; *Crossroads*.—Measles very prevalent during quarter.

DUNFANAGHY; *Dunfanaghy, W*.—Several cases of severe influenza attacking stomach and the senses of taste and smell.

GLENTIES; *Ardara*.—District healthy.

GLENTIES; *Doocharry*.—District healthy.

GLENTIES; *Dunglow, No. 1*.—There is a severe epidemic of influenza. Whooping-cough and measles were prevalent in parts of the district. One child, four weeks old, died of the former. In three families there were cases of diphtheria, in one of which two children died before medical aid was sought. In two of the latter cases the houses were very dirty, cattle being housed in one.

GLENTIES; *Dunglow, No. 2*.—There has been an epidemic of measles during the quarter, many cases being of the hæmorrhagic type. There were no fatal cases. Of the twenty-six deaths registered during the quarter, eleven occurred between the ages of 65 and 75, two between 75 and 80, seven aged 80 and upwards. There was one death, cause unknown, one from diabetes, and three from apoplexy. Seven deaths only were certified.

INISHOWEN; *Buncrana*.—District healthy. One death was registered at 99 years of age, and five over 80 years.

INISHOWEN; *Carndonagh, W*.—Influenza very prevalent during last month of quarter.

INISHOWEN; *Clonmany*.—District healthy.

INISHOWEN; *Malin*.—District healthy. There were a few sporadic cases of diphtheritic croup in district during quarter. Two deaths occurred from same. The disease is now stamped out.

INISHOWEN; *Moville*.—District healthy.

LETTERKENNY; Church Hill.—District healthy. There was an epidemic of whooping-cough during the quarter, but only one death from the disease, which has not been registered yet.

LETTERKENNY; Manorcunningham.—Sanitary state of the district good. Influenza prevalent.

MILLFORD; Rathmullan.—Some mild cases of measles during the quarter.

MILLFORD; Rosguill.—Influenza prevalent during quarter; one case of cerebral type.

STRABANE; Raphoe.—Sanitary arrangements satisfactory. Influenza general. Many cases of pneumonia.

STRANORLAR; Cloghan.—Sanitary arrangements satisfactory. The majority of the deaths registered are of an advanced age, one having reached 96, another 95. A severe type of influenza prevailed in the district in the latter end of the quarter.

STRANORLAR; Killygordon.—In spite of a sharp epidemic of influenza, the death-rate for this quarter has been much lower than for many previous years; three-fourths of deaths registered were well above 70, three being registered at the age of 99, 94, and 91. Sanitation good.

Down County.

BANBRIDGE; Ballyward.—Free from any infectious disease. Sanitation very good.

DOWNPATRICK; Ballynahinch.—There have been numerous cases of influenza of a severe type in the district, with some deaths; also cases of measles and mumps in parts of the district.

DOWNPATRICK; Killyleagh.—During the quarter just ended there has been an epidemic of influenza of a mild type, accompanied with bronchial catarrh. Strange to relate, I have not attended a case of pneumonia during the present winter.

DOWNPATRICK; Portaferry.—Two cases of whooping-cough and four of measles occurred, and influenza of a mild type was very prevalent.

DOWNPATRICK; Strangford.—One death registered of a spinster, 106 years; also a widow 94 years.

KILKEEL; Kilkeel, No. 2, W.—Health of this district has been good. Two cases of diphtheria. One died; one recovered; did not hear of any others.

KILKEEL; Rosstrevor.—Sanitary condition of district quite satisfactory. No zymotic diseases. A good deal of influenza and colds amongst the old people and young. No deaths amongst children under ten years. Deaths mostly amongst old people, ranging from 60 to 91.

LISBURN; Annahilt.—The sanitary condition of the district is good. There has been no case of infectious disease during the quarter.

LISBURN; Ballylesson.—The district is in a healthy state, and there is an absence of any of the acute infectious fevers, except those occurring in the fever hospital.

LISBURN; Drumbeg.—Influenza very prevalent during February; no deaths reported as having been caused by it. Five deaths from phthisis; a proportion of more than one-third registered.

LISBURN; Hillsborough.—District free from any infectious disease during whole quarter.

LISBURN; Saintfield.—Scarlet fever still appears in country places. Typhoid fever, five cases in all, in town, mild type; no deaths.

LURGAN; Moira.—We have a small and desultory epidemic of scarlatina with us at present, but so far only one death here. One death in hospital from subsequent sepsis. This is the first occasion since I came to the district (and presumably the first at any time) that the deaths have more than balanced the births.

LURGAN; Waringstown.—During the quarter there were reported to me eight cases of scarlet fever, four of diphtheria, and one each of enteric and puerperal fever. There was no death recorded from them except the case of enteric fever. It did not originate here, but in a neighbouring district, and was supposed to have been caused by eating oysters. Deaths exceeded the births by one.

NEWRY; Donaghmore.—The district has been almost free from fever. Sanitary arrangements very good, as a rule.

NEWRY; Newry, No. 1.—One uncertified death; probably measles.

NEWRY; Newry, No. 2.—There has been a widespread epidemic of measles, with pneumonia or broncho-pneumonia as complications.

NEWRY; Rathfriland.—District in good sanitary condition.

NEWTOWNARDS; Bangor.—Sanitary arrangements good; no epidemic; public health good.

NEWTOWNARDS; Comber.—Measles and chicken-pox have been very prevalent in the district, but of a very mild type, and no deaths. District otherwise healthy.

NEWTOWNARDS; Newtownards, W.—The health of the district has been good generally. There were a few cases of measles in the rural district. Owing to the prompt measures taken by the sanitary authority the disease did not spread or reach the town. There were a number of cases of mumps in the district.

Fermanagh County.

CLONES; Newtownbutler.—There was a severe and widespread epidemic of influenza during the past quarter.

ENNISKILLEN; Enniskillen, W.—Sanitation fairly good.

ENNISKILLEN; Florencecourt.—Pneumonia was prevalent during the quarter. The district is free from infectious disease, and the sanitary conditions fairly good.

ENNISKILLEN; Lisbellaw.—Sanitary arrangements fairly good. One case of scarlatina in district. Sent to hospital; house disinfected.

IRVINESTOWN; Clonelly.—The sanitary condition of the district is fairly good. Influenza is prevalent.

IRVINESTOWN; Ederney.—Influenza and bronchitis very prevalent during quarter.

IRVINESTOWN; Irvinestown, W.—Influenza prevalent during quarter. Of the two deaths registered from tuberculous disease, one occurred in Rosslare Sanatorium.

LISNASKEA; Derrylin.—Many severe cases of influenza.

LISNASKEA; Lisnaskea, W.—Sanitary state of district fair.

Londonderry County and County Borough.

COLERAINE; *Aghadowey*.—Disease was widespread and severe during the quarter—measles, whooping-cough, and influenza—but mortality was exceptionally low. I registered during the quarter one death at 95, another at 100, the latter a female, discharging her ordinary household duties with efficiency till a week before her death.

COLERAINE; *Garvagh*.—Influenza was prevalent during quarter, with complications, causing five deaths. Measles was general in the district, causing one death, and whooping-cough was also general, causing two deaths.

COLERAINE; *Kilrea*.—District healthy. Whooping-cough was very prevalent during part of the quarter, which necessitated the closing of several schools in the district, but at present it has to a great extent abated, and several deaths resulted through its complications. There was one fatal case of diphtheria following whooping-cough, and there was no further spread of the disease.

COLERAINE; *Portstewart*.—Influenza and chest affections have been prevalent.

LIMAVADY; *Ballykelly*.—One of a child five and a half years, died suddenly; no inquest, and no apparent cause sufficient to explain death. Of the deaths over 65 years, six were over 80 years, and one over 90 years. Whooping-cough very prevalent in the district.

LIMAVADY; *Bellarena*.—Influenza has been prevalent throughout the past quarter, affecting, chiefly, the respiratory system. No deaths.

LIMAVADY; *Limavady, W.*—The sanitary arrangements of district good. There was an epidemic of whooping-cough during the quarter.

LONDONDERRY; *Claudy*.—Chest affections prevalent; an unusual number of cases of lobar pneumonia, two deaths being certified as due to this cause.

LONDONDERRY; *Eglinton*.—One case of cancer; no family history. Influenza and pneumonia very prevalent. Two cases of scarlatina removed to hospital from same house; no further cases.

MAGHERAFELT; *Draperstown*.—Influenza prevalent during quarter.

MAGHERAFELT; *Maghera*.—No deaths from infectious diseases nor cancer. More than half them aged people, hence the number of uncertified cases.

MAGHERAFELT; *Moneymore*.—There has been no outbreak of any infectious disease during the quarter, except influenza, which, with congestion of the lungs as a complication, caused some deaths. There have been a great many deaths of old people, so that there have been more deaths than births.

Monaghan County.

CARRICKMACROSS; *Carrickmacross, W.*—District in good sanitary condition, and no epidemic.

CASTLEBLAYNEY; *Ballybay*.—Influenza, with chest complications, prevailed in March. Considerable improvement was effected in sanitation in town.

CASTLEBLAYNEY; *Castleblayney, W.*—A few cases of whooping-cough and measles are under treatment. The types of the diseases are, so far, very mild.

COOTEHILL; *Dawsongrove*.—The sanitary condition of the district is fair. Influenza is prevalent.

MONAGHAN; *Castleshane*.—There has been an epidemic of influenza. The district is sanitary. One death from measles, uncertified. No other cases reported for so far during the quarter.

MONAGHAN; *Emyvale*.—Health of district very good; no epidemic during quarter.

MONAGHAN; *Kilmore*.—An extensive outbreak of measles. Four cases of scarlatina; three in one family; source unknown. Much influenza in last month of quarter.

MONAGHAN; *Scotstown*.—The district is in a good sanitary condition.

Tyrone County.

CASTLEDERG; *Castlederg, W.*—Sanitary state of district satisfactory at present. Influenza very prevalent, complicated with pneumonia.

CASTLEDERG; *Drumquin*.—The sanitary arrangements in the district are satisfactory, there being a total absence of infectious disease during the quarter.

CASTLEDERG; *Killeter*.—Influenza very prevalent during quarter. A great number of deaths of aged people.

CLOGHER; *Fivemiletown*.—There were a good many cases of influenza during the quarter.

COOKSTOWN; *Coagh*.—Influenza of a mild type prevalent during the quarter. No other zymotic disease. One death registered at 103 years.

COOKSTOWN; *Cookstown, W.*—The district is healthy.

COOKSTOWN; *Pomeroy*.—Sanitary arrangements fairly satisfactory; health of district very good.

COOKSTOWN; *Stewartstown*.—Out of seventeen deaths, fourteen were 65 and a good way over. There has been an epidemic of influenza in my district; about 3,000 persons have been affected or ill through it. One case of imported typhoid, one case of diphtheria; both recovered.

DUNGANNON; *Benburb*.—Sanitary condition of district good; influenza prevalent.

DUNGANNON; *Caledon and Ballymagran*.—Influenza complicated by broncho-pneumonia and pleuritis very prevalent.

DUNGANNON; *Clonavaddy*.—Sanitary arrangements in the district good; no infectious diseases.

DUNGANNON; *Coal Island*.—German measles has appeared in the district.

OMAGH; *Drumquin*.—The sanitary condition of the district is satisfactory.

OMAGH; *Fintona*.—The health of the district has, in general, been good during the past quarter, and, with the exception of a number of cases of catarrhal influenza, free from epidemic diseases. The sanitary arrangements are satisfactory.

OMAGH; *Omagh, No. 1, W.*—Health of district good. Re deaths from typhoid, two were in union hospital, one in county hospital, a nurse (contracted in discharge of her duties), two in district asylum. Case of diphtheria was from rural district. Re tuberculosis cases, two deaths occurred in urban district,

six in rural district (union hospital, county hospital, and asylum). Diphtheria case was from rural district. Sanitary condition of urban district fair; rural unsatisfactory.

OMAGH; *Omagh, No. 2*.—District fairly healthy and in good sanitary condition.

OMAGH; *Sixmilecross*.—The district is in very good sanitary condition at present. One case of typhoid occurred during the quarter. Of the twenty-two deaths registered, fifteen of them were over 70 years, and of these two were 92 years.

STRABANE; *Dunnamanagh*.—There has been a severe epidemic of congestion of lungs in the district during the quarter.

IV. PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; *Kiltormer*.—District very healthy.

CLIFDEN; *Clifden, W*.—Sanitary arrangements in district fairly good.

CLIFDEN; *Inishbofin*.—Sanitary condition good.

GALWAY; *Galway, No. 3 (Arran)*.—Health of district very good.

GALWAY; *Moycullen*.—The people of this district are very subject to coughs and chest complaints.

GALWAY; *Oranmore*.—The district continues healthy.

GALWAY; *Spiddle*.—District continues healthy.

GALWAY; *Turloughmore*.—Sanitation fair. Influenza prevalent.

GORT; *Ardrahan*.—The ages of those comprising six uncertified deaths were 90, 87, 86, 85, 80, and 75 years.

GORT; *Gort, W*.—An epidemic of measles prevailed throughout the district during quarter. The public health was good otherwise.

GORT; *Kinvarra*.—There is an epidemic of measles just beginning.

LOUGHREA; *Bullaun*.—Deaths of persons of the following ages registered during the quarter—78, 82, 84, and 90 years.

OUGHTERARD; *Cloonbur, No. 1*.—Health of district very good.

OUGHTERARD; *Oughterard, W*.—No deaths from cancer.

PORTUMNA; *Eyrecourt*.—Whooping-cough is prevalent in part of the district.

PORTUMNA; *Portumna, No. 1, W*.—Sanitary condition of district fairly good.

TUAM; *Tuam, No. 1, W*.—Health of district good during the quarter. There were a few cases of pneumonia during last month of quarter.

TUAM; *Tuam, No. 2*.—There was an epidemic of mumps in district during the quarter, and influenza. One of the cases of pulmonary tuberculosis registered was a young woman who returned from America five years ago.

Leitrim County.

BALLYSHANNON; *Kinlough*.—Births and deaths nearly equal.

BAWNBOY; *Ballinamore*.—Sanitary arrangements good.

MOHILL; *Carrigallen*.—The health and sanitary state of district are good. Of the six deaths registered, five were over 65 years; one, whose age is well authenticated was over 100 years.

MOHILL; *Mohill, W*.—As far as I know, sanitary arrangements satisfactory.

MOHILL; *Rinn*.—The district is healthy and free from epidemic.

MOHILL; *Rowan*.—District is fairly good regarding sanitary arrangements.

Mayo County.

BALLINA; *Ballina, W*.—Health of the district good. The deaths from tuberculosis and cancer remain about average. The outstanding feature of the quarter is the large number of deaths registered of persons aged 65 years and upwards, viz., 48 out of a total of 77.

BALLINA; *Crossmolina*.—District continues quite free from infectious disease.

BALLINROBE; *Ballinrobe, W*.—Health of district is very good, considering the very inclement weather experienced during the quarter. Two deaths from scarlet fever have been registered.

BALLINROBE; *Cappaduff*.—Many houses in the district require white-washing and cleaning in front of the houses.

BALLINROBE; *Cong*.—Health of district fairly good.

BALLINROBE; *Hollymount*.—A widespread prevalence of influenza during the quarter. There are some births and deaths that occurred during the quarter not yet registered; both are under the average for this quarter.

BEIMULLET; *Binghamstown, W*.—District fairly satisfactory, with the exception of an outbreak of typhus fever that occurred in a house convenient to the town. Six of the family were removed to the fever hospital, and are now almost convalescent. Of the deaths registered, two were 90 years of age, one 86, one 80, one 78, two 75, and one 74 years of age.

CASTLEBAR; *Balla*.—District in a healthy condition.

CASTLEBAR; *Castlebar, No. 1, W*.—Health of district good. An epidemic of influenza, having patchy catarrhal pneumonic symptoms, was prevalent during the months of January and February.

CLAREMORRIS; *Ballyhaunis*.—Save for the exceptional prevalence and severity of diseases of the respiratory organs, the health of the district has been good. No zymotics. Two cases of cancer. Sanitation steadily progressive. Obvious hygienic and considerable structural improvement in the dwellings. Six of the deaths registered had attained ages varying between 80 and 94 years.

CLAREMORRIS; *Claremorris, W*.—The health of the district is good. No cases of infectious fevers. Sixty per cent. of deaths are of persons over 65 years of age.

KILLALA; Killala, W.—Pulmonary and other forms of tuberculosis are prevalent in the district. The dwellings of the small farmers and labourers are, for the most part, unhealthy and dirty.

SWINEFORD; Foxford.—A general epidemic of influenza occurred during the quarter, complicated by pneumonia in many instances. No fatal cases.

SWINEFORD; Swineford, W.—The district is presently in a fairly sanitary condition, and the general health of the people is good. Pneumonia and influenza were the most prevalent diseases during past quarter.

WESTPORT; Achill.—General health and sanitary state of district good, and no epidemic present.

WESTPORT; Ballycroy.—Very severe influenza, affecting respiratory tract chiefly. This epidemic caused the deaths of five old persons over 70 and two children during quarter.

WESTPORT; Islandeady.—The district is in a sanitary condition.

WESTPORT; Louisburgh.—Health of district fair during quarter. A good many cases of influenza and whooping-cough affected adults and children during same period. Two deaths registered from latter. Sanitation fairly good. Of deaths registered and uncertified, one is that of an old woman aged 90 years.

WESTPORT; Newport.—One death from pulmonary tuberculosis and one from cancer certified. In many cases cattle are housed in dwellinghouses, and such will be the case until strong measures are adopted to enforce the sanitary laws.

Roscommon County.

ATHLONE; Kiltoom.—Sanitary condition of district continues good.

CARRICK-ON-SHANNON; Aughrim.—There was one case of enteric fever at the beginning of the quarter. Otherwise the district has been free from infectious disease.

CASTLEREAGH; Loughglinn.—The very severe wet weather for the past quarter has increased the number of deaths of the aged. There is a diminution of deaths due to tuberculosis. There has been an unusual number of large windows put into the dwellinghouses in this district. The people are now recognising the importance of more light and air. There has been no death from cancer.

ROSCOMMON; Roscommon, W.—Influenza prevalent.

STROKESTOWN; Roosky.—There was one death from diphtheria during the quarter. Of the deaths registered, three were 74 years of age, one 75, two 77, three 78, one 79, one 81, one 87, one 88, one 97, and one 98. Sanitation progressive.

STROKESTOWN; Strokestown, W.—The number of deaths of children under one year of age is larger than usual, also the number of deaths of persons aged 65 and upwards.

Sligo County.

BOYLE; Gurteen.—There were two deaths from scarlet fever in past quarter.

DROMORE, WEST; Castleconor.—The sanitary arrangements of Enniscrone are bad, there being no public sewer of any kind.

DROMORE, WEST; Easkey, W.—Health of district good. No case of infectious disease during quarter.

DROMORE, WEST; Skreen.—The health of the district is good. Epidemic of specific parotitis during the quarter.

SLIGO; Ballymote.—The weather has been so awfully wet since the end of October that a good number of people between the ages of 50 and 70 years succumbed, on account of what is commonly called "colds."

SLIGO; Carney, No. 1.—Sanitary condition of district fairly good. Epidemic of scarlatina during past quarter.

SLIGO, CARNEY, No. 2.—Sanitary arrangements in the district is fair. There was one death from typhoid. There was a mild epidemic of scarlatina.

SLIGO; Collooney.—One case of enteric contracted in Newry; one case of scarlatina; two of diphtheria; enteric case died in hospital.

SLIGO; Riverstown.—District healthy.

TOBERCERRY; Aclare.—The sanitary conditions of the district are steadily improving.

TOBERCERRY; Coolaney.—Sanitation satisfactory.

1913.]
2nd Quarter

[No. 198.]

QUARTERLY RETURN

OF THE

MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE

PROVINCES, COUNTIES, POOR LAW UNIONS, OR SUPERINTENDENT REGISTRARS'
DISTRICTS, AND REGISTRARS' DISTRICTS IN IRELAND,

WITH

*Certain Detailed Information Relative to the Deaths in each Registrar's District ;
Persons Vaccinated, &c., &c., &c.*

By Authority of the Registrar-General.

Price One Shilling.

Marriages:—JANUARY, FEBRUARY, MARCH, 1913.

Births and Deaths:—APRIL, MAY, JUNE, 1913.

During the quarter ended 30th June last, there were registered in the 829 Registrars' Districts in Ireland 26,615 births—a number equal to an annual birth-rate of 24·3 in every 1,000 of the estimated population*—and 19,989 deaths, representing an annual rate of 18·3 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 15,148 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 24·6 in every 1,000 of the estimated population, and the death-rate 13·2 per 1,000.

The birth-rate in Ireland for the quarter is 0·1 below the average rate for the corresponding quarter of the ten years, 1903–1912, but 0·1 above the rate for the second quarter of 1912. The deaths are 1,433 above those registered in the corresponding quarter of 1912; the death-rate is 1·4 above the rate for that quarter, and 0·3 above the average for the second quarter of the ten years, 1903–1912.

In comparison with those for the corresponding quarter of 1912, the returns of pauperism furnished by the Local Government Board show a decrease of 424 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 1,859 in the average number of persons on out-door relief.

Compared with the averages for the second quarter of the ten years, 1903–1912, the number of Workhouse inmates shows a decrease of 5,341, and the number of persons on out-door relief shows a decrease of 14,987, the total under both heads being 21·2 per cent. under the average for the second quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 0·3 per cent.

* See page 140.

The annual marriage-rate (5·2 per 1,000 of the population) represented by the marriages registered during the first quarter of 1913, is 1·0 below the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each PROVINCE and COUNTY in Ireland, the Annual Rate per 1,000 of the population,* represented by the number of MARRIAGES registered during the Quarter ended 31st March, 1913, and by the BIRTHS and DEATHS registered in the Quarter ended 30th June, 1913.

* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry Co. and Co. Borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1911. See note (*) page 140.

MARRIAGES.

The Marriages (5,695) registered in Ireland during the first quarter of 1913 are equivalent to an annual rate of 5·2 per 1,000 of the estimated population, being 0·9 below the rate for the corresponding quarter of 1912, and 1·0 below the average rate for the first quarter of the ten years 1903–1912. Of the total number of marriages, 4,322 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,373 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 5·3 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 4·8 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 1·4 below, and that under the latter heading equal to the average rate for the corresponding quarter of the previous ten years.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the eleven years 1903–1912, and the average number for that period; also the number registered in the first quarter of 1913.

BIRTHS.

The number of births registered during the quarter ended 30th June last was 26,615—13,663 boys and 12,952 girls—being equal to an annual ratio of 1 in every 41·1, or 24·3 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years, 1903–12, was 26,792, equivalent to an annual rate of 24·4 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 24·9 per 1,000 of the population according to the Census of 1911; Munster, 23·1; Ulster, 25·2; and Connaught, 22·4.

The highest county or county borough birth-rate* is 33·6 for Dublin county borough, and the lowest 19·0 for Clare County. Of the intermediate rates the highest five are—Belfast county borough, 30·1; Limerick county and county borough, 26·3; Kilkenny, 25·6; Londonderry county and county borough, 25·3; and Kerry, 25·2. The lowest five are—Dublin County, 19·4; Monaghan, 20·2; Carlow, 20·3; Wicklow, 20·4; and Westmeath, 20·5.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th June last was 19,989—9,975 males and 10,014 females—affording an annual ratio of 1 in every 54·8, or 18·3 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1903–12, was 18·0 per 1,000.

The death-rate in Leinster was 19·6 per 1,000 of the population according to the Census of 1911; in Munster, 17·8; in Ulster, 18·5; and in Connaught, 15·7.

The county or county borough death-rates* range from 14·9 in Kerry to 23·6 in Dublin county borough. Between these rates the lowest five are—Galway, 15·1; Roscommon, 15·3; Leitrim, 15·7; Mayo, 15·7; and Dublin County, 16·0; and the highest five are—Wexford, 22·2; Monaghan, 21·3; Tyrone, 21·1; Kilkenny, 20·5; and Tipperary, South Riding, 19·9.

* See note (*) on page 78.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years 1903–1912, and the average number for that period; also the number registered during the first and second quarters of the year 1913 :—

AGES.—Of the 19,989 deaths registered last quarter, 2,297, or 11·5 per cent., were of infants under one year of age; and 8,514, or 42·6 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 86·3 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under one year old equalled 12·9 per cent. of the total deaths registered therein; in Munster, 10·0 per cent.; in Ulster, 12·3 per cent.; and in Connaught, 8·7 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 37·3 per cent.; in Munster, to 43·8 per cent.; in Ulster, to 42·1 per cent.; and in Connaught, to 54·2 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

DISEASES.—The total number of deaths from the principal epidemic diseases* is 785, and is equivalent to an annual rate of 0·71 per 1,000 living.

The following tabular statement shows the mortality from some of the principal epidemic diseases, as registered during the June quarter of 1913, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years, 1908–1912.

Name of Disease.	Number of Deaths in June quarter, 1913.	Average number of Deaths in June quarter of the 5 years, 1908–1912.
Enteric Fever,	46	61
Typhus,	12	17
Small-pox,	—	—
Measles,	243	217
Scarlet Fever,	69	44
Whooping-cough,	158	294
Diphtheria,	55	80

* See note (†) on page 85.

ENTERIC FEVER.—The number of deaths from enteric fever registered during the quarter was 46, as against 40, 53 and 80 in the three preceding quarters and an average of 61 for the corresponding quarter of the five years, 1908-12. The 46 deaths are equivalent to an annual rate of 0·04 per 1,000 of the estimated population. There were 5 deaths in the union of Dublin North and 3 in each of the unions of Kilkenny, Limerick, Lisburn and Mohill.

TYPHUS.—Deaths from this disease, which were 4, 6 and 17 in the three preceding quarterly periods, numbered 12 in the period under notice, the average number for the June quarter of the past five years being 17. In Ballina union 3 deaths were recorded, in each of Dublin North, Dublin South, and Castlereagh unions 2 deaths, and in each of Scarriff, Glennamaddy and Boyle unions there was one death.

SMALL-POX.—There was no death from small-pox registered during the quarter.

MEASLES.—The deaths caused by measles numbered 243, affording an annual rate of 0·22 per 1,000 of the population. Of the deaths, 41 were registered in the union of Wexford, 24 in Newry, 23 in Belfast, 13 in Monaghan, 11 in Cork, and 10 each in Ennis and Kilrush unions.

In the three preceding quarters the deaths from this disease were 105, 413 and 329, respectively, and in the June quarter of the five years, 1908-1912, the average number was 217.

SCARLET FEVER.—There were 69 fatal cases of scarlet fever during the quarter under notice, being equivalent to an annual rate of 0·06 per 1,000 of the population. In the three previous quarters such deaths numbered 78, 85 and 66, respectively, and the average for the corresponding quarter of the five years preceding was 44.

WHOOPIING-COUGH.—Deaths from this cause, numbering 158, or 0·14 per 1,000 of the population, are considerably under the average for the corresponding June quarter of the five years, 1908-12, namely, 294, the numbers for the three quarters preceding being 199, 125 and 173, respectively.

In Dublin county borough there were 21 deaths from whooping-cough, in Thurles union, 12; in Waterford union, 11 deaths, and in Fermoy union, 10 deaths.

DIPHTHERIA.—The deaths from diphtheria, which in the three preceding quarters numbered 70, 82 and 96, respectively, fell to 55 in the period under notice, the average for the corresponding quarter of the preceding five years being 80. There were 12 deaths from this cause in Dublin South union, 8 in Lisburn union, 7 in Rathdown union, and 5 in Dublin North union.

DIARRHŒAL DISEASES.—There were 167 deaths from diarrhœa and enteritis of children under 2 years of age recorded during the quarter, this number being equivalent to an annual rate of 0·15 per 1,000 of the estimated population. The number of deaths from diarrhœa of persons aged 2 years and upwards was 31.

TUBERCULOUS DISEASE.—The deaths from tuberculous disease during the quarter, as returned by the Registrars, numbered 2,694, as against an average of 2,843 for the corresponding quarter of the preceding five years; the number for the June quarter of 1912 was 2,664.

In the following notes the Registrars have furnished their observations on the status of tuberculous disease and on other matters affecting the public health :—

Baltinglass; Rathvilly.—All forms of tuberculous disease are prevalent in this district, especially phthisis pulmonalis.

Dublin, South; New Kilmainham.—Pulmonary tuberculosis is very prevalent.

Granard; Scrabby, No. 2.—One death of a young man from pulmonary tuberculosis is recorded, being the second death from this disease within the past two years in same house.

Ballymahon; Ballymore.—Four deaths of persons from tuberculosis; three pulmonary, one of whom took the disease from his brother who returned from the U. S., America.

Ennis; Newmarket.—The general health of the district is good, but four deaths from pulmonary tuberculosis during the quarter seem to point to its prevalence in this locality.

Bantry; Glengarriff.—A girl of 24 years of age died of acute pulmonary tuberculosis, contracted evidently in Wales, where she lived for a considerable time, returned to the district and died after a few weeks at home.

Caherciveen; Emlagh.—The residents of this district are getting to understand the value of ventilation.

Listowel; Ballylongford.—There was one death from consumption. Deceased, however, persisted in refusing to enter a sanatorium when requested in early stages.

Listowel; Glin.—I regret to say that pulmonary tuberculosis and cancer have been responsible for a great number of the deaths that occurred in the district during the quarter just closed.

Mitchelstown; Galbally.—Tuberculous disease is becoming very prevalent.

Youghal; Clashmore.—Two tuberculosis cases; one 5 weeks home from America.

Kilkeel; Kilkeel, No. 2.—One of the phthisical cases was a case of miner's phthisis contracted in South Africa.

Irvinestown; Irvinestown.—Two cases of pulmonary tuberculosis registered during quarter. One died in Workhouse Infirmary. Family history not known. The second is one of a family, several of whom have died from the disease, which was introduced by another member who contracted disease in another locality and returned to die.

Cookstown; Pomeroy.—Tuberculosis is prevalent enough although it scarcely figures in the deaths' return.

CANCER.—There were 843 deaths returned under this heading, being equivalent to an annual rate of 0·77 per 1,000 of the population, the corresponding rates for the three quarters preceding being 0·76, 0·79 and 0·79, respectively.

VIOLENCE.—Under this heading, which includes accident or negligence, homicide and suicide, there were 234 deaths.

The Registrars, in their Notes, report the presence of the following diseases:—Measles in 58 districts, scarlet fever in 25, whooping-cough in 25, diphtheria in 8, enteric fever in 11, influenza in 26, typhus in 2, mumps in 5, chicken-pox in 1, and cerebro-spinal fever or cerebro-spinal meningitis in 2. [See Appendix to this Report commencing on page 141.]

INQUESTS.—There were 459 inquests reported to the Registrars during the quarter; this number being equal to 1 in every 44 of the total deaths registered.

In Leinster there was 1 inquest to every 39 deaths registered, in Munster 1 to 42, in Ulster 1 to 41, and in Connaught 1 to 92.

DEATHS IN PUBLIC INSTITUTIONS.—Of the 19,989 deaths registered, 4,142, or 20·7 per cent., occurred in public institutions. In Leinster the percentage was 27·6, in Munster 24·2, in Ulster 15·5, and in Connaught 13·8.

UNCERTIFIED DEATHS.—According to the returns, 4,802 of the 19,989 deaths which were registered during the quarter were uncertified, being 24 per cent. of the total. In Leinster the percentage was 18, in Munster 26, in Ulster 19, and in Connaught the uncertified deaths were 49 per cent. of the total deaths registered in the province.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 30th June, 1913, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population:—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.										Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Enteric Fever.	Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Diarrhoeal Diseases.	Total.

URBAN DISTRICTS.

Separate Statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 19.2, and the birth-rate 28.4 per 1,000 of the population; in the remainder of the country the death-rate was 17.8 and the birth-rate 22.3 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases † in the Urban Districts during the quarter was 1.3 per 1,000 of the population; in the remainder of the country the rate was 0.5 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the SECOND QUARTER of the year 1913, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES †; from TUBERCULOUS DISEASE, and from CANCER, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-six Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 28th June, 1913.

VACCINATION.

According to the Returns of Primary Vaccinations received for the second quarter of the year 1913, there were 22,411 persons successfully vaccinated.

EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 30th June last was 15,148 (8,422 males and 6,726 females), being 2,376 more than in the corresponding quarter of the year 1912, and 471 above the average number for the second quarter of the ten years 1903-1912.

TABLE VI.—EMIGRATION from IRELAND during the months of April, May, and June in 1912 and 1913 :—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1912.	1913.	In-crease.	De-crease.	1912.	1913.	In-crease.	De-crease.	1912.	1913.	In-crease.	De-crease.
April,	2,929	3,407	478	-	2,754	2,764	10	-	5,683	6,171	488	-
May,	2,617	3,366	749	-	2,103	2,703	600	-	4,720	6,069	1,349	-
June,	1,295	1,649	354	-	1,074	1,259	185	-	2,369	2,908	539	-
TOTAL,	6,841	8,422	1,581	-	5,931	6,726	795	-	12,772	15,148*	2,376	-

* Including 10,827 emigrants to the United States of America, viz. :—5,001 in the month of April, 4,138 in May, and 1,688 in June. Of 9,817 steerage passengers, 3,148 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 6*d.*, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the second quarter of the year 1912 the average price was 6½*d.*, and in the corresponding quarter of 1903 it was 5½*d.*

The average price of oatmeal (1st quality) in Dublin for the quarter was 16*s.* per cwt. For the corresponding quarter of the year 1912 the average price was 15*s.*, and for the second quarter of 1903 the average price was 15*s.* per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 4*s.* 8*d.* to 5*s.* In the second quarter of 1912 the average prices were 3*s.* 4*d.* to 4*s.* 5*d.*, and the prices for the corresponding quarter of 1903 were 3*s.* 11*d.* to 5*s.* 1*d.*

The average price per cwt. of beef at the Dublin Cattle Market was 49*s.* to 72*s.*

The price (including cartage) of Whitehaven coal in the City of Dublin during the quarter was 24*s.* per ton nett.

The highest price of Consols at the Dublin Stock Exchange for the quarter was 75½ and the lowest 72½.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during last quarter was 5 per cent.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the second quarter of 1913 was 36,760, or 424 below the average for the corresponding period in 1912.

The average weekly number of persons receiving out-door relief during the quarter was 38,496, being 1,859 below the average for the second quarter of 1912.

Of the persons receiving in-door relief during the second quarter of 1913, an average number of 1,640 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1912 the average weekly number was 1,655.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the SECOND QUARTER of the year 1913, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES OF PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM.			
									No. OF PERSONS RELIEVED.			
	BREAD (4lb. Loaf.)		OATMEAL (Corn Exchange), per Cwt. 1st quality.	POTATOES (at Potato Market) per Cwt.		BEEF (at the Dublin Cattle Market), per Cwt.			In-door.	Out-door.		
	(a)	(b)								Ordinary relief.	By means of works devised for the relief of distress.	Total Outdoor.

(a) Messrs. Bolands, Limited.
(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4-lb. loaf delivered; the price in Messrs Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4-lb. loaf lower.
NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the "Dublin Gazette"; and the arrange prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of persons receiving In-door and Out door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the second

* Latitude 53° 21' 48.25" north; longitude 6° 20' 59.15" west. Height above the mean sea level 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

quarter of the years 1908 to 1913, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 14).

The mean height of the barometer during the second quarter of 1913 was 29·911 inches, being 0·084 above the average for the corresponding quarter of the five years 1908–1912; the highest reading (30·461 inches) was on the 28th June, at 9 P.M., wind W., and the lowest (29·046 inches) on the 26th April, at 9 A.M., wind S.E.

The mean temperature of the air during the quarter was 50·2°, being 0·1° below the average for the second quarter of the 5 years, 1908–1912.

The maximum temperature of the air during the quarter was 75·0° and the minimum 28·8°. The maximum heat in sun was 129·9°.

Rain or snow fell on 46 days during the quarter. The rain-fall measured 7·140 inches, being 0·824 inches above the average for the second quarter of the five years, 1908–1912. The greatest monthly rainfall was in May, when 3·005 inches were registered.

The wind blew on 33 days from W., on 10 days from E., on 9 days from S., on 6 days from N.E., on 6 days from S.W., on 5 days from S.E., and the air was calm on 15 days at 9 A.M.

April.—The mean height of the barometer during this month was 29·804 inches; the highest reading (30·371 inches) was on the 5th, at 9 A.M., wind N.E.; and the lowest (29·046 inches) on the 26th, at 9 A.M., wind S.E. The mean temperature of the air was 45·3°, the maximum registered was 59·5°, and the minimum 28·8°. The 30th was the warmest day, and the 2nd the coldest night. The mean of the dry bulb was 45·4°, and of the wet bulb, 43·1°. The maximum heat in the sun was 112·2°, and the minimum on the grass 20·3°. The total amount of sunshine recorded was 137·5 hours, the greatest daily amount being 11·4 hours on the 19th. The minimum on the grass was below 30° on 11 nights. The maximum ozone was 0·8, the minimum 0·0, and the mean 0·6. Rain or snow fell on 16 days. The rain-fall measured 2·750 inches; the greatest amount in 24 hours was 0·840 inch on the 29th.

May.—The mean height of the barometer during this month was 29·873 inches; the highest reading (30·347 inches) was on the 13th, at 9 P.M., air calm., and the lowest (29·186 inches) on the 8th, at 9 A.M., wind E. The mean temperature of the air was 50·3°, the maximum registered was 66·2°, and the minimum 31·0°. The 11th was the warmest day, and the 5th the coldest night. The mean of the dry bulb was 50·3°, and of the wet bulb 47·6°. The maximum heat in sun was 123·3°, and the minimum on the grass 27·0°. The total amount of sunshine recorded was 150·0 hours, the greatest daily amount being 12·7 hours on the 18th. The minimum on the grass was below 30° on 4 nights. The maximum ozone was 0·8, the minimum 0·1, and the mean 0·5. Rain or snow fell on 16 days. The rain-fall measured 3·005 inches; the greatest amount in 24 hours was 0·770 inch on the 5th.

June.—The mean height of the barometer during this month was 30·055 inches, the highest reading (30·461 inches) was on the 28th at 9 P.M., wind W., and the lowest (29·633 inches) on the 9th, at 9 P.M., wind S.W. The mean temperature of the air was 54·9°; the maximum registered was 75·0°, and the minimum 37·0°. The 28th was the warmest day, and the 12th the coldest night. The mean of the dry bulb was 55·5°, and of the wet bulb 52·5°. The maximum heat in sun was 129·9°, and the minimum on the grass 29·7°. The total amount of sunshine recorded was 180·4 hours, the greatest daily amount being 13·0 hours on the 17th and 30th. The minimum on the grass was below 30° on one night. The maximum ozone was 0·7, the minimum 0·0, and the mean 0·4. Rain fell on 14 days. The rain-fall measured 1·385 inches; the greatest amount in 24 hours was 0·300 inch on the 5th.

† Solar Thermometer out of order.

METEOROLOGY.

[*Prepared in the Meteorological Office under the direction of W. N. Shaw, Esq., LL.D., Sc.D., F.R.S.*]

The weather of this quarter was of a very variable character, bright sunshine and temperature being mostly below the average, and rainfall largely in excess. The winds were unusually strong for the season, and often attained the force of a gale, the storms experienced on the west coasts in the latter half of April being of considerable severity.

April was upon the whole dull, cold and wet, and on the 11th and 12th, when a brisk northerly wind prevailed, the thermometer at some of the northern stations failed to rise above 45°. In the earlier half of the month sharp night frosts occurred in various places, the lowest temperatures recorded by thermometers in the shelter of the screen being 29° at Belfast and Dublin (Phoenix Park) on the 1st, and 30° at Birr Castle on the 8th, and at Cahir and Killarney on the 13th. At the close of the third week a decided rise of temperature occurred, and between the 21st and 23rd the shade maxima were above 60° in many places, a reading of 65° being recorded at Waterford on the earliest date. The first half of the month was very dry, many places reporting an entire absence of rain lasting for more than a week, and Ballinacurra a rainless period of 11 days. In the latter half of the month rain was frequent and often heavy, the largest individual falls occurring on the 29th, when 1·0 inch was measured at Kingstown and Mountmellick. On the 25th and 26th many districts were visited by sleet or snow showers; at Cahir the snow on the 25th lay on the ground to a depth of 2 inches. The winds varied considerably in direction, and were often very strong in force, gales from the South-Westward or Westward being experienced rather generally between the 15th and 20th, and gales from the Southward between the 26th and 29th. At Quilty, in West Clare, the anemometer registered, in squalls, an extreme velocity of 61 miles per hour on the 16th, and a velocity of 68 miles per hour on the 26th. Between the 27th and 30th thunderstorms occurred in most districts, and were locally of considerable violence.

May was characterised by a general prevalence of cool showery weather, no material improvement taking place until the closing week, when the thermometer rose to a more seasonable level. The lowest temperatures occurred between the 5th and 7th, and were associated with the advance of strong Easterly and South-Easterly winds, reaching on the 8th a velocity of 55 miles per hour at Quilty. Sharp ground frosts occurred at the time in many parts of the country, and even in the shelter of the screen the thermometer at several stations sank below 35°; locally, at Lisburn and Clongowes Wood it touched 32°. With the warm anticyclonic spell which set in after the 25th the thermometer did not rise to anything like so high a level as in England, but on the 26th or 27th the shade maxima were slightly above 70° in many places, the highest reading recorded being 73° at Killarney on the 27th. A large number of stations experienced at least 23 or 24 days with a measurable quantity of rain and in nearly all districts the total for the month was considerably in excess of the average; at Waterford and Valencia (Cahirciveen) it was more than double the normal quantity. The heaviest falls in 24 hours occurred respectively on the 2nd, when 1·0 inch was measured at Mount Callan and 1·1 inch at Cahirciveen and Valencia Island; on the 5th, when 1·2 inch was recorded at Newcastle, Co. Wicklow; on the 6th or 7th, 1·1 inch at Valencia Island and 1·0 inch at Killarney; on the 29th, 1·4 inch at Valencia Island and Caragh Lake; and on the 30th, 1·4 inch at Cahirciveen and 1·0 at Valencia Island. Thunderstorms occurred very generally on the 1st and locally at many other times in the course of the month.

June was a month of very varied weather conditions. During the first ten days Ireland was under the influence of disturbances situated out on the Atlantic. At first these moved to the North-Eastward on the upper part of the ocean, but later they advanced more directly towards our western coasts. In the earlier days,

therefore, there was not a great deal of wind, though on the 2nd a South-Westerly gale was experienced in Mayo, and a strong gale in Donegal. The 6th brought with it unusually disturbed conditions for the midsummer month, Southerly to Westerly or North-Westerly gales or strong gales being of daily occurrence, culminating on the 10th in a gale which affected the greater portion of the United Kingdom. At Quilty the anemometer registered squalls at the rate of 54 miles an hour on the 9th, and of 50 miles on the 10th. A very quiet period followed. The 23rd was rather breezy over Southern Ireland, and at Quilty a squall of 51 miles per hour was recorded, but on other days there was an absence of high winds. Very cool weather was in the ascendant, the mean temperature for the whole month being 2° below the normal for the country generally, Kilkenny returning a deficiency of $2\frac{1}{2}^{\circ}$, and Roche's Point 3° . Warm days occurred on the 16th and 17th, and the 29th and 30th, when afternoon temperatures of 75° and upwards were recorded, 78° at Killarney on the 16th and 29th, and 80° at Lisburn on the 30th. On the other hand the thermometer did not pass above 52° at Donaghadee on the 8th and 9th, and at Armagh on the 11th. Cold nights, however, were uncommon, but the night of the 11th-12th was very sharp, the shade minimum being as low as 36° at Lisburn, 35° at Markree Castle, and 33° at Castleforbes. The rainfall was unequally distributed; speaking generally there was a deficiency over the lower parts of the country, an excess in the higher districts. Falls of as much as an inch in a day were very rare. On the 9th, 1.1 inch was recorded at Templemore, 1.2 inch at Carrigoran, 1.3 inch at Caragh Lake, and 1.5 inch at Mount Callan; on the 18th 1.9 inch at Armagh; and on the 24th 1.1 inch at Donaghadee. There was a marked deficiency of bright sunshine, the loss at Valencia amounting to more than an hour per day.

The *Mean Temperature* of the quarter was considerably below the normal in all districts, there being few really warm days. Not until the middle and end of June did the thermometer mount to between 75° and 80° , and then only for a couple of days. Frost was experienced in some localities in April and in May, but nowhere was it severe, the lowest shade temperature in both months being registered in Phoenix Park, 29° on the mornings of April 1st and 2nd, and 31° on May 16th. At Castleforbes it dropped to within a degree of the freezing point on June 12th.

The *Rainfall* of the quarter was decidedly above the average, by as much as 3 inches, or 39 per cent., over the northern half of Ireland, and 4 inches, or 51 per cent., over the southern half. Notwithstanding the general excess of precipitation there was a striking absence of any great rainstorms, the heaviest during the three months being 1.7 inch at Caragh Lake on April 15th, and 1.9 inch at Armagh on June 18th. There were only a few other instances of more than an inch. Northern Ireland had 63 rain days, an excess of 11 days, and Southern Ireland 62 rain days, an excess of 15 days.

The duration of *Bright Sunshine* was deficient all round, the loss amounting to about an hour per day, Northern Ireland returning only 82 per cent. of the average, and Southern Ireland 85 per cent. May was the most cloudy month of the quarter, the loss of sunshine being from $1\frac{1}{2}$ to $1\frac{3}{4}$ hours per day.

ABSTRACTS I., II., III., IV.

MARRIAGES Registered during the Quarter ending 31st March, 1913, in PROVINCES, COUNTIES,* and SUPERINTENDENT REGISTRARS' DISTRICTS (or POOR LAW UNIONS) of IRELAND; **BIRTHS AND DEATHS** Registered during the Quarter ending 30th June, 1913; Deaths from ENTERIC FEVER, TYPHUS, SMALL-POX, MEASLES, SCARLET FEVER, WHOOPING-COUGH, DIPHTHERIA, DYSENTERY, TUBERCULOUS DISEASE, CANCER, DIARRHŒA AND ENTERITIS OF CHILDREN under 2 years, DIARRHŒA OF PERSONS aged 2 years and upwards; also VIOLENT DEATHS,† INQUEST CASES, DEATHS IN PUBLIC INSTITUTIONS, and NUMBER of UNCERTIFIED DEATHS Registered during the Quarter ending 30th June, 1913, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS OF IRELAND; with a Return of **VACCINATIONS** for that Quarter.

* Throughout this Return the Unions and Districts have been grouped according to the Administrative Counties as formed under the Local Government (Ireland) Act, 1898.

† Including accidental deaths, homicides, and suicides.

‡ The Return for Hospital District, in Kilmallock Union, not having been received in time for press, the numbers of Births and Deaths registered in the corresponding Quarter of 1913 have been adopted.

ABSTRACT II.—SUPERINTENDENT REGISTRARS' DISTRICTS OR POOR LAW UNIONS, ARRANGED BY PROVINCES AND COUNTIES.*

COUNTIES AND SUPERINTENDENT REGISTRARS' DISTRICTS.	Area in Statute Acres.	Popula- tion in 1911.	Mar- riages.		Deaths.		Deaths from														Inquest Cases.	Deaths in Public Institutions.	Number of Un- certified Deaths.	Number of successful Vaccinations in the Quarter ending 30th June, 1913.
			Registered in the Quarter ending 31st Mar., 1913.	Registered in the Quarter ending 30th June, 1913.	Averages in the Quarters ending 30th June, the 10 years, 1903-1912.	Registered in the Quarter ending 30th June, 1913.	Deaths of		Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Dysentery.	Tuberculous Disease.	Cancer.	Diarrhoea and Enteri- tis of children under 2 years of age.	Diarrhoea, 2 years of age and upwards.	Violence.				
							Infants under 1 year of age.	Persons aged 65 years and up- wards.

(a) See note (*), page 95.

* The Registrars' Districts (829 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same names formed under the Medical Charities Act. The letter W denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

† The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 105 and 106 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 30th March, 1913, to 28th June, 1913. With the exception of 173 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these districts have been assigned to the respective districts comprised in the "Dublin Registration Area" from which the deceased were admitted.

‡ Exclusive of 9 deaths in the Rathdown Union Workhouse of persons admitted from Blackrock and Kingstown, to which Urban Districts they have been assigned.

ABSTRACT III.—REGISTRARS' DISTRICTS, ARRANGED BY COUNTIES (a) AND SUPERINTENDENT REGISTRARS' DISTRICTS—continued.
I. PROVINCE OF LEINSTER—continued.

Registrars' Districts.		Area in Statute Acres.	Popu-lation in 1911.	Deaths.		The Deaths registered during the Quarter are stated by the Registrars to include															Deaths in Public Institutions.	Number of Un-certified Deaths.	Number of successful primary Vaccinations in the Quarter ending 30th June, 1913.			
				Registered in the Quarter ending 30th June, 1913.	Averages in the Quarters ending 30th June in the 10 years, 1903-1912.	Deaths of		Deaths from																		
						Infants under 1 year of age.	Persons aged 65 years and upwards.	Enteric Fever.	Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Dysentery.	Tuberculous Disease.	Cancer.	Diarrhoea and Enteritis of Children under 2 years of age.	Diarrhoea, 2 years of age and upwards.	Violence.

NOTE.—This table has been constructed for the years 1839 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1913.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—All forms of tuberculous disease are prevalent in this district, especially phthisis pulmonalis.

CARLOW; *Bagenalstown*.—District healthy. One death was registered at 90 years of age, and six over 70 years.

CARLOW; *Carlow No. 1*.—The sanitary arrangements are hopelessly inadequate. Whooping-cough was general amongst the children during April and May.

CARLOW; *Fennagh and Myshall*.—Two of the tuberculous cases occurred in children and were acute. The other was chronic, occurring in a man aged 64. One death at 90, and two at over 80 were recorded. The district was free from any epidemic during the quarter.

CARLOW; *Leighlinbridge*.—Health of district fairly good, one case of tuberculous laryngitis died, —disease not contracted here—a boatman. Tuberculosis officer reports my district free from the disease.

NEW ROSS; *St. Mullins*.—Sanitary arrangements good.

Dublin County.

BALROTHERY; *Kilsallaghan*.—District in good sanitary condition and free from infectious diseases. Out of the nine death registered the ages of seven ranged from 70 to 86 years.

CELBRIDGE; *Rathcoole*.—Whooping-cough and measles in the district, in each case confined to one family.

CLONTARF AND HOWTH, No. 1 (*part of*).—The district is in a good sanitary condition.

DUBLIN, SOUTH; *Clondalkin*.—During quarter there were two cases of diphtheria, one case of "spotted fever," and one case of enteric fever.

DUBLIN, SOUTH; *Crumlin*.—The cases of pulmonary tuberculosis were all of old standing. The district has been notably free from the serious forms of infectious disease for the past three months.

DUBLIN, SOUTH; *Tallaght*.—The general condition of the district is fairly good.

RATHDOWN; *Blackrock and Stillorgan, No. 2*.—District healthy during quarter.

Dublin County Borough.

DUBLIN, NORTH; *Clontarf and Howth, No. 1 (part of)*.—There is at present a mild epidemic of whooping-cough in the district.

DUBLIN, NORTH; *North City, No. 2*.—Health of district very good and free from epidemic disease.

DUBLIN SOUTH; *New Kilmainham*.—The sanitary condition of my district is now very good. Pulmonary tuberculosis is very prevalent.

Kildare County.

ATHY; *Monasterevin*.—Influenza prevalent during the quarter. Sanitation good.

BALTINGLASS; *Baltinglass No. 2*.—Influenza prevalent.

CELBRIDGE; *Maynooth*.—There was a severe epidemic of measles during the quarter.

EDENDERRY; *Carbury*.—There were two cases of diphtheria, and one of scarlatina.

NAAS; *Ballymore Eustace*.—District healthy; only one death occurred in the quarter.

NAAS; *Naas and Carragh, W*.—A few cases of diphtheria in the rural portion of the district, there being one death from the disease. The death occurred at Naas Workhouse of a man aged 104 years.

NAAS; *Robertstown and Kilmeage*.—Sanitary condition of district good.

Kilkenny County.

CALLAN; *Callan W.*—Three deaths from tuberculosis and two from carcinoma have been registered during the quarter. District is free from infectious disease.

CALLAN; *Kilmaganny.*—District health, with exception of some cases of measles.

CARRICK-ON-SUIR; *Pilltown.*—Sanitation of district excellent.

CASTLECOMER; *Ballyragget.*—The health of the district is very good.

CASTLECOMER; *Castlecomer W.*—The death of a woman registered this quarter at the remarkable age of 100 years; she lived her whole lifetime in the district.

KILKENNY; *Gowran.*—The sanitary arrangements in the district are good.

KILKENNY; *Tiscoffin.*—The district in healthy condition at present. There was an outbreak of a mild form of measles during April and May; no mortality.

KILKENNY; *Tullaroan.*—Births and deaths over the average. The district is in a healthy condition.

NEW ROSS; *Dysartmoon.*—District healthy.

THOMASTOWN; *Inistioge.*—Two deaths as a result of phthisis were registered during the quarter.

THOMASTOWN; *Knocktopher.*—District in a very healthy condition.

URLINGFORD; *Urlingford W.*—Health of district fairly good. Sanitation of town might with advantage be improved.

King's County.

BIRR; *Birr W.*—The sanitary arrangements are improving owing to the Urban Council insisting on having flush W.C's. attached to each house in the town.

BIRR; *Frankford.*—District healthy.

BIRR; *Killyon.*—District very healthy; the deaths registered being all over 65.

BIRR; *Kinnitty.*—Re the one death from diphtheria—the patient was sent into hospital at once, I having previously inoculated him with anti-diphtheric serum, also I inoculated all members of his family. Only one case; necessary disinfection carried out; district healthy.

MOUNTMELICK; *Clonygowan No. 2.*—Sanitary condition fair. Epidemic of influenza early in the quarter; on the decrease at present.

ROSCREA; *Shinrone.*—Three deaths from pulmonary tuberculosis registered during quarter.

TULLAMORE; *Clara.*—Public health good.

TULLAMORE; *Killoughy.*—The sanitary condition of the district during past quarter was only fair owing to the inclement weather.

TULLAMORE; *Philipstown.*—District healthy.

Longford County.

BALLYMAHON; *Abbeysruble.*—District healthy.

BALLYMAHON; *Ballymahon W.*—The sanitary condition of the district is satisfactory. There was one death registered of a man aged 101 years.

GRANARD; *Ballinalee.*—The district is in good sanitary condition and free from contagious disease.

GRANARD; *Granard W.*—The district is in good sanitary condition and free from contagious disease.

GRANARD; *Scrabby No. 2.*—Health of the district good. Very few cases of illness at present. One death of a young man from pulmonary tuberculosis is recorded, being the second death from this disease within the past two years in same house—referred to last quarter.

LONGFORD; *Killashee.*—No case of tuberculous disease registered during the quarter. District is particularly free from epidemic diseases.

Louth County.

ARDEE; *Castlebellingham.*—District healthy.

ARDEE; *Collon No. 1.*—District healthy.

ARDEE; *Dunleer.*—District healthy.

DUNDALK; *Barronstown.*—Sanitary arrangements good. Measles was prevalent in months of April and May. At present district free from disease.

DUNDALK; *Dundalk W.*—The district is in a healthy condition, except for a few cases of typhoid fever.

Meath County.

ARDEE; *Collon No. 2.*—District in a very healthy state.

ARDEE; *Drumcondra.*—District in a very healthy state. The ages of nine of the persons whose deaths were registered were 98, 81, 80, 79, 78, 74, 73, 73, and 66 years.

DROGHEDA; *St. Mary's.*—The sanitary state of district is good.

DROGHEDA; *Stamullen.*—Health of district good.

DUNSHAUGHLIN; *Killeen.*—District is in a very healthy condition.

EDENDERRY; *Ballyboggan.*—Of the ten persons whose deaths were registered the ages of six were as follow—90, 87, 85, 82, and two at 77 years. There were two cases of tuberculosis and two of bronchitis. The large number of uncertified deaths were consequently aged persons.

KELLS; *Nobber.*—A wave of slight influenza passed over the district during quarter without fatal results. District free from infectious maladies. Fine longevity; the twelve deaths "65 and upwards" range from 68 to 93 years, averaging 78.7 years; a splendid record.

NAVAN; *Painestown.*—The sanitary condition of the district is good. There has been no epidemic of infectious disease during the quarter.

OLDCASTLE; *Oldcastle W.*—District continues in a satisfactory condition.

TRIM; *Innfield.*—Of the eight deaths registered as over 65 years seven were those of females, three of them being registered at 82, 85, and 86 years, respectively. The average age of the eight would be about 77 years.

TRIM; *Summerhill.*—Health of district good.

Queen's County.

ABBEYLEIX; *Ballyroan*.—I registered one death at 106 years.

ABBEYLEIX; *Rathdowney*.—The sanitary arrangements in the district are good.

CARLOW; *Ballickmoyler and Newtown*.—One case of cancer of neck, which was not attended by a doctor, but by an unqualified person.

CARLOW; *Carlow No. 2*.—Whooping-cough was prevalent.

MOUNTMELICK; *Clonaslee*.—The district is at present very healthy.

MOUNTMELICK; *Clonygowan No. 1*.—Sanitary condition fair; influenza prevalent; no epidemic.

ROSCREA; *Borris-in-Ossory*.—The health of this district has been good during the past quarter.

Westmeath County.

ATHLONE; *Glassan*.—The district is in a very sanitary condition.

BALLYMAHON; *Ballymore*.—Sanitary condition of the district good. Four deaths of persons from tuberculosis; three pulmonary, one of whom took the disease from his brother who returned from the U. S. America.

DELVIN; *Clonmellon*.—Public health satisfactory.

GRANARD; *Finnea No. 1*.—District in good sanitary state.

MULLINGAR; *Ballynacarrigy*.—To a cold and wet winter succeeded a wet spring and summer, making on the whole a most unhealthy period.

MULLINGAR; *Castletown Geoghegan*.—The district is in a good sanitary condition.

MULLINGAR; *Killucan*.—The district is generally healthy.

MULLINGAR; *Milltown*.—There was an alarming epidemic of bronchitis all over the district during the quarter, but no deaths. There was one death from pneumonia supervening on tuberculosis of the right lung. No deaths from cancer were registered, and there were four uncertified deaths. Emigration is the very worst evil in the district.

MULLINGAR; *Mullingar W*.—Health of district good.

MULLINGAR; *Multyfarnham*.—Sanitary condition and health of district good.

TULLAMORE; *Kilbeggan*.—Health and sanitary condition of district continues good. Absence of tuberculous disease continues to be a feature of the district. No zymotic disease occurred during quarter.

Wexford County.

ENNISCORTHY; *Killann*.—Some scarlatina.

GOREY; *Camolin*.—District healthy.

GOREY; *Gorey W*.—There has been no epidemic during quarter. At present there are some case of pertussis.

NEW ROSS; *Fethard, No. 1*.—District healthy.

NEW ROSS; *Fethard, No. 2*.—District healthy.

WEXFORD; *Bannow*.—There was a slight outbreak of measles, but it did not spread very much, otherwise the sanitary condition of the district is very good.

WEXFORD; *Bridgetown*.—No deaths from phthisis. A mild type of influenza prevalent in district.

WEXFORD; *Wexford, W*.—A serious outbreak of measles occurred during the quarter, and caused the deaths of a large number of children under 5 years of age. The disease has almost disappeared from the district.

Wicklow County.

BALTINGLASS; *Baltinglass, No. 1, W*.—Influenza prevalent. Also mumps.

BALTINGLASS; *Kiltegan*.—The sanitary conditions of this village are being much improved, and, with a little more personal cleanliness on the part of the poorer inhabitants, would be one of the healthiest villages in Ireland. Some of the people live to a great age.

NAAS; *Blessington*.—The health of the district has been good generally. Sanitary arrangements fair.

RATHDOWN; *Bray, No. 1*.—Births and deaths about the average.

RATHDOWN; *Delgany*.—Health of the district very good.

RATHDRUM; *Annamoe*.—District healthy during quarter.

RATHDRUM; *Aughrim*.—Whooping-cough is very prevalent.

RATHDRUM; *Newcastle*.—General health of district very good.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; *Ballyvaghan, W*.—A good deal of sickness in district during quarter, especially bronchial trouble.

CORROFIN; *Corrofin, W*.—The general health of the district was good, and the mortality low, notwithstanding an unusually severe epidemic of measles which caused three deaths, two being adults.

ENNIS; *Crusheen*.—Measles was prevalent during the whole quarter.

ENNIS; *Newmarket, W*.—The general health of the district is good, but four deaths from pulmonary tuberculosis during the quarter seem to point to its prevalence in this locality.

ENNISTIMON; *Ennistimon, W*.—The sanitary arrangements are satisfactory; the health of the district is good.

ENNISTIMON; *Milltown Malbay*.—The sanitary arrangements are fair. The schools of the town should be improved on.

ENNISTIMON; *Roadford*.—Sanitary arrangements satisfactory. District healthy.

KILLADYSERT; *Ballynacally, W.*—Cases of measles have occurred at different places in the district.

KILLADYSERT; *Labasheeda.*—Health of district continues good.

KILRUSH; *Carrigaholt.*—Except an epidemic of scarlet fever during months of April and May, the health of district is good, and is at present free from all contagious and infectious diseases.

KILRUSH; *Kilkee.*—Sanitary state fair.

KILRUSH; *Kilrush, W.*—Health of district good.

LIMERICK; *Bridgetown.*—District healthy.

LIMERICK; *Coolacasey.*—The sanitary condition of the district is satisfactory. There was one case of carcinoma of uterus registered.

SCARRIFF; *Kilkishen.*—There were some cases of measles during the quarter.

SCARRIFF; *Mountshannon, W.*—District healthy, except measles, but no deaths occurred from same.

Cork County and County Borough.

BANDON; *Innishannon.*—The measles epidemic was the most widely spread I ever saw. District fairly sanitary. Uncertified case died quickly of apoplexy.

BANTRY; *Bantry, W.*—The sanitary condition of district is fairly good.

BANTRY; *Durrus and Kilcrohane.*—The district is free from infectious disease. There is a disposition on the part of a number of occupiers to have manure heaps close to their dwelling-houses.

BANTRY; *Glengarriff.*—Of the three deaths registered during quarter one was of a baby of 6 months, of broncho-pneumonia, another a girl of 24 years of age died of acute pulmonary tuberculosis contracted evidently in Wales, where she lived for a considerable time, returned to the district, and died after a few weeks at home; the third an old woman of 98 years. District is healthy.

BANTRY; *Kealkill.*—District healthy. Sanitary condition good.

CASTLETOWN; *Kilcatherine.*—The deaths of 13 persons over 70 years of age registered during the quarter. No cases of cancer. District now healthy.

CORK; *Blarney.*—Amongst the deaths registered during the quarter was that of a woman whose age was stated to be 105 years. She was a remarkably healthy woman, and retained her faculties until the last moment. The deceased repeatedly stated that when her daughter, who is now 79 years old, was born she was 26 years old. Some cases of measles during the present month—district otherwise healthy.

CORK; *Carrigaline, No. 1.*—District healthy.

CORK; *Dripsey.*—There is a regular epidemic of measles with some cases of scarlet fever. All the schools are closed.

CORK; *Riverstown.*—An epidemic of measles prevailed throughout the quarter, a large number of the patients beings adults.

DUNMANWAY; *Coolmountain.*—The district is in a very healthy condition. A small epidemic of measles occurred of a more or less mild character.

DUNMANWAY; *Dunmanway, W.*—The sanitary condition of the district continues fairly satisfactory. There were two deaths registered as being due to pulmonary tuberculosis, and one to epithelioma.

FERMOY; *Rathcormack.*—Pertussis and measles were prevalent; no deaths. District otherwise healthy.

KANTURK; *Milford.*—District is healthy.

KILMALLOCK; *Charleville.*—The district is very healthy.

KINSALE; *Ballyfeard.*—General health of district fairly good, a few cases of complicated measles treated; also an epidemic of whooping-cough complicated with bronchial catarrh occurred; no deaths.

KINSALE; *Courceys.*—District in a healthy sanitary condition.

MALLOW; *Ballyclogh.*—District healthy.

MALLOW; *Buttevant.*—The district is in a satisfactory sanitary state.

MALLOW; *Rahan.*—Two cases of diphtheria in same family since last report; now there are several cases of measles, otherwise the district is healthy.

MIDDLETON; *Middleton, No. 2.*—During past six weeks an epidemic of measles has prevailed here, of a moderately severe type. A considerable number of adults contracted the disease. Two cases proved fatal from broncho-pneumonia.

MITCHELSTOWN; *Mitchelstown, No. 1, W.*—District healthy.

SKIBBEREEN; *Dromdaleague.*—District healthy.

SKULL; *Skull, W.*—District free from infectious disease. Sanitary arrangements good. Deaths below the average. Believe cancer is far more prevalent in this district than it was thirty or even twenty years ago. Two cases registered this quarter, twenty-three have been registered during the past five years, and 12 during the past two years.

Kerry County.

CAHERSIVEEN; *Caher, W.*—District healthy; sanitation very satisfactory.

CAHERSIVEEN; *Darrynane.*—I have registered during quarter just ended the death of a woman aged 97 years, same being fully authenticated; also one death from carcinoma and one from pulmonary gangrene.

CAHERSIVEEN; *Emlagh.*—Considering the bad weather, the health of the district is very good. No epidemics this year except influenza and mild forms of pneumonia. The residents of the district are getting to understand the value of ventilation.

CAHERSIVEEN; *Glanbehy.*—There were no deaths from cancer in my district for the quarter now ended; one death from tuberculous disease certified. District in a healthy state.

CAHERSIVEEN; *Valencia.*—The sanitary state of the district is good, and no cases of the diseases named in the abstracts have come under my notice.

DINGLE; *Anascaul*.—District healthy.

DINGLE; *Castlegregory*.—Mild type of influenza prevalent during quarter.

DINGLE; *Dingle, W.*—District healthy.

KENMARE; *Kenmare, W.*—District healthy.

KENMARE; *Tuosist*.—Two deaths from pulmonary tuberculosis—one a returned American. All other deaths from senile decay. District in good sanitary condition.

KILLARNEY; *Coom*.—District healthy during past quarter.

KILLARNEY; *Killarney, No. 1, W.*—Measles very prevalent during quarter.

KILLARNEY; *Molahiffe*.—The sanitary arrangements are fairly good. The health of the district is distinctly good.

LISTOWEL; *Ballyhorgan*.—There were a good many cases of bronchitis and catarrhal affections during the quarter, otherwise the district has been in a healthy condition.

LISTOWEL; *Ballylongford*.—District for quarter very healthy, most of deaths occurring from ripe old age. There was one death from consumption. Deceased, however, persisted in refusing to enter a sanatorium when requested in early stages. Everything else satisfactory.

LISTOWELL; *Listowel W.*—District healthy.

TRALEE; *Castleisland*.—Death of one centenarian at 102 years. Verified on inquiry. Thirteen deaths, age over 65 years.

TRALEE; *Castlemaine*.—The health of the district very good.

TRALEE; *Kilgobban*.—An epidemic of measles at present in the district.

TRALEE; *Tralee No. 1, W.*—An epidemic of measles of a very severe type.

imerick County and County Borough.

CROOM; *Castletown*.—Healthy quarter. A few cases of influenza; one case of scarlet fever.

KILMALLOCK; *Bruff*.—The general health of the district is good. There are some cases of whooping-cough.

KILMALLOCK; *Bruree*.—Had a few cases of measles. Otherwise district very healthy.

KILMALLOCK; *Kilfinnane*.—Pertussis very prevalent during quarter, accompanied by bronchopneumonia. Of the uncertified cases the ages respectively were in years 70, 73, 80 and 98, one child aged 2 hours and another 3 weeks, and an epileptic of 53 years, who was subject to the disease for 25 years.

KILMALLOCK; *Kilmallock, W.*—A few mild cases of diphtheria were reported to me. District otherwise healthy.

LIMERICK; *Annacotty*.—Sanitary arrangements good; district very healthy.

LIMERICK; *Caherconlish*.—One death from phthisis (uncertified), but I saw him a few years ago. He was also deaf and dumb. District healthy. Of the eleven deaths, 6 were respectively 84, 89, 87, 80, 80, and 73 years of age.

LIMERICK; *Clarina*.—The district healthy and sanitary.

LIMERICK; *Limerick, No. 3*.—The health of the district has been very good during the past quarter, and the sanitary arrangements, &c., have been satisfactory. Of the 43 deaths returned, 17 were of persons ranging from 87 to 65 years, and there were only 4 deaths of children under one year.

LIMERICK; *Moroe*.—Sanitary condition of district generally good. One death from cancer, two from tubercle.

LISTOWEL; *Glin*.—I regret to say that pulmonary tuberculosis and cancer have been responsible for a great number of the deaths that occurred in the district during the quarter just closed. Pertussis, that prevailed in the district at the commencement of quarter, has now disappeared.

MITCHELSTOWN; *Galbally*.—District exceptionally healthy, but tuberculous disease is becoming very prevalent.

MITCHELSTOWN; *Mitchelstown, No. 2*.—District healthy.

NEWCASTLE; *Ardagh*.—The sanitary state of the district is pretty fair.

NEWCASTLE; *Feenagh*.—The sanitary arrangements are fairly good.

RATHKEALE; *Askeaton*.—During the past quarter there were two cases of scarlatina in the district; there were 5 deaths caused by cancer, pulmonary tuberculosis caused 2 deaths, and 3 deaths were of people aged over 80 years.

RATHKEALE; *Pallaskenry*.—Sanitary arrangements in village of Pallaskenry ought to be improved. Influenza very prevalent during this quarter, which was marked by damp and unhealthy weather.

RATHKEALE; *Rathkeale, No. 1, W.*—Health of district good; no contagious or infectious disease. Sanitation fairly good.

RATHKEALE; *Rathkeale, No. 2*.—With the exception of two cases of scarlatina of a very mild form, my district was in a very healthy condition.

TIPPERARY; *Grean*.—District healthy.

Tipperary County, North Riding.

BORRISOKANE; *Borrisokane, W.*—Of the eleven uncertified deaths, 8 were of old people, 7 over 80 years, and one over 70 years, and two infants, one 28 days, the other 42 days' old. The scarlatina epidemic abated since end of April.

BORRISOKANE; *CloghJordan*.—Three deaths from different forms of tuberculosis were registered. Influenza was prevalent in the district during the quarter.

BORRISOKANE; *Terryglass*.—The district is in good sanitary condition, and free from epidemics of any kind.

NENAGH; *Venagh, W.*—District healthy.

NENAGH; *Newport*.—Whooping-cough prevalent in mountainous part of district. Sanitary condition fair.

NENAGH; *Portroe*.—Slight outbreak of measles; otherwise district healthy.

NENAGH; *Toomyvara*.—Influenza was prevalent in April and May. There was one case of enteric fever.

THURLES; *Thurles, W.*—The number of deaths during the past quarter is considerably above the average.

Tipperary County, South Riding.

CALLAN; *Ballingarry.*—Influenza of a severe type was prevalent during the quarter.

CALLAN; *Mullinahone.*—Sanitary condition of district fairly good; no epidemic or contagious disease prevalent except influenza, severe forms of which were turning up all through the quarter. No death from any form of tuberculous disease; one death from cancer of stomach.

CASHEL; *Killenaule.*—Health of district has been very good during past quarter. No infectious disease.

CASHEL; *Kilpatrick.*—Some whooping-cough cases, reported in March, remained under treatment until the middle of April, when the epidemic disappeared. District otherwise healthy.

CLOGHEEN; *Caher.*—Whooping-cough and measles have been prevalent in the district during the past quarter.

CLOGHEEN; *Clogheen, W.*—An epidemic of measles in the district. No deaths.

CLONMEL; *Kilsheelan, No. 1.*—Influenza prevalent. Three cases of pulmonary tuberculosis treated. Epidemic of measles end of quarter.

TIPPERARY; *Cappagh.*—The district is healthy.

TIPPERARY; *Emly.*—District healthy.

URLINGFORD; *Kilcooly.*—The district is in a sanitary condition, and was very healthy during past quarter.

Waterford County and County Borough.

CARRICK-ON-SUIR; *Rathgormuck.*—With the exception of two cases of measles and a few cases of whooping-cough, the district is otherwise healthy.

CLONMEL; *Kilsheelan, No. 2.*—Some cases of whooping-cough; also of influenza.

DUNGARVAN; *Dungarvan, W.*—District healthy during past quarter.

DUNGARVAN; *Whitechurch.*—District very healthy.

KILMACTHOMAS; *Bunmahon.*—Whooping-cough very prevalent.

LISMORE; *Ballyduff.*—Sanitation and general health of district very satisfactory.

LISMORE; *Tallow.*—Three cases of measles occurred during the quarter. District otherwise healthy.

WATERFORD; *Kilmeadan.*—Health of district very good. No epidemic diseases. Sanitary condition of district good.

WATERFORD; *Woodstown.*—Measles prevalent during the quarter, otherwise the health of the district is good.

YOUGHAL; *Clashmore.*—Two tuberculosis cases, one 5 five weeks home from America.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; *Antrim, W.*—A number of cases of scarlet fever of very mild type.

ANTRIM; *Crumlin.*—The only feature worthy of note this quarter was the large number of cases of acute lobar pneumonia, which, as usual, was very fatal in old people.

ANTRIM; *Doagh.*—The district was free from infectious disease during the quarter.

ANTRIM; *Templepatrick.*—The sanitary arrangements of the district (with few exceptions) are good. Health of the community satisfactory.

BALLYCASTLE; *Ballycastle, W.*—District healthy.

BALLYCASTLE; *Cushendall.*—Sanitary arrangements of the district are very good. No infectious diseases; only one case of tuberculous disease (pulmonary) came here for cure.

BALLYMENA; *Ahoghill.*—Health of district good; at present free from zymotic disease.

BALLYMENA; *Ballymena, W.*—Public health satisfactory.

BALLYMENA; *Broughshane.*—The district is very healthy.

BALLYMENA; *Clogh.*—During past quarter the district has been fairly healthy, only for an outbreak of whooping-cough, from which four deaths are reported.

BALLYMENA; *Galgorm.*—Diseases of the respiratory organs were prevalent during the quarter.

BALLYMENA; *Glenwhirry.*—District healthy; no infectious fevers during quarter.

BALLYMENA; *Portglenone.*—Health of the district is good.

BALLYMENA; *Toome.*—Health of the district good.

BALLYMONEY; *Dirraw.*—Sanitary arrangements satisfactory. Thirty deaths registered in quarter, twenty-one of these over 65 years of age and eighteen of them over 70 years.

BELFAST; *Belfast Rural No. 4.*—The health of the district has been exceptionally good for the quarter. The sanitary arrangements are well abreast of the times for a rural district.

LARNE; *Waterfoot.*—Sanitary arrangements excellent.

LISBURN; *Dunmurry.*—District on the whole healthy, and at present free from epidemic disease; a widespread epidemic of measles prevailed during the first part of the quarter, which, however, was of a mild nature. Influenza also was very prevalent.

Armagh County.

ARMAGH; *Blackwatertown.*—The district is free from any epidemic.

ARMAGH; *Markethill.*—The district has been very healthy during the past quarter.

ARMAGH; *Rich Hill.*—District very healthy.

ARMAGH; *Tynan.*—The health of the district during the past quarter highly satisfactory.

LURGAN; *Lurgan No. 2*.—The district is in a good healthy condition. Whooping-cough is prevalent in the district.

NEWRY; *Mullaghglass*.—District healthy, except for an epidemic of measles which extended over the whole of my district since the commencement of the year, and which is now abating for want of material, as a great many children were affected; one case of scarlatina; patient sent to hospital.

Belfast County Borough.

BELFAST; *Belfast Urban No. 4 W*.—One death from cerebro-spinal fever.

BELFAST; *Belfast Urban No. 5*.—No outbreak of any infectious diseases.

BELFAST; *Belfast Urban No. 11*.—The health of the district during the quarter has been good. There has been a number of cases of scarlatina.

Cavan County.

BAILIEBOROUGH; *Bailieborough W*.—There have been some cases of whooping-cough amongst the children, otherwise the district is healthy.

BAWNBOY; *Swanlinbar*.—Scabies, being universal in this district, has retarded primary vaccinations.

CAVAN; *Belturbet*.—Sanitary arrangements in urban area open to improvement. Health of urban and rural areas very good; no epidemic in district. Two cases of cancer registered during quarter.

CAVAN; *Killashandra*.—One death from pulmonary tuberculosis and one from carcinoma of liver registered during the quarter; one from rupture of bladder caused by a bicycle accident.

CAVAN; *Stradone*.—Scarlet fever and whooping-cough prevalent in district.

COOTEHILL; *Tullyvin*.—District healthy and in fairly good sanitary condition.

ENNISKILLEN; *Dowra*.—The district has been fairly healthy during the quarter. Four cases of typhoid fever occurred, all belonging to same family, with one death.

ENNISKILLEN; *Holywell No. 2*.—The sanitary arrangements in the district are fairly good.

GRANARD; *Finnea No. 2*.—The district is in a good sanitary condition.

GRANARD; *Scrabby No. 1*.—Health of the district good. Two deaths from pulmonary tuberculosis, one being a young married woman; the other a young man, a school teacher, who appears to have contracted the disease after an attack of croupous pneumonia.

OLDCASTLE; *Ballyjamesduff*.—District healthy.

OLDCASTLE; *Virginia*.—District healthy.

Donegal County.

BALLYSHANNON; *Ballintra*.—Sanitary arrangements fairly good.

DONEGAL; *Donegal W*.—District healthy.

DONEGAL; *Dunkineely*.—District generally healthy; free from epidemic diseases.

DONEGAL; *Laghy*.—District healthy.

DONEGAL; *Mountcharles*.—District very healthy during the last month of the quarter.

DONEGAL; *Pettigoe*.—The district has been healthy during the quarter.

DUNFANAGHY; *Dunfanaghy W*.—Epidemic of measles.

GLENTIES; *Ardara*.—District healthy.

GLENTIES; *Carrick*.—Influenza and pneumonia were very prevalent during the quarter.

GLENTIES; *Doocharry*.—District healthy.

GLENTIES; *Dunglow No. 2*.—There were two burning fatalities during the quarter, resulting in the deaths of two children aged 2½ years and 7 years. There was no inquest held in either case. Bronchitis following measles was very prevalent during the quarter and very fatal to young children. The number of deaths of old people and of children was high; of those in the prime of life comparatively low.

INISHOWEN; *Buncrana*.—District healthy.

INISHOWEN; *Clonmany*.—No epidemic during the quarter.

INISHOWEN; *Malin*.—District healthy.

INISHOWEN; *Moville*.—District healthy.

LETTERKENNY; *Church Hill*.—District healthy. In a part of the district there has been an outbreak of measles of a mild type, and for so far no deaths from this disease have occurred.

LETTERKENNY; *Manorcunningham*.—There were a few cases of measles in the district during the quarter; otherwise it is in fair sanitary condition.

LONDONDERRY; *Burt*.—Measles prevalent. No fatalities.

MILLFORD; *Fanad*.—One death registered at 100 years of age. District healthy; no epidemic during quarter.

MILLFORD; *Rathmullan*.—The death rate for the quarter is very low. District has been healthy.

MILLFORD; *Rosguill*.—Influenza prevalent during the quarter, resulting in two deaths. Whooping-cough also prevalent, causing one death. Two cases of pulmonary tuberculosis registered during quarter.

STRABANE; *Raphoe*.—Sanitary arrangements satisfactory. General health of district good; no epidemics.

STRANORLAR; *Cloghan*.—Sanitary arrangements satisfactory.

STRANORLAR; *Killygordon*.—The months of April and May shewed a continuance of the severe epidemic of influenza prevalent since March, which in many cases culminated in bronchopneumonia. The sanitary conditions are very good.

Down County.

BANBRIDGE; *Ballyward*.—Sanitary arrangements satisfactory. Several cases of measles of a mild type in district.

DOWNPATRICK; *Ballynahinch*.—There have been a few cases of measles and one or two cases of scarlet fever in the district during the quarter.

DOWNPATRICK; *Clough*.—Some cases of scarlatina during the quarter, but no fatal case.

DOWNPATRICK; *Killyleagh*.—The public health has been good, and the death-rate low. Sanitary arrangements fair. There has been an epidemic of measles. No death from the disease registered.

KILKEEL; *Kilkeel No. 2 W.*—One of the phthisical cases was a case of miner's phthisis contracted in S. Africa.

KILKEEL; *Rosstrevor*.—Sanitary arrangements of district quite satisfactory. Health has been remarkably good. No epidemics or infectious diseases of any kind.

LISBURN; *Annahilt*.—There is no infectious disease in district, and the sanitary condition of district is good.

LISBURN; *Ballylesson*.—There has been a sharp outbreak of measles in the district, which has not, however, affected the death-rate.

LISBURN; *Drumbeg*.—An outbreak of scarlatina occurred during the quarter, and one case of enteric fever was reported.

LISBURN; *Hillsborough*.—A severe epidemic of measles in one end of district occurred during the quarter. One case of enteric fever.

LISBURN; *Saintfield*.—Influenza of gastric type very prevalent this quarter. An epidemic of measles still going on, about 40 or more cases in this district; but so far no deaths.

LURGAN; *Waringstown*.—District is healthy. No infectious disease was reported from April 4th till June 20th, when a case of erysipelas occurred.

NEWRY; *Rathfryland*.—The sanitary condition of this district is good.

NEWTOWNARDS; *Bangor*.—Sanitary arrangements good. Public health good.

NEWTOWNARDS; *Comber*.—There is a very widespread epidemic of measles, some of a severe type, and of chicken-pox as well. Otherwise the district is free from epidemics. We had three cases of scarlatina, all from one family, and got from a visitor from Belfast.

NEWTOWNARDS; *Donaghadee*.—Mumps with orchitis very prevalent.

NEWTOWNARDS; *Kilmood*.—A very severe epidemic of measles during the quarter throughout the entire district, necessitating the closing of the schools for one month.

NEWTOWNARDS; *Newtownards W.*—We have had no epidemic, and the health of the district has been good.

Fermanagh County.

BALLYSHANNON; *Church Hill*.—District healthy.

ENNISKILLEN; *Enniskillen W.*—Health of district satisfactory.

ENNISKILLEN; *Florencecourt*.—District free from any infectious disease. Pneumonia prevalent during quarter.

ENNISKILLEN; *Holywell No. 1*.—The sanitary arrangements of the district are fairly good.

ENNISKILLEN; *Lisbellaw*.—Sanitary arrangements good. No infectious cases.

IRVINESTOWN; *Clonelly*.—The sanitary condition of the district very good. No epidemic of any kind.

IRVINESTOWN; *Ederney*.—Acute bronchitis and pneumonia prevalent in April and May.

IRVINESTOWN; *Irvinestown W.*—Two cases of pulmonary tuberculosis registered during quarter. One died in Workhouse Infirmary; family history not known. The second is one of a family, several of whom have died from the disease, which was introduced by another member who contracted disease in another locality and returned to die.

LISNASKEA; *Derrylin*.—Little disease and few deaths during the quarter.

LISNASKEA; *Lisnaskea W.*—Sanitary state of district fair. No infectious disease prevalent during quarter.

Londonderry County and County Borough.

COLERAINE; *Aghadowney*.—District healthy; three cases of death from bottle-fed children, one of them twins, and also one death from whooping-cough. Birth-rate more than double death-rate.

COLERAINE; *Garvagh*.—A severe epidemic of measles continued from end of last quarter through the first two months of present quarter, causing one death. Otherwise district very healthy.

COLERAINE; *Kilrea*.—District healthy.

COLERAINE; *Portstewart*.—The general health of the district has been satisfactory for the past quarter.

LIMAVADY; *Bellarena*.—District free from infectious disease.

LIMAVADY; *Limavady W.*—Health of district good. No infectious disease.

LONDONDERRY; *Eglinton*.—Measles very prevalent during past month.

LONDONDERRY; *Londonderry Urban No. 1*.—One death from influenza. One death from septic infection at child-birth.

MAGHERAFELT; *Maghera*.—No deaths from contagious diseases.

MAGHERAFELT; *Moneymore*.—Sanitary state of district satisfactory. District free from infectious disease during quarter, except a few cases of measles with no deaths; and some cases of influenza. There have been a good many deaths of old people. In birth-rate males exactly doubled females.

Monaghan County.

CARRICKMACROSS; *Carrickmacross W.*—Epidemic of measles during the quarter. District otherwise healthy.

CARRICKMACROSS; *Donaghmoyne*.—Measles reported to be in a few houses in the district.

CARRICKMACROSS; *Raferagh*.—The improvement in the sanitary arrangements of the houses still continues.

CASTLEBLAYNEY; *Ballybay*.—Two cases of typhoid fever were attended in June.

CASTLEBLAYNEY; *Castleblayney W.*—More than 60 per cent. of the deaths registered during the quarter were of persons whose age exceeded 64 years. Of these, 4 were stated to have attained the age of 80 and one of 95 years. One death from tuberculosis and three from cancer were registered.

COOTEHILL; *Dawsongrove.*—The sanitary condition of the district is fair.

COOTEHILL; *Drum No. 1.*—There are several cases of measles in this district at present.

MONAGHAN; *Castleshane.*—District sanitary and no epidemics present for past quarter.

MONAGHAN; *Emyvale.*—Health of district very good. An epidemic of measles existing for some weeks.

MONAGHAN; *Kilmore.*—Measles in the district with two deaths, and influenza with four deaths registered.

Tyrone County.

CASTLEDERG; *Castlederg, W.*—Sanitary state of district satisfactory at present. Epidemic of measles of a mild type very prevalent

CASTLEDERG; *Drumquin.*—The sanitary arrangements in the district are satisfactory. There has been none of the diseases named in the abstracts during the quarter.

CASTLEDERG; *Killeter.*—State of district healthy. The deaths are nearly all of old persons—one death registered at 101 years.

CLOGHER; *Aughnacloy.*—District generally healthy.

CLOGHER; *Fivemiletown.*—The health of the district was pretty good during the quarter.

COOKSTOWN; *Pomeroy.*—The health of the district is very good. Tuberculosis is prevalent enough, although it scarcely figures in the deaths return.

COOKSTOWN; *Stewartstown.*—Of the deaths registered during the quarter, six were between 70 and 80, seven between 80 and 90, and two between 90 years and 100. District at present very healthy.

DUNGANNON; *Benburb.*—Health and sanitary condition of district good.

DUNGANNON; *Caledon and Ballymagran.*—Health of district good.

DUNGANNON; *Clonavaddy.*—Sanitary arrangements very good. No infectious diseases.

DUNGANNON; *Coal Island.*—Influenza followed by pulmonary complications very prevalent all through district.

IRVINESTOWN; *Trillick.*—District healthy.

OMAGH; *Drumquin.*—The sanitary condition of the district keeps fair. There was one case of scarlet fever during the quarter.

OMAGH; *Fintona.*—The health of the district good during the past quarter, and, with the exception of a couple of cases of mild scarlatina, free from epidemic disease. The sanitary arrangements are satisfactory.

OMAGH; *Omagh, No. 1, W.*—Health of district good. Sanitary conditions of urban district fair, of rural district unsatisfactory.

OMAGH; *Omagh, No. 2.*—District healthy.

OMAGH; *Sixmilecross.*—The district is in very good sanitary condition at present; we have had no infectious disease of any kind during the quarter. There seems to be an improvement in the cleanliness of labourers' cottages.

STRABANE; *Newtownstewart.*—No infectious diseases. Sanitary arrangements fair.

IV. PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; *Kiltormer.*—District very healthy.

CLIFDEN; *Roundstone, No. 1.*—A few cases of measles appeared during the quarter. District now healthy.

CLIFDEN; *Roundstone, No. 2.*—Health of the district satisfactory.

GALWAY; *Galway, No. 3 (Arran).*—Health of district apparently very good.

GALWAY; *Moycullen.*—The death-rate exceeds the birth-rate this quarter. There were four deaths registered at over 80 years.

GALWAY; *Oranmore.*—District continues healthy.

GALWAY; *Spiddle.*—Some cases of scarlet fever not yet registered. District otherwise continues healthy.

GALWAY; *Turloughmore.*—District healthy.

GORT; *Gort, W.*—The health of the district has been good.

GORT; *Kinvarra.*—There was an epidemic of measles during the quarter, and some cases are still occurring; one death from measles was registered, and is included in the return. The child was not medically attended. No other death from the disease occurred.

LOUGHREA; *Bullaun.*—The ages of those comprising seven uncertified deaths were 70, 73, 74, 75, 80, 84 and 93 years.

MOUNT BELLEW; *Mount Bellew, W.*—Sanitary condition of the district fair.

OUGHTERARD; *Cloonbur, No. 1.*—Health of district good; no zymotic.

PORTUMNA; *Portumna, No. 1, W.*—Sanitary condition of district fairly good.

TUAM; *Tuam, No. 1, W.*—District healthy during quarter. There were some cases of mumps.

Leitrim County.

BAWNBOY; *Ballinamore.*—Sanitary state of district good.

CARRICK-ON-SHANNON; *Drumshanbo.*—District healthy and in good sanitary condition.

MOHILL; *Carrigallen.*—The health and sanitary condition of the district have been good during the quarter.

MOHILL; *Mohill, W.*—There were three deaths from enteric fever during the quarter, and six cases still in hospital according to the Medical Officer's report. The sanitary arrangements of part of the district are not good.

MOHILL; *Rinn.*—There were some cases of scarlet fever and typhoid fever, but through prompt removal to hospital and disinfecting the dwellings the epidemic has been got under.

MOHILL; *Rowan.*—District free from disease.

Mayo County.

BALLINA; Ballina, W.—An outbreak of typhus fever has been reported in the district during the latter part of the quarter; three deaths have been registered. A death is recorded of a person aged 101 years; the age appears to be well authenticated. I have received only one vaccination certificate during the quarter; there are many defaulters.

BALLINA; Crossmolina.—District free from any case of infectious disease during quarter, and continues in fair sanitary condition. One death at 103 years registered.

BALLINROBE; Ballinrobe, W.—No epidemic occurred during the quarter. The health of the district is satisfactory.

BALLINROBE; Cappaghduff.—Sanitary arrangements good. No infectious diseases. Three deaths registered over 80 and one at 100 years.

BALLINROBE; Cong.—Health of district good.

BALLINROBE; Hollymount.—Births a little over and deaths about the average. The general health of the people of this district during the quarter was good.

BELMULLET; Binghamstown, W.—District in a satisfactory state.

BELMULLET; Knocknadower.—District in good sanitary condition. No contagious disease present.

CASTLEBAR; Balla.—District healthy.

CASTLEBAR; Castlebar, No. 1, W.—Health of district good.

CLAREMORRIS; Ballindine.—District healthy. One death registered at 94 years.

CLAREMORRIS; Ballyhaunis.—Health of district good. No zymotics. Two cases of cancer, one of stomach and one of hand and arm. Sanitation progressive, especially in regard to the dwellings and environment.

CLAREMORRIS; Claremorris, W.—There have been no cases of infectious disease during quarter.

KILLALA; Killala, W.—The sanitary arrangements in the district have not improved. Pigs and cattle are still housed in many of the dwellings. Two of the school children in the Workhouse developed scarlatina, and were transferred to the fever hospital. One child suffering from diphtheria was admitted to hospital, and died on the day after admission.

SWINEFORD; Foxford.—An outbreak of mumps occurred during the quarter.

SWINEFORD; Swineford, W.—There were no epidemics during past quarter. There were seven deaths registered from various form of tuberculous disease.

WESTPORT; Achill.—Sanitary state and general health good; there has been an epidemic of influenza for the past month, but up to this there has been no death from it.

WESTPORT; Ballycroy.—Whooping-cough has been prevalent.

WESTPORT; Islandeady.—The sanitary arrangements of district good.

WESTPORT; Louisburgh.—General health of the district fair during quarter. A large number of cases of mumps occurred during same period. One death registered of an old man aged 84 years.

WESTPORT; Newport.—General health of district very good during quarter save for a slight outbreak of scarlatina, which was of a mild type. Sanitation progressing. No deaths from phthisis registered this quarter.

Roscommon County.

ATHLONE; Brideswell.—District healthy.

ATHLONE; Kiltoom.—The sanitary condition of district satisfactory.

BOYLE; Boyle, No. 1, W.—The case of typhus returned did not belong to this district. He died in the Union Hospital. Whooping-cough was prevalent during past quarter.

CARRICK-ON-SHANNON; Aughrim.—There was one death from pulmonary tuberculosis, and none from cancer.

CASTLEREAGH; Ballaghaderreen.—During the end of last month some cases of scarlet fever were present in the district, but as far as I know there has been no death from it, and the disease does not appear to be spreading.

CASTLEREAGH; Castlereagh, W.—Sanitary condition of district improving.

CASTLEREAGH; Loughglinn.—Prevailing wetness was responsible for a large lot of complaints among the aged, and caused a lot of pulmonary complaints. The west wind was unfavourable. There was no death from cancer.

STROKESTOWN; Roosky.—One death was registered from tuberculosis of lungs, one from meningitis, and three from cancer. The death of one woman is registered at the advanced age of 95 years and of one man at 98 years.

STROKESTOWN; Strokestown, W.—No case of infectious disease during the quarter.

Sligo County.

BOYLE; Gurteen.—District healthy. Sanitary arrangements improving.

DROMORE WEST; Easky, W.—Health of district good, with the exception of a small outbreak of diphtheria and one case of enteric fever.

DROMORE WEST; Skreen.—The sanitation of the district is good. No epidemic during the quarter.

SLIGO; Carney, No. 1.—Sanitary condition of district good.

SLIGO; Carney, No. 2.—The sanitary arrangements in the district are fair. There was no prevalence of any infectious disease.

SLIGO; Riverstown.—District healthy.

TOBERCERRY; Aclare.—Sanitary conditions improving. One case of scarlet fever, which was imported into the district; two cases of pulmonary phthisis.

TOBERCERRY; Coolaney.—Sanitation excellent.

TOBERCERRY; Tobercerry, W.—The sanitary condition of the district generally is good. One family of four suffered from scarlatina, and there was one isolated case of typhoid fever.

1913.]
3rd Quarter.

Price One Shilling.

Marriages:—APRIL, MAY, JUNE, 1913.

Births and Deaths:—JULY, AUGUST, SEPTEMBER, 1913.

During the quarter ended 30th September last, there were registered in the 831 Registrars' Districts in Ireland 24,709 births—a number equal to an annual birth-rate of 22·6 in every 1,000 of the estimated population*—and 16,396 deaths, representing an annual rate of 15·0 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 7,537 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 24·4 in every 1,000 of the estimated population, and the death-rate 12·3 per 1,000.

The birth-rate in Ireland for the quarter is 0·4 below the average rate for the corresponding quarter of the ten years, 1903–1912, but 0·2 above the rate for the third quarter of 1912. The deaths are 1,475 above those registered in the corresponding quarter of 1912; the death-rate is 1·4 above the rate for that quarter, and 0·7 above the average for the third quarter of the ten years, 1903–1912.

In comparison with those for the corresponding quarter of 1912, the returns of pauperism furnished by the Local Government Board show a decrease of 1,320 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 1,836 in the average number of persons on out-door relief.

Compared with the averages for the third quarter of the ten years, 1903–1912, the number of Workhouse inmates shows a decrease of 6,071, and the number of persons on out-door relief shows a decrease of 14,532, the total under both heads being 22·3 per cent. under the average for the third quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 0·3 per cent.

* See page 214.

The annual marriage-rate (5·1 per 1,000 of the population) represented by the marriages registered during the second quarter of 1913, is 0·3 above the average rate for the corresponding quarter of the preceding ten years.

MARRIAGES.

The Marriages (5,609) registered in Ireland during the second quarter of 1913 are equivalent to an annual rate of 5·1 per 1,000 of the estimated population, being equal to the rate for the corresponding quarter of 1912, and 0·3 above the average rate for the second quarter of the ten years 1903–1912. Of the total number of marriages, 4,137 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,472 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 5·1 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 5·2 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·7 above, and that under the latter heading 0·8 below the average rate for the corresponding quarter of the previous ten years.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the eleven years 1903–1912, and the average number for that period; also the number registered in the first and second quarters of 1913.

BIRTHS.

The number of births registered during the quarter ended 30th September last was 24,709—12,646 boys and 12,063 girls—being equal to an annual ratio of 1 in every 44.3, or 22.6 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years, 1903–12, was 25,301, equivalent to an annual rate of 23.0 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 23.1 per 1,000 of the population according to the Census of 1911; Munster, 21.9; Ulster, 23.0; and Connaught, 21.0.

The highest county or county borough birth-rate* is 30.7 for Dublin county borough, and the lowest 17.5 for Dublin county and Monaghan county respectively. Of the intermediate rates the highest five are—Belfast county borough, 28.2; Limerick county and county borough, 25.0; Carlow, 23.5; Waterford county and county borough, 23.2; and Antrim, 22.9. The lowest five are—Clare county, 17.6; Leitrim, 18.7; Wicklow, 19.0; Longford, 19.0; and Tipperary N.R., 19.1.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th September last was 16,396—8,307 males and 8,089 females—affording an annual ratio of 1 in every 66.8, or 15.0 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1903–12, was 14.3 per 1,000.

The death-rate in Leinster was 16.4 per 1,000 of the population according to the Census of 1911; in Munster, 14.3; in Ulster, 15.2; and in Connaught, 12.6.

The county or county borough death-rates* range from 10.5 in Leitrim to 21.1 in Dublin county borough. Between these rates the lowest five are—Clare, 11.2; Tipperary N.R., 11.4; Kerry, 11.7; Mayo, 11.7; and Donegal, 12.5; and the highest five are—Belfast county borough, 17.9; Waterford county and county borough, 17.5; Louth, 16.7; Carlow, 16.4; and Armagh, 16.0.

* See note (*) on page 152.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years 1903–1912, and the average number for that period; also the number registered during the first, second and third quarters of the year 1913:—

AGES.—Of the 16,396 deaths registered last quarter, 2,405, or 14.7 per cent., were of infants under one year of age; and 6,147, or 37.5 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 97.3 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under one year old equalled 16.1 per cent. of the total deaths registered therein; in Munster, 14.0 per cent.; in Ulster, 15.7 per cent.; and in Connaught, 9.3 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 34.0 per cent.; in Munster, to 38.3 per cent.; in Ulster, to 35.6 per cent.; and in Connaught, to 50.4 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

DISEASES.—The total number of deaths from the principal epidemic diseases* is 1,648, and is equivalent to an annual rate of 1.50 per 1,000 living.

The following tabular statement shows the mortality from some of the principal epidemic diseases, as registered during the September quarter of 1913, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years, 1908–1912.

Name of Disease.	Number of Deaths in Sept., quarter, 1913.	Average number of Deaths in Sept., quarter of the 5 years, 1908–1912.
Enteric Fever,	64	68
Typhus,	13	7
Small-pox,	—	—
Measles,	211	113
Scarlet Fever,	71	43
Whooping-cough,	122	194
Diphtheria,	57	76

* See note (†) on page 159.

ENTERIC FEVER.—During the quarter the deaths from this disease numbered 64, as against 53, 80 and 46 respectively in the three preceding quarters, and an average of 68 deaths for the third quarter of the five years, 1908-1912.

Of the 64 deaths, 5 occurred in the union of Dublin North, 8 in Dublin South, 6 in Limerick, 7 in Lisburn*, 3 in Belfast, 3 in Londonderry, 3 in Omagh, and 2 each in Ballina, Carrick-on-Shannon, Castleblayney, Millford, and Newcastle unions.

TYPHUS.—There were 13 deaths from typhus recorded, the numbers for the three preceding quarters being 6, 17, and 12 respectively, and the average for the third quarter, 7. The 13 deaths during the quarter were distributed as follows:—Cork union, 3 deaths; Dublin North union, 3 deaths; Carrick-on-Shannon, 2 deaths; Castlebar union, 2 deaths; and Ballina, Boyle, and Lisburn,* one death in each.

SMALL-POX.—No death from this disease was recorded.

MEASLES.—The deaths from measles registered during the quarter amounted to 211, a number which is equivalent to an annual rate of 0·19 per 1,000 of the population. Of these deaths, 32 occurred in the province of Leinster, 110 in Munster, 49 in Ulster, and 20 in Connaught. Five or more deaths were referred to the following unions or superintendent registrars' districts:—Carrick-on-Suir (35 deaths), Waterford (26), Galway (20), Londonderry (16), Carlow (10), Mallow (9), Newry (7), Kilrush (6), Tralee (6), Clones (5), Croom (5), Dublin, South (5), and Killarney (5).

In the fourth quarter of 1912 deaths from measles were 413, in the first quarter of 1913 they numbered 329, and in the second quarter 243, the number in the third quarter of the present year, as before observed, being 211, as against an average of 113 for the third quarter of the five years, 1908-1912.

SCARLET FEVER.—Deaths from scarlet fever, which in the three preceding quarters amounted to 85, 66, and 69 respectively, numbered 71 in the period under notice, or 28 above the average (43) for the corresponding period of the preceding five years. In Lisburn* union there were 18 deaths recorded; in Belfast, 14; in Dublin, North, 6; and in Kilrush, 5 deaths.

WHOOPING-COUGH.—Deaths from this disease, which in the three preceding quarters numbered 125, 173 and 158 respectively, fell to 122 (affording an annual rate of 0·11 per 1,000 of the population) in the period under notice, the average for the corresponding quarter of the preceding five years being 194.

Twenty-nine deaths were registered in Galway union, 11 in Belfast, 9 in Dublin South, 7 in Rathdrum, and 5 each in Dublin North and Lisburn unions.

DIPHTHERIA.—The number of deaths from diphtheria was 57, the numbers for the three preceding quarters being 82, 96, and 55, respectively, and the average for the third quarter of the five preceding years, 76.

Eleven of the 57 deaths were registered in Dublin South union, 10 in Lisburn,* 3 in Belfast union, and 3 in Naas.

DIARRHOEAL DISEASES.—Under the heading, deaths from diarrhoea and enteritis of children under 2 years of age, 985 deaths were recorded for the quarter, being equivalent to an annual rate of 0·90 per 1,000 of the population of Ireland estimated to the middle of the year. In Belfast union 304 (or 32 per cent. of the total deaths from diarrhoea and enteritis of children under 2 years of age in Ireland), occurred; 164 in the union of Dublin

* See note (*) page 201.

South, 108 in Dublin North—the number of deaths (272) for the unions of Dublin North and South combined being 28 per cent. of the total of such deaths in the whole of Ireland. There were 90 deaths in the union of Cork, 37 in Londonderry, 33 in Waterford, 21 in Lurgan, and 12 each in Dundalk, Lisburn, and Newtownards.

TUBERCULOUS DISEASE.—The number of deaths from this disease during the quarter, as returned by the Registrars, was 2,057, affording an annual rate of 1·88 per 1,000 of the population. In the third quarter of the five years 1908–12, the average number was 2,231, the number in the corresponding quarter of 1912 being 2,007.

The following observations on the presence of tuberculous disease or conditions affecting the public health have been extracted from the notes furnished by the Registrars which appear at the end of this Report :—

Mullingar ; Ballynacarrigy.—The number of deaths registered during quarter is below average, but excluding deaths of persons aged 65 and upwards, over 60 per cent. of remaining deaths are attributed to tuberculosis.

Dunmanway ; Dunmanway.—There were two deaths registered as being due to pulmonary tuberculosis. In one the disease was contracted in America.

Listowel ; Ballylongford.—There was one death from consumption ; parents, however, made no attempt to have the case sent for treatment. Nevertheless, this disease is very much checked compared with twenty or thirty years ago, thanks to new remedies.

Downpatrick ; Killyleagh.—The public health is good, though the number of deaths due to tuberculous disease is increased.

Castlederg ; Castlederg.—Pulmonary tuberculosis still very prevalent in the district ; complete isolation and better house accommodation the best preventatives.

Claremorris ; Ballyhaunis.—Sanitation conspicuously improved.

Claremorris ; Claremorris.—Of the seven deaths from tuberculosis, one came from America dying of the disease, two died in the union hospital and did not belong to this district, one was a tramp from Glennamaddy, and one from Ballindine.

Killala ; Killala.—Different forms of tuberculous disease are prevalent.

Westport ; Achill.—Scabies is common, being imported by the workers returning home from England and Scotland.

Carrick-on-Shannon ; Aughrim.—The number of persons suffering from tuberculous disease in any form is at present smaller than it has been for several years.

Newtownards ; Newtownards.—During August and September there has been a good deal of zymotic enteritis. The weather was dry and flies numerous. Poor people, as a rule, have no proper place to store food and milk. I hope in time to see at the back of every poor man's house a fly-proof safe. I hope also to see more attention given to domestic scavenging, and I also sincerely hope that when the sanitary authority feels confident that a sufficient supply of water is available it will insist on water closets being substituted for the existing dirty privies. The days of epidemic enteritis will then be past.

CANCER.—There were 924 deaths returned under this heading, being equivalent to an annual rate of 0·84 per 1,000 of the estimated population. In the three preceding quarters the corresponding rates were 0·79, 0·79, and 0·77 respectively.

VIOLENCE.—Under this heading 227 deaths were returned as being due to either accident, negligence, homicide or suicide.

The Registrars, in their Notes, report the presence of the following diseases:—Measles in 41 districts, scarlet fever in 31, whooping-cough in 20, diphtheria in 15, enteric fever in 13, influenza in 5, mumps in 3, and typhus in 2. [See Appendix to this Report commencing on page 215.]

INQUESTS.—There were 457 inquests reported to the Registrars during the quarter; this number being equal to 1 in every 36 of the total deaths registered.

In Leinster there was 1 inquest to every 35 deaths registered, in Munster 1 to 40, in Ulster 1 to 31, and in Connaught 1 to 57.

DEATHS IN PUBLIC INSTITUTIONS.—Of the 16,396 deaths registered, 3,504, or 21·4 per cent., occurred in public institutions. In Leinster the percentage was 29·2, in Munster 25·7, in Ulster 15·4, and in Connaught 12·5.

UNCERTIFIED DEATHS.—According to the returns, 3,465 of the 16,396 deaths which were registered during the quarter were uncertified, being 21 per cent. of the total. In Leinster the percentage was 15, in Munster 23, in Ulster 16, and in Connaught the uncertified deaths were 47 per cent. of the total deaths registered in the province.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 30th September, 1913, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population:—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.										Percentage of Total Deaths.	Number in every 100,000 of the Population.

TABLE.

URBAN DISTRICTS.

Separate Statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 17·9, and the birth-rate 26·4 per 1,000 of the population; in the remainder of the country the death-rate was 13·5 and the birth-rate 20·6 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases † in the Urban Districts during the quarter was 3·3 per 1,000 of the population; in the remainder of the country the rate was 0·6 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the THIRD QUARTER of the year 1913, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES †; from TUBERCULOUS DISEASE, and from CANCER, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-six Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 27th September, 1913.

(a) Including the deaths of 6 persons from enteric fever, one from typhus, 18 from scarlet fever, and one from tuberculous disease, admitted from the City of Belfast to the hospital for infectious diseases at Purdysburn, in the Registrar's District of Ballyleson, and Union of Lisburn.

† Enteric fever, typhus, small-pox, measles, scarlet fever, whooping-cough, diphtheria, dysentery, and diarrhoeal diseases.

† The rates for the districts in the Dublin Registration Area and for Belfast and Londonderry have been calculated on the population estimated to the nearest 5,000.

VACCINATION.

According to the Returns of Primary Vaccinations received for the third quarter of the year 1913, there were 17,643 persons successfully vaccinated.

EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 30th September last was 7,537 (3,471 males and 4,066 females), being 493 less than in the corresponding quarter of the year 1912, and 1,011 below the average number for the third quarter of the ten years 1903–1912.

TABLE VI.—EMIGRATION from IRELAND during the months of July, August, and September in 1912 and 1913 :—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1912.	1913.	Increase.	Decrease.	1912.	1913.	Increase.	Decrease.	1912.	1913.	Increase.	Decrease.
July,	1,032	885	—	147	775	826	51	—	1,807	1,711	—	96
August,	1,123	982	—	141	1,144	990	—	154	2,267	1,972	—	295
September,	1,717	1,604	—	113	2,239	2,250	11	—	3,956	3,854	—	102
TOTAL,	3,872	3,471	—	401	4,158	4,066	—	92	8,030	7,537*	—	493

* Including 5,535 emigrants to the United States of America, viz. :—938 in the month of July, 1,358 in August, and 3,239 in September. Of 5,007 steerage passengers, 1,421 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 6*d.*, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the third quarter of the year 1912 the average price was 6½*d.*, and in the corresponding quarter of 1903 it was 5½*d.*

The average price of oatmeal (1st quality) in Dublin for the quarter was 16*s.* per cwt. For the corresponding quarter of the year 1912 the average price was also 16*s.*, and for the third quarter of 1903 the average price was 15*s.* per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 4*s.* 7*d.* to 5*s.* 2*d.* In the third quarter of 1912 the average prices were 3*s.* 4*d.* to 3*s.* 9*d.*, and the prices for the corresponding quarter of 1903 were 3*s.* 6*d.* to 4*s.* 2*d.*

The average price per cwt. of beef at the Dublin Cattle Market was 60*s.* 6*d.* to 64*s.*, and for the third quarter of 1903, the price ranged from 53*s.* 6*d.* to 58*s.*

The price (including cartage) of Whitehaven coal in the City of Dublin up to the 3rd September was 24*s.* per ton nett.

The highest price of Consols at the Dublin Stock Exchange for the quarter was 74½ and the lowest 72⅞.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during last quarter was 5 per cent.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the third quarter of 1913 was 34,092, or 1,320 below the average for the corresponding period in 1912.

The average weekly number of persons receiving out-door relief during the quarter was 37,862, being 1,836 below the average for the third quarter of 1912.

Of the persons receiving in-door relief during the third quarter of 1913, an average number of 1,616 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1912 the average weekly number was 1,646.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the THIRD QUARTER of the year 1913, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES OF PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM.			
									No. OF PERSONS RELIEVED.			
	BREAD (4lb. Loaf.)		OATMEAL (Corn Exchange), per Cwt. 1st quality.	POTATOES (at Potato Market) per Cwt.		BEEF (at the Dublin Cattle Market), per Cwt.			Out-door.			
	(a)	(b)							In-door.	Ordinary relief.	By means of works devised for the relief of distress.	Total Out-door.

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4-lb. loaf delivered; the price in Messrs Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4-lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the "Dublin Gazette"; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the third

* Latitude 53° 21' 48.25" north; longitude 6° 20' 59.15" west. Height above the mean sea level 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

quarter of the years 1908 to 1913, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 164).

The mean height of the barometer during the third quarter of 1913 was 30·067 inches, being 0·244 above the average for the corresponding quarter of the five years 1908–1912; the highest reading (30·462 inches) was on the 1st July, at 9 P.M., air calm, and also on 7th September, at 9 A.M., wind E., respectively, and the lowest (29·080 inches) on the 14th September, at 9 A.M., air calm.

The mean temperature of the air during the quarter was 56·1°, being 0·1° below the average for the third quarter of the 5 years, 1908–1912.

The maximum temperature of the air during the quarter was 76·0° and the minimum 32·7°. The maximum heat in sun was 133·0°.

Rain fell on 36 days during the quarter. The rain-fall measured 5·475 inches, being 1·301 inches below the average for the third quarter of the five years, 1908–1912. The greatest monthly rainfall was in September, when 3·940 inches were registered.

The wind blew on 28 days from W., on 14 days from E., on 9 days from N., on 6 days from N.E., on 6 days from N.W., on 5 days from S.W., on 2 days from S., on one day from S.E., and the air was calm on 21 days at 9 A.M.

July.—The mean height of the barometer during this month was 30·136 inches; the highest reading (30·462 inches) was on the 1st, at 9 P.M., air calm; and the lowest (29·879 inches) on the 6th, at 9 A.M., wind N.W. The mean temperature of the air was 56·6°, the maximum registered was 74·1°, and the minimum 35·2°. The 21st was the warmest day, and the 8th the coldest night. The mean of the dry bulb was 56·7°, and of the wet bulb, 53·8°. The maximum heat in the sun was 130·0°, and the minimum on the grass 28·0°. The total amount of sunshine recorded was 151·5 hours, the greatest daily amount being 15·0 hours on the 1st. The minimum on the grass was below 30° on one night. The maximum ozone was 0·5, the minimum 0·1, and the mean 0·4. Rain fell on 13 days. The rain-fall measured 0·800 inch; the greatest amount in 24 hours was 0·200 inch on the 8th.

August.—The mean height of the barometer during this month was 30·105 inches; the highest reading (30·340 inches) was on the 26th, at 9 P.M., air calm, and the lowest (29·791 inches) on the 22nd, at 9 P.M., wind W.S.W. The mean temperature of the air was 57·5°, the maximum registered was 76·0°, and the minimum 37·0°. The 18th was the warmest day, and the 20th the coldest night. The mean of the dry bulb was 57·7°, and of the wet bulb 54·7°. The maximum heat in sun was 133·0°, and the minimum on the grass 34·7°. The total amount of sunshine recorded was 166·8 hours, the greatest daily amount being 12·5 hours on the 25th. The minimum on the grass was not below 30° on any night. The maximum ozone was 0·6, the minimum 0·0, and the mean 0·4. Rain fell on 10 days. The rain-fall measured 0·735 inch; the greatest amount in 24 hours was 0·270 inch on the 10th.

September.—The mean height of the barometer during this month was 29·961 inches, the highest reading (30·462 inches) was on the 7th at 9 A.M., wind E., and the lowest (29·080 inches) on the 14th, at 9 A.M., air calm. The mean temperature of the air was 54·3°; the maximum registered was 71·8°, and the minimum 32·7°. The 11th was the warmest day, and the 17th the coldest night. The mean of the dry bulb was 54·7°, and of the wet bulb 52·6°. The maximum heat in sun was 125·8°, and the minimum on the grass 31·0°. The total amount of sunshine recorded was 88·3 hours, the greatest daily amount being 10·1 hours on the 11th. The minimum on the grass was not below 30° on any night. The maximum ozone was 0·6, the minimum 0·0, and the mean 0·4. Rain fell on 13 days. The rain-fall measured 3·940 inches; the greatest amount in 24 hours was 1·340 inch on the 19th.

METEOROLOGY.

[*Prepared in the Meteorological Office under the direction of W. N. Shaw, Esq., LL.D., Sc.D., F.R.S.*]

The weather of this quarter was upon the whole finer and drier in Ireland and the western portions of Great Britain than in districts lying further east. In spite, however, of a fairly large prevalence of bright sunshine the thermometer seldom rose to any high summer level, shade readings of 75° and upwards being extremely rare. A long drought which set in about the middle of July continued until the close of the first week in August, many parts of the country reporting an entire absence of rain lasting for at least 3 weeks. In September, and more especially in the earlier half of the month, there were frequent heavy downpours, but owing to the excessive dryness of July and August the total rainfall for the quarter was considerably below the average.

July was for the most part fair and dry, especially in the southern districts, where the total rainfall amounted in many places to less than half an inch. At Wexford and Waterford there were only 5 days with a measurable quantity, and at the latter station the total for the month was less than a tenth of an inch, as against an average of 3.2 inches. For a large portion of the time the weather was under the influence of an extensive anticyclone lying over the Atlantic, but about the middle of the month it was affected by complex depressions which extended southwards from Iceland and Northern Europe, rain being for a time rather frequent but at no time heavy. In the closing days the Atlantic high pressure system extended eastwards over the whole of the United Kingdom, and fine dry weather became general. The highest temperatures were recorded between the 26th and 28th, when the thermometer rose to 75° and upwards in several parts of the country and reached 79° in a few scattered places. The prevailing winds were, however, from north or north-west, and the mean temperature of the month was below the normal at nearly all stations.

In *August* the weather was scarcely as settled as in July, but with a decided preponderance of anticyclonic conditions the rainfall of the month was again considerably below the average, many places in the north and east recording a total of less than one-tenth of an inch. Very few stations experienced at any time a daily fall amounting to as much as half-an-inch, but at Mount Callan (Co. Clare) on the 10th there was as much as an inch and a-half, while at Roche's Point, during a thunderstorm on the 29th, nearly an inch was deposited. The wind, although frequently from some northerly quarter, was more variable than in July, and temperature was therefore somewhat higher, the mean for the month being above the average at most places situated in the southern half of the country. The greatest warmth occurred on or about the 2nd or the 14th, the thermometer on each occasion rising above 75° in many districts. At Lisburn on the 2nd a reading of 83° was recorded.

September was, upon the whole, cloudy and unsettled, the anticyclonic influence which had prevailed so commonly during the two preceding months being replaced by the effect of low pressure systems moving chiefly in irregular paths outside our west and south-west coasts. The total rainfall was nearly everywhere largely in excess of the average, and several individual downpours of great weight were reported, the chief instances occurring between the 13th and 15th, on the 19th, and between the 22nd and 24th. On each of the occasions mentioned amounts varying between an inch and a-half and two inches were recorded in many scattered places. No very high day temperatures were reported, the absolute maxima for the month being as a rule very little above 70° . The nights were, as a rule, fairly mild, but about the middle of the month ground frost was experienced in the more central districts, the exposed thermometer falling on the night of the 16th to 28° at Armagh and 31° at Phoenix Park.

The *Mean Temperature* of the quarter was slightly above the normal in the southern parts of the country, but was in almost precise agreement with the average in the northern districts. Only two instances were reported of shade readings as high as 80° (83° at Lisburn on August 2nd, and 80° at Wexford on August 14th), but on three occasions the thermometer very nearly reached that level. On July 27th a reading of 78° was recorded at Kilkenny and Waterford, and a reading of 79° at Lisburn, Cahir and Killarney; on August 2nd the thermometer reached 78° at Waterford, and 79° at Killarney; and on August 14th it rose to 78° at Glasnevin and 79° at Ballinacurra. The lowest temperatures of the quarter occurred rather commonly on September 17th or 18th, when the thermometer in the screen fell to 35° or less in many parts of the country, to 33° at Phoenix Park and Newtownforbes, and to 32° at Clongowes Wood. Readings slightly below 40° were observed more than once in July and August; on July 8th the thermometer fell to 36° at Clongowes Wood, and to 35° at Phoenix Park and Newtownforbes.

The *Rainfall* of the quarter was extraordinarily deficient, the total amounting to only 64 per cent. of the average in the southern half of the country, and to only 60 per cent. of the average in the north. In the former district the quarter was not quite as dry as in 1906, but in the latter it was the driest experienced (at a corresponding time of year) since the Meteorological Office record commenced in 1878. Scarcely any instances of heavy falls were recorded in July or August, but in September such cases were rather numerous. The principal occurred:—Between the 13th and 15th the fall on one or other of the three days amounting to as much as 2.2 in. at Ennistymon; 2.1 in. at Lisburn, 2.0 in. at Seaforde (Co. Down), and 1.8 in. at Roche's Point; on the 19th, when 2.0 in. fell at Warrenpoint, and about an inch and three-quarters round Dublin; on the 24th, when 1.3 in. fell at Limerick (Mungret Park) and 2.0 in. at Broadford (Co. Clare); and on the 27th, when 1.1 in. fell at Blacksod Point and Valencia Island. At Glasnevin and at Seaforde (Co. Down) the total rainfall in September amounted to about twice as much as the average.

The amount of *Bright Sunshine* experienced during the quarter agreed precisely with the average in the south, but was 8 per cent. in excess in the north. The brightest weather occurred at the end of July and the beginning of August; in the week ended August 2nd as much as 65 per cent. of the possible duration of sunshine was recorded at Valencia, and 56 per cent. at Ballinacurra. The cloudiest week was that ended July 19th, when the proportion of the possible duration amounted to only 8 per cent. at Armagh and Birr Castle and 10 per cent. at Phoenix Park.

ABSTRACTS I., II., III., IV.

MARRIAGES Registered during the Quarter ending 30th June, 1913, in PROVINCES, COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS (or POOR LAW UNIONS) of IRELAND; **BIRTHS AND DEATHS** Registered during the Quarter ending 30th September, 1913; Deaths from ENTERIC FEVER, TYPHUS, SMALL-POX, MEASLES, SCARLET FEVER, WHOOPING-COUGH, DIPHTHERIA, DYSENTERY, TUBERCULOUS DISEASE, CANCER, DIARRHŒA and ENTERITIS of CHILDREN under 2 years, DIARRHŒA of PERSONS aged 2 years and upwards; also VIOLENT DEATHS,* INQUEST CASES, DEATHS IN PUBLIC INSTITUTIONS, and NUMBER of UNCERTIFIED DEATHS Registered during the Quarter ending 30th September, 1913, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS OF IRELAND; with a Return of **VACCINATIONS** for that Quarter.

ABSTRACT I.—PROVINCES AND COUNTIES.

PROVINCES and COUNTIES.	Area in Statute Acres.	Popula- tion in 1911.	Marriages.		Births.		Deaths.		The Deaths registered during the Quarter are stated by the Registrars to include														Number of successful Vaccinations in the Quarter ending 30th Sept. 1913.										
			Averages in the Quarters ending 30th June in the 10 years, 1903-1912.	Registered in the Quarter ending 30th June 1913.	Averages in the Quarters ending 30th Sept. in the 10 years, 1903-1912.	Registered in the Quarter ending 30th Sept. 1913.	Averages in the Quarters ending 30th Sept. in the 10 years, 1903-1912.	Registered in the Quarter ending 30th Sept. 1913.	Deaths from												Deaths in Public In- stitutions.	Number of Un- certified Deaths.											
									Deaths of		Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Dysentery.	Tuberculous Disease.	Cancer.	Diarrhoea and Enteri- tis of Children under 2 years of age.				Diarrhoea 2 years of age and upwards.	Violence†								
									Infants under 1 year of age	Persons aged 65 years and upwards.

[illegible]

* The Registrars' Districts (831 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same names formed under the Medical Charities Act. The letter W denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

† The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 179 and 180 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 29th June, 1913, to 27th September, 1913. With the exception of 128 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these districts have been assigned to the respective districts comprised in the "Dublin Registration Area" from which the deceased were admitted.

† Exclusive of 8 deaths in the Rathdown Union Workhouse of persons admitted from Blackrock and Kingstown, to which Urban Districts they have been assigned.

NOTE.—This table has been constructed for the years 1839 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1913.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—There has been a rather serious outbreak of measles in this district for the past couple of months.

CARLOW; *Bagenalstown*.—Health of district good. No contagious disease prevalent.

CARLOW; *Carlow, No. 1, W*.—Sanitation of urban area is still very bad.

CARLOW; *Fennagh and Myshall*.—The health of the district during the quarter was good.

CARLOW; *Leighlinbridge*.—Health of the district good. District free from tuberculosis; the case registered was contracted outside district.

NEW ROSS; *St. Mullins*.—Scarlatina has been very prevalent in one part of the district; otherwise the health of the district is good, eight of the 17 deaths being of persons from 65 to 94 years.

Dublin County.

BALROTHERY; *Kilsallaghan*.—District healthy during past quarter. One case of scarlatina occurred, and the necessary prophylactic measures were taken to prevent spread.

CELBRIDGE; *Rathcoole*.—District healthy.

Dublin County Borough.

DUBLIN, SOUTH; *New Kilmainham*.—The district is in a good sanitary condition. There has been no outbreak of any infectious disease for the past quarter.

Kildare County.

ATHY; *Athy, W*.—The district has been very free from infectious disease. The sanitation of the district is good.

ATHY; *Castledermot*.—Whooping-cough and measles prevalent during quarter.

CELBRIDGE; *Maynooth*.—District healthy, except for mild epidemic of measles in Leixlip.

EDENDERRY; *Carbury*.—Three cases of diphtheria and four of scarlatina occurred.

NAAS; *Ballymore Eustace*.—The health of the district is good.

NAAS; *Naas and Carragh, W*.—Two deaths from diphtheria in the rural district at Sallins; very faulty sewerage the probable cause. The sewerage system is being amended now.

Kilkenny County.

CALLAN; *Callan, W*.—Only 16 deaths were registered during the quarter.

CALLAN; *Kilmaganny*.—District healthy.

CARRICK-ON-SUIR; *Pilltown*.—Health of district in excellent condition; absence of epidemic disease.

CASTLECOMER; *Castlecomer, W*.—The district is in a healthy state and free from any epidemic.

KILKENNY; *Freshford*.—The sewerage of the town is very defective.

KILKENNY; *Gowran*.—Sanitary arrangements in the district are good.

KILKENNY; *Tiscoffin*.—District healthy at present. There were four cases of enteric fever in one house during August. The necessary disinfection carried out; no further case.

KILKENNY; *Tullaroan*.—District in a satisfactory state.

NEW ROSS; *Dysartmoon*.—District healthy.

THOMASTOWN; *Graigie*.—Slight outbreak of scarlatina.

THOMASTOWN; *Inistioge*.—District healthy.

THOMASTOWN; *Knocktopher*.—District in a very healthy condition.

URLINGFORD; *Balleen*.—Health of district good. No case of infectious disease during quarter.

URLINGFORD; *Urlingford, W*.—Health of the district good. No epidemics.

King's County.

BIRR; *Banagher*.—Measles was very prevalent in the district during the past three months. It was an unusually severe type, and in a large number of cases there were histories of previous attacks. Five cases of typhoid fever and two of diphtheria occurred.

BIRR; *Frankford*.—District healthy. Of the seven deaths, four were of persons over 80 years of age.

BIRR; *Kinnitty*.—Sanitary arrangements in district good. Referring to two deaths uncertified, one man (91 years old) never attended by a doctor—senile decay; one female infant (4 weeks old), history of persistent foramen ovale of heart, arrested development, death from malnutrition, not medically attended.

MOUNTMELICK; *Clonygowan, No. 2*.—Public health fair.

ROSCREA; *Roscrea, No. 2*.—The health of the district is very good.

TULLAMORE; *Clara*.—Sanitary arrangements of district good.

TULLAMORE; *Philipstown*.—District fairly healthy.

Longford County.

BALLYMAHON; *Abbeyskrule*.—Of the 13 deaths registered, 9 were of persons aged 71 to 89 years. District healthy.

BALLYMAHON; *Ballymahon, W*.—The sanitary condition of the district is satisfactory.

GRANARD; *Ballinalee*.—The district is in good sanitary condition and free from contagious disease.

GRANARD; *Granard, W*.—The district is in fair sanitary condition and free from contagious disease.

GRANARD; *Scrubby, No. 2*.—Health of the district good.

LONGFORD; *Killashee*.—District is singularly free from epidemic diseases.

Louth County.

ARDEE; *Castlebellingham*.—District very healthy.

ARDEE; *Collon, No. 1*.—District healthy.

ARDEE; *Dunleer*.—District healthy.

DUNDALK; *Barronstown*.—District in good sanitary condition.

Meath County.

ARDEE; *Collon, No. 2*.—District is very healthy.

ARDEE; *Drumcondra*.—District healthy.

DROGHEDA; *St. Mary's*.—The sanitary state of district is good.

DUNSHAUGHLIN; *Killeen*.—District very healthy.

EDENDERRY; *Ballyboggan*.—Of the 3 deaths, 2 were from pulmonary tuberculosis; one of these patients recently treated in a sanatorium.

KELLS; *Moynalty*.—The 8 uncertified deaths are made up of children prematurely born and very old people.

KELLS; *Nobber*.—District healthy.

NAVAN; *Painestown*.—District healthy and free from epidemic disease. One death from summer diarrhoea was registered.

OLDCASTLE; *Oldcastle, W*.—District healthy.

TRIM; *Summerhill*.—The district has been in a very healthy condition during the past quarter.

Queen's County.

ABBEYLEIX; *Durrow*.—District in a very healthy state; no epidemics; sanitation good.

ABBEYLEIX; *Rathdowney*.—District healthy. Sanitary arrangements good.

MOUNTMELICK; *Clonaslee*.—Malignant disease is common in the district. During last twelve months there have been registered three deaths from cancer, one probably cancer, and one malignant tumour. There are to my knowledge at least three cases of cancer in district at present.

MOUNTMELICK; *Clonygowan, No. 1*.—Public health fair.

MOUNTMELICK; *Mountmellick, W*.—The sanitary arrangements in good condition.

ROSCREA; *Borris-in-Ossory*.—The health of this district has been fair during the past quarter.

Westmeath County.

ATHLONE; *Glassan*.—District in a very good sanitary condition.

BALLYMAHON; *Ballymore*.—Sanitary condition of the district satisfactory.

DELVIN; *Clonmellon*.—Public health satisfactory.

GRANARD; *Finnea, No. 1*.—The district is very healthy.

MULLINGAR; *Ballynacarrigy*.—The number of deaths registered during quarter is below average, but excluding deaths of persons aged 65 and upwards over 60 per cent. of remaining deaths are attributed to tuberculosis.

MULLINGAR; *Castletown Geoghegan*.—The district is healthy.

MULLINGAR; *Killucan*.—The district is very healthy.

MULLINGAR; *Milltown*.—There was one death registered from rodent ulcer. The district is in good sanitary condition and healthy. Two cases of tuberculosis have made their appearance. Only one uncertified death.

MULLINGAR; *Mullingar, W*.—Health of the district good.

MULLINGAR; *Multyfarnham*.—District very healthy during quarter.

TULLAMORE; *Kilbeggan*.—General health of district good. The continued spell of fine weather has had a good effect in the absence of catarrhal conditions of chest, whilst the generally even and moderately cool temperature prevailing has had no tendency to the causation of epidemic diarrhoea and such other æstivo-autumnal complaints.

Wexford County.

ENNISCORTHY; *Killann*.—Scarlatina and measles present.

GOREY; *Camolin*.—District continues healthy.

GOREY; *Gorey, W*.—There have been two cases of diphtheria in this district during quarter.

GOREY; *Killenagh and Wells*.—One case of measles and a few cases of pertussis occurred during the quarter. District healthy.

NEW ROSS; *Fethard, No. 1*.—The sanitary condition of the district is satisfactory. Three cases of measles, confined to one family, occurred during the quarter.

NEW ROSS; *Fethard, No. 2*.—There was an epidemic of measles during September of a mild type.

WEXFORD; *Bannow*.—The sanitary condition of the district is satisfactory.

WEXFORD; *Bridgetown*.—The sanitation of district is good, and there has been no epidemic of any kind during past quarter.

Wicklow County.

BALTINGLASS; *Dunlavin*.—Summer diarrhoea prevalent during the past month.

BALTINGLASS; *Kiltegan*.—Health of district normal.

NAAS; *Blessington*.—The general health in the district is good. One death registered from phthisis.

RATHDOWN; *Delgany*.—Health of the district very good.

RATHDRUM; *Newcastle*.—General health of district good.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; *Ballyvaghan, W.*—Health of district good during quarter.

CORROFIN; *Corrofin, W.*—District healthy.

ENNIS; *Crusheen*.—Health of district good.

ENNIS; *Newmarket*.—General health of the district satisfactory.

ENNISTIMON; *Ennistimon, W.*—Health of the district is good. The sanitary arrangements are satisfactory.

ENNISTIMON; *Roadford*.—District has been very healthy for past quarter. Sanitary arrangements satisfactory.

KILLADYSERT; *Labasheeda*.—The health of the district continues good.

KILRUSH; *Carrigaholt*.—A few isolated cases of scarlet fever; otherwise health of district very good.

KILRUSH; *Kilkee*.—Sanitary state of district fairly good.

LIMERICK; *Bridgetown*.—District healthy.

LIMERICK; *Coolacasey*.—The district was very healthy during the quarter.

SCARRIFF; *Annacarriga*.—Sanitary condition of Killaloe bad.

SCARRIFF; *Feakle*.—Health of district good.

SCARRIFF; *Kilkishen*.—There were two deaths from measles during the quarter.

SCARRIFF; *Mountshannon, W.*—District continues in a good sanitary condition.

SCARRIFF; *Quin*.—Sanitary arrangements fairly good. Outbreak of measles in July; one fatal case.

Cork County and County Borough.

BANDON; *Innishannon*.—Uncertified cases were:—premature birth of twins, ages 7 hours and 15 minutes respectively; one sudden death; a baby, age 10 months, measles, 3 days; and one death, senile decay. I have reason to believe that ages of old people stated to registrars are frequently much under their real ages.

BANDON; *Kilbrittain*.—District in a very good sanitary state.

BANTRY; *Bantry, W.*—The sanitary condition of the district is fairly good.

BANTRY; *Durrus and Kilcrohane*.—The general health of district is good. In many instances, owing to the close proximity of cow-houses and piggeries to dwelling-houses, the sanitary arrangements are poor.

BANTRY; *Glengarriff*.—District free from infectious disease.

BANTRY; *Kealkill*.—District healthy. Four of the deaths registered were at 86, 79, 76, and 75 years respectively. Sanitary condition of district good.

CASTLETOWN; *Kilcatherine*.—District healthy.

CLONAKILTY; *Timoleague*.—I attended lately some cases of cholera nostras; there was one death. The disease in this case was due to drinking rain-water from a barrel used for collecting same.

CORK; *Blarney*.—No infectious disease during the quarter, except some cases of measles during the months of July and August.

CORK; *Carrigaline, No. 1*.—District healthy.

CORK; *Dripsey*.—Sanitary arrangements are fairly good. There was a severe epidemic of measles in July and August, and later an epidemic of Irish cholera, which was of a severe type, two children and one old age pensioner dying of it.

CORK; *Queenstown, No. 2*.—Epidemic enteritis, of a severe type has been very prevalent during latter part of quarter.

DUNMANWAY; *Coolmountain*.—District healthy.

DUNMANWAY; *Dunmanway, W.*—The sanitary condition of the district is satisfactory. There were two deaths registered as being due to pulmonary tuberculosis. In one the disease was contracted in America.

FERMOY; *Rathcormack*.—There was one death from pulmonary tuberculosis of a man aged 65 years registered during the quarter. The district was free from zymotic disease during the quarter.

KANTURK; *Milford*.—The district is healthy.

KILMALLOCK; *Charleville*.—The district is very healthy.

KINSALE; *Ballyfeard*.—An endemic of gastrointestinal disorder occurred amongst infants; one death. Otherwise general health good.

KINSALE; *Courceys*.—District in a good sanitary condition.

MALLOW; *Ballyclogh*.—District healthy.

MALLOW; *Buttevant*.—District in a satisfactory sanitary state.

MALLOW; *Rahan*.—District healthy during past quarter; many cases of measles occurred.

MIDDLETON; *Cloyne*.—District is healthy, with the exception of some cases of zymotic enteritis.

MIDDLETON; *Middleton, No. 2*.—Health of district has been good during the past quarter.

MITCHELSTOWN; *Mitchelstown, No. 1, W.*—Epidemic of measles.

SKIBBEREEN; *Dromdaleague*.—District healthy.

SKIBBEREEN; *Unionhall*.—The ages of the 7 persons whose deaths were registered varied from 57 to 86 years.

Kerry County.

CAHERSIVEEN; *Caher, W.*—No disease prevalent during the quarter. Sanitary condition very much improved; this is, in a great measure, attributable to the Dairy and Cowsheds Act being vigorously enforced.

CAHERSIVEEN; *Emlagh.*—Health of district very good; no infectious diseases. Great improvement in sanitation.

CAHERSIVEEN; *Glanbehy.*—District healthy.

CAHERSIVEEN; *Valencia.*—Sanitary arrangements in this district good. District free from any of the diseases mentioned in the abstracts.

DINGLE; *Anascaul.*—District healthy.

DINGLE; *Castlegregory.*—District healthy.

DINGLE; *Dingle, W.*—District healthy.

KENMARE; *Kenmare, W.*—District healthy.

KENMARE; *Kilgarvan.*—District healthy.

KENMARE; *Tuosist.*—No epidemic of infectious diseases for the past sixteen years.

KILLARNEY; *Coom.*—District healthy during past quarter.

KILLARNEY; *Killarney, No. 1, W.*—Epidemic of measles.

KILLARNEY; *Molahiffe.*—Epidemic of measles.

LISTOWEL; *Ballyhorgan.*—District healthy.

LISTOWEL; *Ballylongford.*—District very healthy for quarter, most of the deaths occurring from ripe old age. There was one death from consumption; parents, however, made no attempt to have the case sent for treatment. Nevertheless, this disease is very much checked compared with twenty or thirty years ago, thanks to new remedies.

LISTOWEL; *Listowel, W.*—No form of infectious disease prevalent.

LISTOWEL; *Tarbert.*—I consider the district healthy on the whole, although five deaths were registered during the quarter, the certified cause of which was tuberculous disease of some kind or other.

TRALEE; *Ardfert.*—The health of the district is very good.

TRALEE; *Castlemaine.*—District healthy.

TRALEE; *Kilgobban.*—The district is healthy.

TRALEE; *Tralee, No. 2.*—In those cases registered as due to measles the deaths occurred in last April.

Limerick County and County Borough.

CROOM; *Castletown.*—A few cases of measles of a mild type, a good many of whooping-cough, one of diphtheria, and an unusual amount of acute rheumatism present.

KILMALLOCK; *Bruff.*—The district is free from zymotic disease.

KILMALLOCK; *Bruree.*—District healthy.

KILMALLOCK; *Hospital.*—District healthy.

KILMALLOCK; *Kilfinnane.*—District healthy.

KILMALLOCK; *Kilmallock, W.*—District very healthy.

LIMERICK; *Annacotty.*—Sanitary arrangements good. District very healthy.

LIMERICK; *Caherconlish.*—Health of district good. Two deaths from phthisis. One of those was of a man who had it for years, and last quarter I registered his son's death, also phthisis.

LIMERICK; *Clarina.*—There were two cases of enteric fever in the district during the quarter; otherwise district rather healthy.

LIMERICK; *Limerick, No. 3.*—The health and sanitary arrangements of the district have been satisfactory during the quarter.

LIMERICK; *Moroe.*—Health of district generally good. Death-rate very low. Number of births exceptionally high.

LISTOWEL; *Glin.*—The district has been singularly free from infectious diseases during the quarter just ended.

MITCHELSTOWN; *Galbally.*—District exceptionally healthy.

MITCHELSTOWN; *Mitchelstown, No. 2.*—Epidemic of measles.

NEWCASTLE; *Ardagh.*—The sanitary state of the district is pretty fair.

NEWCASTLE; *Feenagh.*—The sanitary arrangements in the district are fairly good.

RATHKEALE; *Askeaton.*—There was an outbreak of scarlatina in part of my district. I could not trace the source of infection; the scarlatina was of a mild type and caused no death. Phthisis pulmonalis caused one death, and cancer (medullary) of right knee-joint in a boy ten years of age caused another death.

RATHKEALE; *Pallaskenry.*—One death registered from pulmonary tuberculosis; the deceased acquired the infection in Belfast.

RATHKEALE; *Rathkeale, No. 1, W.*—Health of district very good, with the exception of an epidemic of diarrhoea, which, however, was responsible for only one death. There were 7 deaths from tuberculosis, which, however, includes some cases in the Union hospital from outside districts. Two cases of cancer died.

RATHKEALE; *Rathkeale, No. 2.*—My district was in a very healthy condition during the quarter and free from all contagious diseases.

TIPPERARY; *Grean.*—District healthy.

Tipperary County, North Riding.

BORRISOKANE; *Borrisokane, W.*—District free from any infectious disease.

BORRISOKANE; *CloghJordan.*—There were some cases of scarlatina during the quarter; otherwise the sanitary condition of this district at present is good.

BORRISOKANE; *Terryglass.*—The district is very healthy and kept in a good sanitary condition.

NENAGH; *Nenagh, W.*—Two or three cases of scarlatina have occurred during quarter; otherwise district healthy.

NENAGH; *Newport.*—One death from carcinoma of stomach during quarter. Sanitary arrangements fair.

NENAGH; *Portroe.*—District in a very healthy condition.

NENAGH; *Toomyvara.*—The health of the district is good.

ROSCREA; *Bourney.*—Sanitary condition of district is very fair.

THURLES; *Moyne.*—District healthy. No prevailing disease.

Tipperary County, South Riding.

CALLAN; *Ballingarry*.—The public health for the quarter ended has been good.

CALLAN; *Mullinahone*.—The sanitary condition of district fairly good. Measles and whooping-cough prevailed in parts of district during quarter, and a considerable number of cases of influenza; otherwise the district healthy. Only one death from cancer.

CASHEL; *Killenaule*.—District healthy.

CLOGHEEN; *Caher*.—No cases of an epidemic character are prevalent in the district.

CLOGHEEN; *Clogheen, W.*—In the early portion of the quarter an epidemic of measles prevailed; no deaths.

CLONMEL; *Kilsheelan, No. 1*.—Measles prevalent in part of district.

TIPPERARY; *Bansha*.—One death of a male registered whose age was stated to be 100 years.

TIPPERARY; *Cappagh*.—The district is healthy.

URLINGFORD; *Kilcooly*.—The district has been healthy during past quarter. Sanitary arrangements good.

Waterford County and County Borough.

CARRICK-ON-SUIR; *Rathgormuck*.—There has been an epidemic of measles during the past quarter, and also some cases of whooping-cough have been under treatment. Otherwise the district is healthy.

CLONMEL; *Ballymacarbry*.—Sanitary state good. One death registered at 78 and one at 80 years.

CLONMEL; *Kilsheelan, No. 2*.—Measles prevalent in part of district.

DUNGARVAN; *Dungarvan, W.*—Diarrhoea prevalent in district during past quarters.

DUNGARVAN; *Whitechurch*.—One case of enteric fever during the quarter.

LISMORE; *Tallow*.—Several cases of epidemic diarrhoea occurred in young children and a few adults during the quarter, but no deaths from that disease. District otherwise healthy.

WATERFORD; *Kilmeadan*.—The health of the district during the past quarter has been fairly good. There was a severe outbreak of diarrhoea in children, but no fatal cases. Sanitation of district is good.

WATERFORD; *Waterford, Urban, No. 1, W.*—Measles and diarrhoeal disease have produced a high mortality during the quarter—one-third of all deaths registered having been due to these infective maladies.

III. PROVINCE OF ULSTER.**Antrim County.**

ANTRIM; *Crumlin*.—There were three cases of diphtheria this quarter, but no fatalities.

ANTRIM; *Doagh*.—The district has been free from infectious disease during the quarter, with the exception of a few mild cases of scarlatina and two of diphtheria during the past month.

ANTRIM; *Randalstown*.—Five deaths from all forms of tuberculous disease. Several cases of scarlet fever in one part of my district; one death resulting therefrom.

ANTRIM; *Templepatrick*.—The sanitary arrangements of the district, with few exceptions, are good. Health of public (in general) good. One case of diphtheria notified; treated with diphtheria anti-toxin; recovered, although not medically attended for one week after beginning of disease.

BALLYCASTLE; *Ballycastle, W.*—There were seven cases of diphtheria during the quarter, six being members of same family. No fresh cases occurred for the last three weeks of quarter.

BALLYCASTLE; *Cushendall*.—Sanitary arrangements of the district are excellent.

BALLYMENA; *Ahoghill*.—Health of district good.

BALLYMENA; *Ballymena, W.*—Town and district healthy.

BALLYMENA; *Broughshane*.—Health of the district very good. There is whooping-cough among the children attending one school which was closed in consequence; no deaths.

BALLYMENA; *Galgorm*.—No zymotic disease during the quarter. Both birth and death rates extremely low.

BALLYMENA; *Glenwhirry*.—District healthy; no infectious diseases during the quarter. Sanitary condition of district fair.

BALLYMENA; *Portglenone*.—Whooping-cough was prevalent during the quarter.

BALLYMENA; *Toome*.—There has been an epidemic of whooping-cough during the last quarter. One death has resulted therefrom. Sanitary condition of the district good.

BALLYMONEY; *Dirraw*.—Sanitary arrangements and health of district good.

BELFAST; *Belfast, Rural, No. 4*.—The health of the district for the quarter has been exceptionally good. Diarrhoea, especially among young children, has been prevalent, but no deaths from it were registered. The sanitary arrangements are good.

LARNE; *Ballycarry*.—Owing to the continued drought causing a great scarcity of water in this district, sewage matter collected and lodged in open sewers; since the rainfall came there have been a few cases of diphtheria, but so far it has not developed seriously.

LISBURN; *Dunmurry*.—District has on the whole been healthy and free from epidemic disease, except for a small localized but very severe epidemic of measles and whooping-cough combined with bronchopneumonia, which caused five deaths.

LISBURN; *Glenavy*.—The health of district has been good. No case of infectious disease has occurred during the quarter.

Armagh County.

ARMAGH; *Blackwatertown*.—Two of the three cases of tuberculous disease registered occurred in the district asylum.

ARMAGH; *Markethill*.—Except for one case of scarlet fever, the district was very healthy.

ARMAGH; *Rich Hill*.—District is in a good sanitary condition. No infectious disease.

ARMAGH; *Tynan*.—A mild epidemic of measles prevailed in this district during the latter part of July and September. No deaths from same.

LURGAN; *Lurgan, No. 1, W.*—Summer diarrhoea was very prevalent during latter half of quarter, but only three deaths were registered in the urban district and one in the rural.

LURGAN; *Lurgan*, No. 2.—Whooping-cough and a few cases of scarlatina in the district.

NEWRY; *Mullaghglass*.—District healthy.

Belfast County Borough.

BELFAST; *Belfast Urban*, No. 3.—Scarlet fever was prevalent, and almost all the cases were removed to the Fever Hospitals. Six cases of typhus fever occurred just at the close of the quarter and were all removed to Purdysburn Fever Hospital.

BELFAST; *Belfast, Urban*, No. 5.—No outbreak of any infectious disease.

BELFAST; *Belfast, Urban*, No. 11.—During the first two months of the quarter diarrhoea was very prevalent among young children, but the death-rate was not high.

Cavan County.

BAILIEBOROUGH; *Bailieborough, W.*—District in a fairly healthy condition. Some mild cases of scarlatina present.

BAILIEBOROUGH; *Shercock*.—One case of diphtheria, which, by patient being removed to infirmary hospital and house disinfected, did not extend.

BAWNBOY; *Swanlinbar*.—Measles and scabies prevalent in district.

CAVAN; *Belturbet*.—The health of district this quarter very good. One case of scarlet fever in urban area.

CAVAN; *Killashandra*.—District healthy. Sanitary state of district slowly improving.

COOTEHILL; *Tullyvin*.—District healthy. Sanitary arrangements fair. A considerable number of cases of mumps came under my notice.

ENNISKILLEN; *Dowra*.—The district is fairly healthy and free from any infectious disease.

ENNISKILLEN; *Holywell*, No. 2.—District healthy. No epidemic disease.

GRANARD; *Finnea*, No. 2.—The district is very healthy.

GRANARD; *Scrabby*, No. 1.—Health of the district good.

OLDCASTLE; *Ballyjamesduff*.—District healthy.

OLDCASTLE; *Virginia*.—District healthy.

Donegal County.

BALLYSHANNON; *Ballintra*.—Sanitary arrangements fairly good.

DONEGAL; *Donegal, W.*—District healthy.

DONEGAL; *Dunkineely*.—A few cases of whooping-cough; district otherwise healthy and sanitation improving.

DONEGAL; *Laghy*.—District healthy.

DONEGAL; *Mountcharles*.—District in a healthy condition. No epidemic of any kind.

DONEGAL; *Pettigoe*.—District healthy.

DUNFANAGHY; *Crossroads*.—District free from any infectious disease during past quarter.

DUNFANAGHY; *Dunfanaghy, W.*—District healthy.

GLENTIES; *Ardara*.—There were six cases of enteric fever in one family during quarter caused by drinking water being contaminated with animal matter. Cases were isolated. No further cases arose.

GLENTIES; *Carrick*.—District healthy.

GLENTIES; *Doocherry*.—District healthy.

GLENTIES; *Dunglow*, No. 2.—The district has been free from any serious outbreak during the quarter. Sanitation fairly good.

INISHOWEN; *Buncrana*.—District healthy.

INISHOWEN; *Clonmany*.—District healthy.

INISHOWEN; *Malin*.—District healthy.

LETTERKENNY; *Church Hill*.—District healthy. No epidemic.

LETTERKENNY; *Letterkenny, W.*—Measles epidemic; no deaths.

LETTERKENNY; *Manorcunningham*.—There was an epidemic of measles during the quarter, but no deaths so far as I can learn. The district is in a fair sanitary condition.

MILLFORD; *Rosguill*.—Influenza prevalent into July, with two fatal cases of broncho-pneumonia. District otherwise healthy.

STRANORLAR; *Cloghan*.—Sanitary arrangements satisfactory.

STRANORLAR; *Killygordon*.—District specially healthy during quarter. No epidemics, and sanitation good.

Down County.

BANBRIDGE; *Ballyward*.—Health of district has been very satisfactory.

DOWNPATRICK; *Ballynahinch*.—There have been two cases of diphtheria and some cases of whooping-cough and measles in the district during the quarter.

DOWNPATRICK; *Downpatrick, W.*—There is only one death registered from scarlatina, but the disease has been prevalent in a mild form and kept hidden, and I believe children have attended school from infected houses.

DOWNPATRICK; *Killough*.—Of the eleven deaths registered for the quarter, five were due to pulmonary tuberculosis and one to cancer.

DOWNPATRICK; *Killyleagh*.—The public health is good, though the number of deaths due to tuberculous disease is increased. I have also registered four deaths caused by cancer. Three cases of scarlatina have been reported. The infection was imported.

DOWNPATRICK; *Portaferry*.—Health of district good. Influenza prevalent.

KILKEEL; *Rosstrevor*.—Sanitary arrangements of district quite satisfactory. Health of district also good. One case of typhoid fever during quarter; recovering. No further infectious diseases.

LISBURN; *Annahilt*.—The sanitary arrangements in the district are good; there is no infectious disease.

LISBURN; *Ballylesson*.—The absence of death from diarrhoea or enteritis, with one single exception, is a satisfactory and remarkable occurrence.

LISBURN; *Drumbeg*.—Births about the average. Deaths above the average. More than half the number of deaths registered were of persons aged 65 years and upwards.

LISBURN; *Saintfield*.—Healthy quarter. Two deaths from pulmonary phthisis, father and daughter. One death registered as 105 years, which is probably correct, on evidence produced.

LURGAN; *Moir*.—Low death-rate and high birth-rate this quarter. The epidemic of scarlatina which continued last quarter has quite disappeared.

LURGAN; *Waringstown*.—District healthy; death-rate low.

NEWRY; *Rathfriland*.—Death-rate in this district is decreasing.

NEWTOWNARDS; *Bangor*.—Sanitary arrangements good. Few cases of scarlet fever occurred during quarter.

NEWTOWNARDS; *Comber*.—A few cases of scarlatina, all from an imported case. Measles very prevalent in district, mostly of a mild type; otherwise district very healthy and sanitary arrangements very good.

NEWTOWNARDS; *Kilmood*.—The district is at present free from infectious disease.

NEWTOWNARDS; *Newtownards, W.*—During August and September there has been a good deal of zymotic enteritis. The weather was dry and flies numerous. Poor people, as a rule, have no proper place to store food and milk. I hope in time to see at the back of every poor man's house a fly-proof safe. I hope also to see more attention given to domestic scavenging, and I also sincerely hope that when the sanitary authority feels confident that a sufficient supply of water is available it will insist on water closets being substituted for the existing dirty privies. The days of epidemic enteritis will then be past.

Fermanagh County.

ENNISKILLEN; *Ely*.—The sanitary arrangements at present are fairly good. There were three cases of scarlatina and two of typhoid fever in the district during the quarter.

ENNISKILLEN; *Enniskillen, W.*—Sanitary condition satisfactory.

ENNISKILLEN; *Florencecourt*.—Sanitary condition of district fairly satisfactory.

ENNISKILLEN; *Holywell, No. 1*.—District healthy; no epidemic disease.

ENNISKILLEN; *Lisbellaw*.—Health of district satisfactory.

IRVINESTOWN; *Clonelly*.—No epidemic occurred during the quarter. The health of the district is satisfactory.

IRVINESTOWN; *Ederney*.—District healthy.

IRVINESTOWN; *Irvinestown, W.*—District healthy during quarter. Two deaths registered from pulmonary tuberculosis. One occurred in Rosslare sanatorium. The second, a female, was only resident in district for a few months.

LISNASKEA; *Derrylin*.—A very healthy quarter.

LISNASKEA; *Lisnaskea, W.*—Sanitary state of district fair. Death-rate very low. No infectious disease prevalent.

Londonderry County and County Borough.

COLERAINE; *Aghadowey*.—District very healthy.

COLERAINE; *Garvagh*.—Health of district good. No epidemic during quarter. One death from whooping-cough of a child which came into the district with the disease previously contracted.

COLERAINE; *Kilrea*.—District healthy.

COLERAINE; *Portstewart*.—District healthy.

LIMAVADY; *Bellarena*.—Two cases of faucial diphtheria in the Myroe division of district. Both were removed to hospital and the house disinfected.

LIMAVADY; *Dungiven*.—An epidemic of measles in district.

LIMAVADY; *Limavady, W.*—Health of district good.

MAGHERAFELT; *Maghera*.—District healthy and free from contagious disease, except a few cases of scarlatina, from which there were no deaths.

MAGHERAFELT; *Moneymore*.—An outbreak of typhoid fever occurred, the first cases appearing during first week of August, other cases appearing all through that month, and September also. The disease now seems to be disappearing; cause not exactly made out, but most cases point to milk infection. There were over 30 cases altogether, most of which were removed to hospital and are convalescent. One death took place—a delicate boy, who was too ill to be removed.

Monaghan County.

CARRICKMACROSS; *Carrickmacross, W.*—District in fair sanitary condition; no epidemics.

CARRICKMACROSS; *Donaghmoynce*.—District at present healthy.

CARRICKMACROSS; *Raferagh*.—The sanitary condition of the district continues to improve.

CASTLEBLAYNEY; *Castleblayney, W.*—The very unusual number of eight deaths was registered from cancer during the quarter, and all of them had resided in this district. There were also eight deaths from tuberculosis, of whom two had resided in this district, and six, occurring in the infirmary, were from surrounding districts. Two cases of enteric fever were registered. They belonged to an adjacent district. One case of enteric fever occurred in the town. The patient was removed to the fever hospital, prompt disinfection of the premises and burning of the clothes were carried out by the sanitary authority, and the disease did not spread.

COOTEHILL; *Dawsonsgrove*.—The sanitary condition of the district is fair. Measles was prevalent during the last part of quarter.

COOTEHILL; *Drum, No. 1*.—At the beginning of the quarter measles was prevalent in this district.

MONAGHAN; *Emyvale*.—A fairly severe epidemic of measles prevailed during quarter. District otherwise healthy.

MONAGHAN; *Kilmore*.—District healthy. No epidemic.

MONAGHAN; *Monaghan, W.*—The sanitary arrangements of this town are unsatisfactory.

Tyrone County.

CASTLEDERG; *Castlederg, W.*—Sanitary state of district satisfactory. No epidemics of any kind. Pulmonary tuberculosis still very prevalent in the district; complete isolation and better house accommodation the best preventatives.

CASTLEDERG; *Drumquin*.—The sanitary arrangements in the district are satisfactory, with no infectious disease during the quarter.

CASTLEDERG; *Killeter*.—State of district healthy.

CLOGHER; *Aughnacloy*.—District generally healthy.

CLOGHER; *Fivemiletown*.—The health of the district was pretty good during the quarter.

COOKSTOWN; *Coagh*.—Health of district good. No zymotic disease.

COOKSTOWN; *Stewartstown*.—The district has been very healthy during the quarter. Only eight deaths registered. No infectious diseases.

DUNGANNON; *Benburb*.—Sanitary condition of district good.

DUNGANNON; *Caledon and Ballymagran*.—Epidemic of measles at present in district. Otherwise health of community good.

DUNGANNON; *Clonavaddy*.—Sanitary arrangements good. A few cases of measles during the last month. Four deaths from phthisis, and two deaths from tuberculous meningitis.

DUNGANNON; *Coalisland*.—With the exception of four cases of scarlet fever of a mild type, the district was free from any epidemic.

IRVINESTOWN; *Trillick*.—The health of the people in the district has been good during the quarter.

OMAGH; *Drumquin*.—District healthy.

OMAGH; *Fintona*.—The health of the district has in general been good during the last quarter, and with the exception of four cases of mild scarlatina in one family, free from epidemic diseases. The sanitary arrangements are satisfactory.

OMAGH; *Omagh, No. 1, W.*—Health of district good. Sanitary condition—urban, fair; rural, unsatisfactory. Of the eleven cases of tuberculosis, seven died in district asylum. Three cases of typhoid fever came from rural district. One death in the urban district registered as aged 102 years.

OMAGH; *Omagh, No. 2*.—District healthy.

OMAGH; *Sixmilecross*.—The district is very healthy at present. The only case of infectious disease occurring during the quarter was one of scarlatina.

IV. PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; *Laurencetown*.—There were cases of scarlatina and measles.

CLIFDEN; *Roundstone, No. 1*.—District healthy.

CLIFDEN; *Roundstone, No. 2*.—Health of the district satisfactory.

GALWAY; *Galway, No. 3 (Arran)*.—Health of district good.

GALWAY; *Moycullen*.—There was a mild epidemic of whooping-cough during the quarter.

GALWAY; *Spiddle*.—The health of the district continues satisfactory.

GORT; *Ardrahan*.—Mumps, measles, and whooping cough have extended one after the other over district, and now we have influenza of the gastro-intestinal and catarrhal type.

GORT; *Gort, W.*—There were some cases of measles at the beginning of the quarter, and there are some cases of whooping-cough at present. With these exceptions, the health has been good.

LOUGHREA; *Bullaun*.—The death-rate for the quarter is very low. District has been healthy.

LOUGHREA; *Loughrea, W.*—It is remarkable in this quarter the large proportion of births of females and the small proportion of their deaths.

MOUNT BELLEW; *Killeroran*.—Pulmonary tuberculosis is still prevalent among the small farming class, and as they do not come under the insurable clauses of the Insurance Act, they derive no benefit whatever from the tuberculosis clauses of the Act.

OUGHTERARD; *Cloonbur, No. 1*.—Health of district remarkably good. Sanitation improving.

PORTUMNA; *Eyrecourt*.—Whooping-cough present in early part and scarlet fever in later part of quarter.

PORTUMNA, *Portumnâ, No. 1, W.*—Sanitary condition of district seems good.

TUAM; *Tuam, No. 2*.—An epidemic of whooping-cough in town of Tuam for past two months of a mild type. District otherwise healthy.

Leitrim County.

BAWNBOY; *Ballinamore*.—Sanitary state of district very good.

CARRICK-ON-SHANNON; *Jamestown, W.*—Tuberculosis prevalent, no provision being made for advanced cases, which are allowed to remain in their own dwellinghouses.

MOHILL; *Carrigallen*.—The health and sanitary condition of the district have been good during the quarter.

MOHILL; *Mohill, W.*—District fairly good. No complaints about sanitary arrangements.

MOHILL; *Rinn*.—The district is healthy and free from epidemic.

MOHILL; *Rowan*.—Sanitary arrangements in district are good.

Mayo County.

BALLINA; *Ballina, W.*—Enteric fever has been prevalent during the quarter; two deaths are recorded. One death from typhus fever registered. The sanitary condition of the urban district is improved.

BALLINA; *Crossmolina*.—District continues in fair sanitary condition, free from infectious disease.

BALLINROBE; *Ballinrobe, W.*—Health of district very satisfactory.

BALLINROBE; *Cappaghduff*.—Sanitary arrangements good. No infectious disease in district.

BALLINROBE; *Cong*.—Health of district good.

BALLINROBE; *Hollymount*.—Births and deaths under the average.

BELMULLET; *Binghamstown, W.*—District in a satisfactory state.

BELMULLET; *Knocknalower*.—District in a satisfactory condition.

CASTLEBAR; *Balla*.—District healthy.

CASTLEBAR; *Castlebar, No. 1, W.*—Health of district good. Marked improvement in rural sanitary condition.

CLAREMORRIS; *Ballyhaunis*.—Health of district good. No zymotics. Of the persons whose deaths were registered, five had attained ages varying between 75 and 90 years. Sanitation conspicuously improved. One case of cancer of stomach.

CLAREMORRIS; *Claremorris, W.*—The health of the district is good, and there are no epidemic diseases. Of the seven deaths from tuberculosis, one came from America, dying of the disease, two died in the union hospital and did not belong to this district, one was a tramp from Glennamaddy, and one from Ballindine.

KILLALA; *Killala, W.*—The health of the district during the quarter has been fairly satisfactory. An epidemic of mumps spread over the district, but there were no deaths from the disease. Different forms of tuberculous disease are prevalent.

SWINEFORD; *Foxford*.—The general health of the district has been good during the quarter.

SWINEFORD; *Swineford, W.*—The district has been in a healthy condition during past quarter. There have been two cases of enteric fever.

WESTPORT; *Achill*.—The sanitary arrangements in the district are fairly good. No case of any of the infectious diseases mentioned in the abstracts occurred during the quarter among the inhabitants. There was one case of scarlet fever, a visitor, who, being isolated and having a private nurse, is now almost completely recovered; the precautions taken have prevented it spreading. Eczema is common among new-born children. Scabies is common, being imported by the workers returning home from England and Scotland.

WESTPORT; *Ballycroy*.—District healthy generally. One death from pulmonary tuberculosis. One death registered of a man at 106 years.

WESTPORT; *Islandeady*.—Sanitary condition of district satisfactory.

WESTPORT; *Louisburgh*.—The sanitary condition of district has been very good during quarter. No case of infectious disease occurred during same period. Of 14 deaths registered, 13 are uncertified. Three deaths registered from phthisis and one from cancer.

WESTPORT; *Newport*.—Health of district very good. Sanitation improving very much, though it is regrettable that in some parts of the district cattle are still housed in dwellinghouses.

Roscommon County.

ATHLONE; *Brideswell*.—District continues healthy. Of the seven deaths registered, five were over 75 years and three were over 82 years.

ATHLONE; *Kiltoom*.—Sanitary condition of district satisfactory.

BOYLE; *Boyle, No. 1, W.*—Whooping-cough was prevalent.

BOYLE; *Keadew*.—Sanitary condition of district improving.

CARRICK-ON-SHANNON; *Aughrim*.—There was no case of infectious disease during the quarter. The number of persons suffering from tuberculous disease in any form is at present smaller than it has been for several years.

CASTLEREAGH; *Loughglinn*.—No diseases except some cases of influenza. Sanitation progressive.

STROKESTOWN; *Roosky*.—The deaths of 16 persons over 70 years of age registered during the quarter. One death from sarcoma of shoulder and one from tuberculosis of lungs were also registered.

STROKESTOWN; *Strokestown, W.*—There is no case of infectious disease. One death at 104 years registered during the quarter.

Sligo County.

BOYLE; *Gurteen*.—District healthy.

DROMORE, WEST; *Castleconor*.—Diphtheria prevalent; there were two deaths.

DROMORE, WEST; *Easky, W.*—Health of district good, with the exception of an epidemic of diphtheria. This has now almost subsided. I have heard of no case for past 14 days.

DROMORE, WEST; *Skreen*.—Sanitation of district fairly good.

SLIGO; *Ballymote*.—This district has been very free from epidemics during quarter.

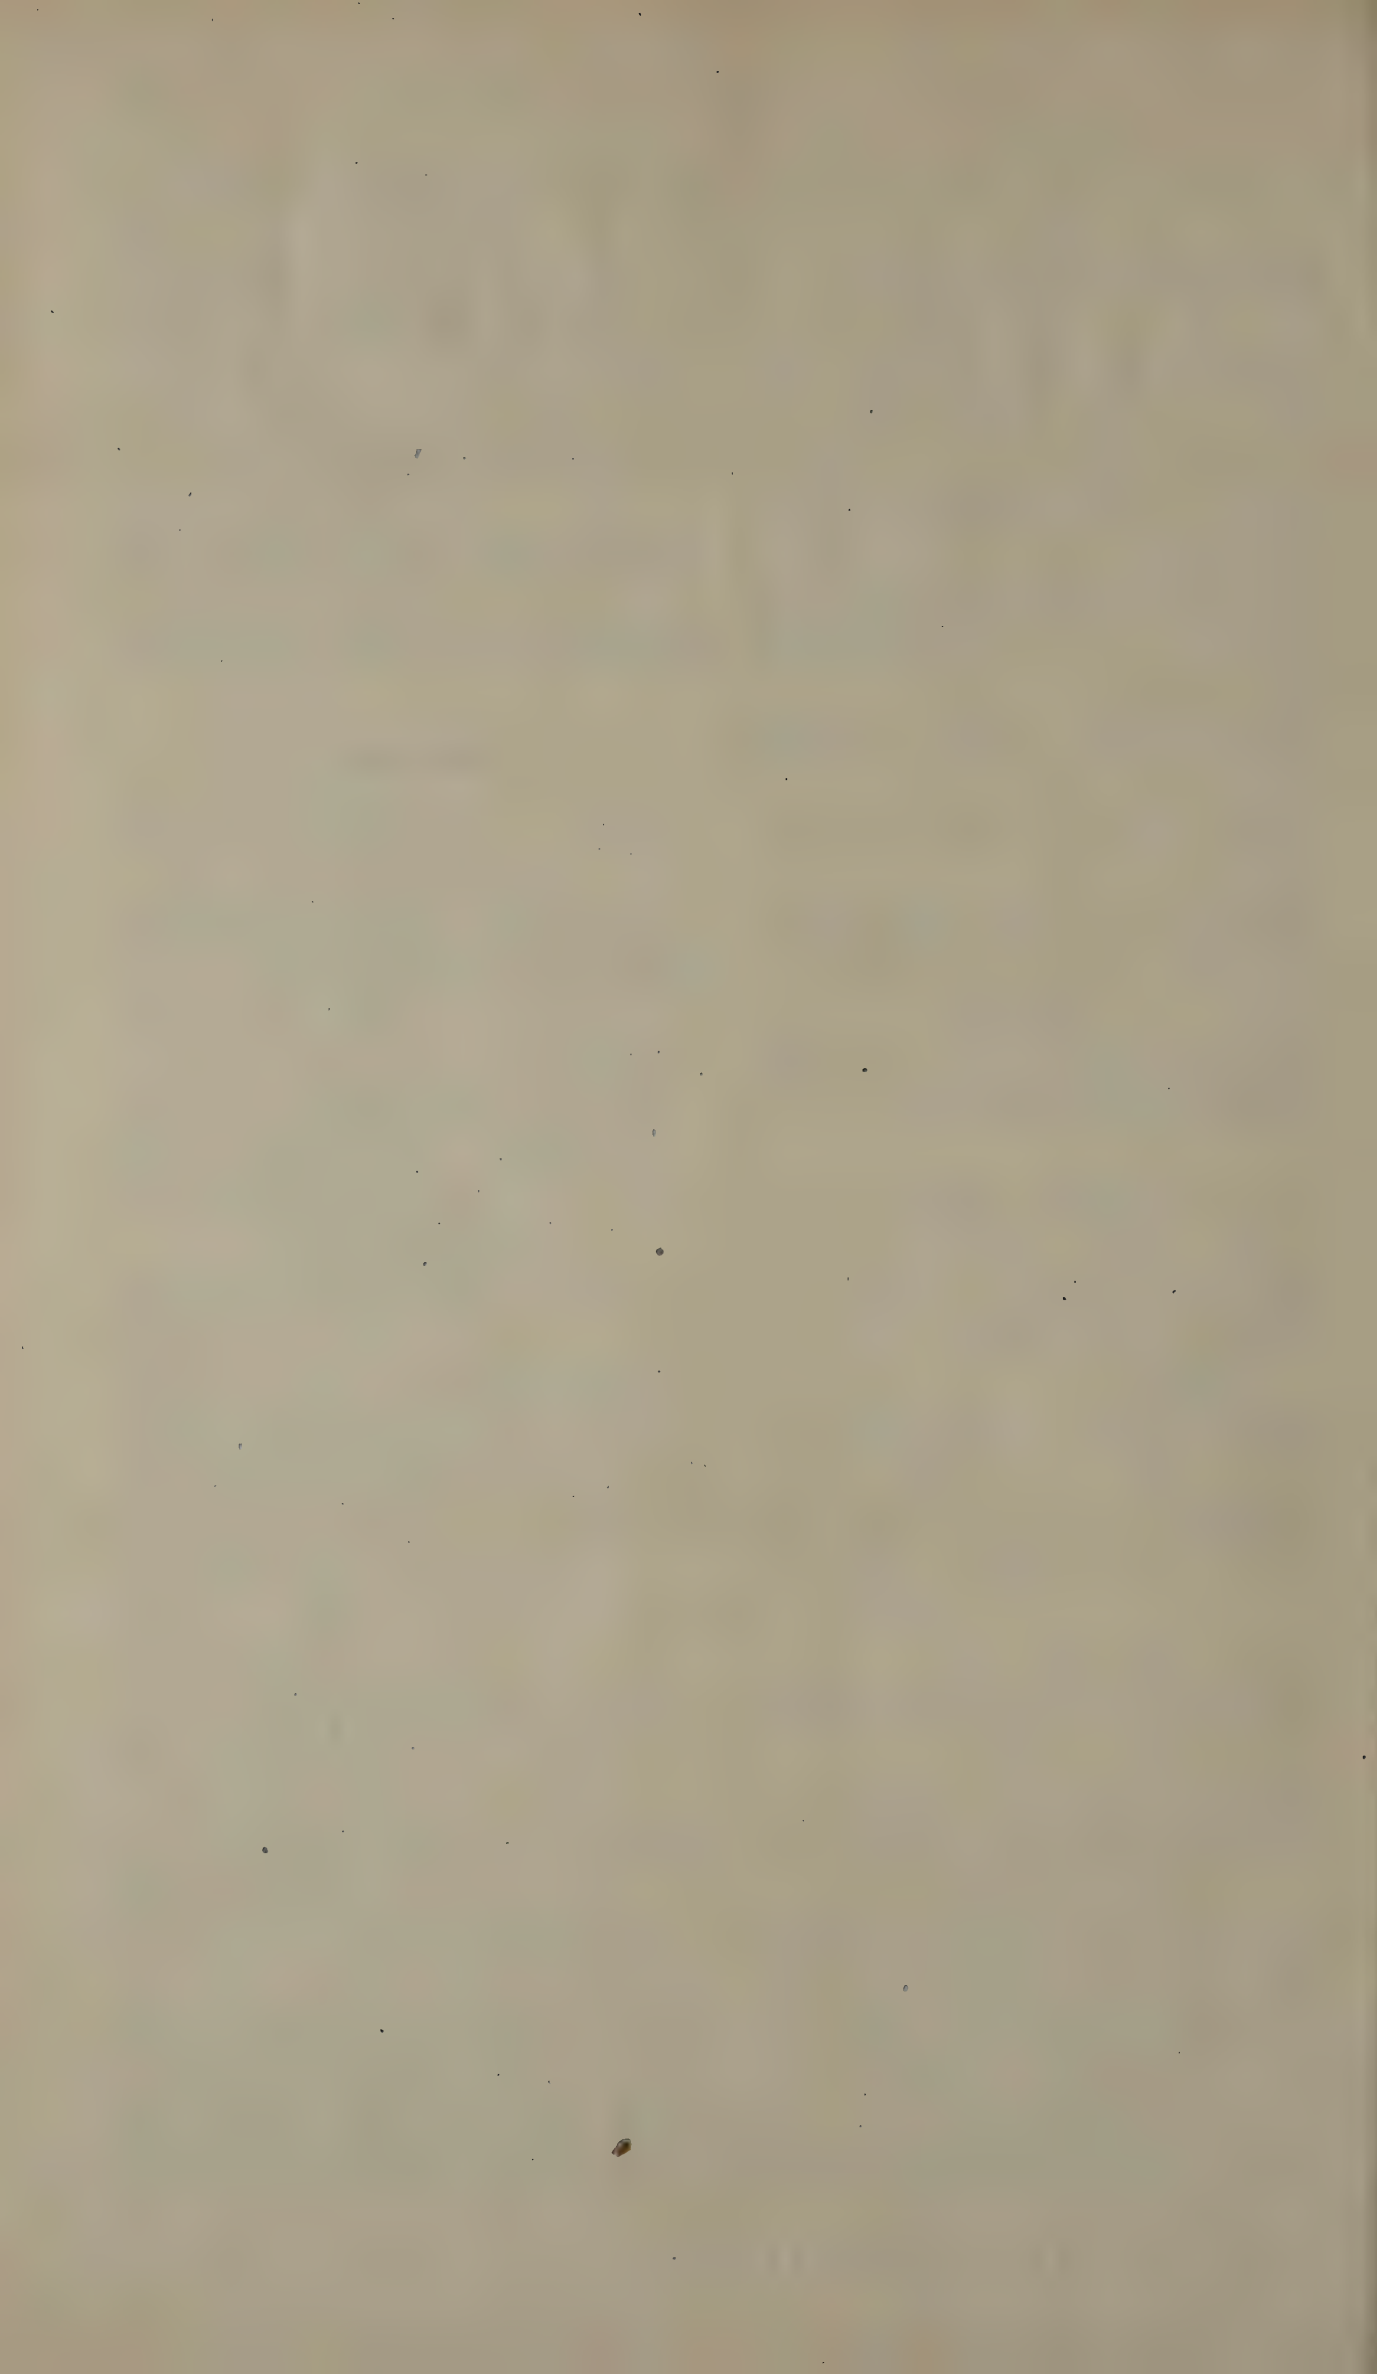

SLIGO; *Collooney*.—Some cases of whooping-cough and three of scarlatina of a mild type during quarter.

SLIGO; *Riverstown*.—District healthy.

TOBERCERRY; *Aclare*.—Sanitary condition of district fairly good. No epidemic occurred during quarter.

TOBERCERRY; *Coolaney*.—Sanitation and health of the district good.

TOBERCERRY; *Tobercurry, W.*—There is nothing particular to report on with the exception of the occurrence of a few cases of scarlatina and two of typhoid fever.

1913.]
4th Quarter.

No. 200.

QUARTERLY RETURN OF THE MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE
PROVINCES, COUNTIES, POOR LAW UNIONS, OR SUPERINTENDENT REGISTRARS'
DISTRICTS, AND REGISTRARS' DISTRICTS IN IRELAND,

WITH

*Certain Detailed Information Relative to the Deaths in each Registrar's District ;
Persons Vaccinated, &c., &c., &c.*

By Authority of the Registrar-General.

Price One Shilling.

Marriages:—JULY, AUGUST, SEPTEMBER, 1913. **Births and Deaths:**—OCTOBER, NOVEMBER, DECEMBER, 1913.

During the quarter ended 31st December last, there were registered in the 831 Registrars' Districts in Ireland 23,314 births—a number equal to an annual birth-rate of 21·3 in every 1,000 of the estimated population*—and 16,479 deaths, representing an annual rate of 15·1 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 4,561 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 22·8 in every 1,000 of the estimated population, and the death-rate 13·2 per 1,000.

The birth-rate in Ireland for the quarter is 0·7 below the average rate for the corresponding quarter of the ten years, 1903–1912, and 0·2 below the rate for the fourth quarter of 1912. The deaths are 903 below those registered in the corresponding quarter of 1912; the death-rate is 0·8 below the rate for that quarter, and 1·1 below the average for the fourth quarter of the ten years, 1903–1912.

In comparison with those for the corresponding quarter of 1912, the returns of pauperism furnished by the Local Government Board show a decrease of 1,668 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 2,182 in the average number of persons on out-door relief.

Compared with the averages for the fourth quarter of the ten years, 1903–1912, the number of Workhouse inmates shows a decrease of 6,632, and the number of persons on out-door relief shows a decrease of 14,736, the total under both heads being 22·5 per cent. under the average for the fourth quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 0·3 per cent.

* See page 290.

The annual marriage-rate (4·9 per 1,000 of the population) represented by the marriages registered during the third quarter of 1913, is equal to the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each PROVINCE and COUNTY in Ireland, the Annual Rate per 1,000 of the population,* represented by the number of MARRIAGES registered during the Quarter ended 30th September, 1913, and by the BIRTHS and DEATHS registered in the Quarter ended 31st December, 1913.

* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry Co. and Co. Borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1911.

MARRIAGES.

The Marriages (5,392) registered in Ireland during the third quarter of 1913 are equivalent to an annual rate of 4·9 per 1,000 of the estimated population, being 0·3 below the rate for the corresponding quarter of 1912, but equal to the average rate for the third quarter of the ten years 1903–1912. Of the total number of marriages, 3,589 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,803 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4·4 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·3 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·1 above, and that under the latter heading 0·3 below the average rate for the corresponding quarter of the previous ten years.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the ten years 1903–1912, and the average number for that period; also the number registered in the first, second, and third quarters of 1913.

BIRTHS.

The number of births registered during the quarter ended 31st December last was 23,314—11,958 boys and 11,356 girls—being equal to an annual ratio of 1 in every 47.0, or 21.3 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years, 1903–12, was 24,174, equivalent to an annual rate of 22.0 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 21.4 per 1,000 of the population according to the Census of 1911; Munster, 21.0; Ulster, 21.5; and Connaught, 20.7.

The highest county or county borough birth-rate* is 28.6 for Dublin county borough, and the lowest 16.5 for Dublin county. Of the intermediate rates the highest five are—Belfast county borough, 25.0; Limerick county and county borough, 23.7; Mayo, 23.2; Tipperary S.R., 22.9; and Donegal, 21.5. The lowest five are—Westmeath, 17.6; Roscommon, 18.1; Meath, 18.3; Kilkenny, 18.4; and Clare 18.4.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st December last was 16,479—8,294 males and 8,185 females—affording an annual ratio of 1 in every 66.4, or 15.1 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1903–12, was 16.2 per 1,000.

The death-rate in Leinster was 16.6 per 1,000 of the population according to the Census of 1911; in Munster, 14.3; in Ulster, 15.4; and in Connaught, 12.2.

The county or county borough death-rates* range from 10.9 in Leitrim to 21.9 in Dublin county borough. Between these rates the lowest five are—Kerry, 11.0; Mayo, 11.8; Roscommon, 11.8; Galway, 12.7; and Kildare, 13.0; and the highest five are—Queen's, 17.5; Kilkenny, 16.9; Tyrone, 16.8; Belfast county borough, 16.3; and Carlow, 15.9.

* See note () on page 226.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years 1903–1912, and the average number for that period; also the number registered during each quarter of the year 1913:—

1913,	23.4	24.3	22.6	21.3	22.9	19.9	18.3	15.0	15.1	17.1

AGES.—Of the 16,479 deaths registered last quarter, 2,234, or 13.6 per cent., were of infants under one year of age; and 6,415, or 38.9 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 95.8 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under one year old equalled 16.4 per cent. of the total deaths registered therein; in Munster, 13.4 per cent.; in Ulster, 12.6 per cent.; and in Connaught, 9.5 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 34.5 per cent.; in Munster, to 41.2 per cent.; in Ulster, to 37.2 per cent.; and in Connaught, to 51.4 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

DISEASES.—The total number of deaths from the principal epidemic diseases* is 1,133, and is equivalent to an annual rate of 1.04 per 1,000 living.

The following tabular statement shows the mortality from some of the principal epidemic diseases, as registered during the December quarter of 1913, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years, 1908–1912.

Name of Disease.	Number of Deaths in Dec. quarter, 1913.	Average number of Deaths in Dec. quarter of the 5 years, 1908–1912.
Enteric Fever,	77	82
Typhus,	6	11
Small-pox,	—	—
Measles,	109	163
Scarlet Fever,	137	62
Whooping-cough,	119	173
Diphtheria,	90	93

* See note (†) on page 233.

ENTERIC FEVER.—The number of deaths from enteric fever registered for the whole of Ireland was 77, a figure corresponding to an annual death rate from this disease of 0·07 per 1,000 of the population of Ireland estimated to the middle of the year 1913.

The average number of deaths for the December quarter of the year 1908–12 was 82 ; in the corresponding period of the year 1912 the deaths from this disease numbered 53, and in each of the earlier periods of the year 1913, the numbers were 80, 46, and 64 respectively.

Of the 77 deaths, 12 occurred in Dublin county borough, and 7 appertained to Belfast county borough, and took place in Ballylessan district, Lisburn union. There was not one death from enteric fever registered in any of the county boroughs of Cork, Londonderry, Limerick, or Waterford.

TYPHUS.—During the corresponding quarters of the preceding five years the average mortality from typhus was 11 ; in the quarter under notice the number of deaths was six, which were registered in the following unions :—in Cork, one death ; Dublin north, one death ; Dublin south, two deaths ; Limerick, one death ; and Loughrea, one death.

SMALL-POX.—Not one death from small-pox was registered during the period now under notice.

MEASLES.—Compared with the corresponding quarter of 1912, there is a large reduction in the mortality from measles ; in that period the number of deaths amounted to 413 ; in the quarter under review the deaths from measles numbered 109, and represent an annual rate of mortality of 0·10 per 1,000 ; in the intervening periods of March, June, and September these deaths were 329, 243, and 211, respectively.

Of the total deaths from measles, 15 were registered in the union of Dublin South ; 8 in each of the unions of Belfast and Callan, and 7 in the union of Galway.

SCARLET FEVER.—The mortality from scarlet fever, unlike that from measles, was greater than the average, the deaths numbered 137, the average being 62 ; the former figure corresponds to an annual rate of 0·13 per 1,000.

As regards the incidence of the mortality from scarlet fever during the period, 46 deaths were registered in Belfast, and 31 deaths of inhabitants of Belfast took place in the Purdysburn Fever Hospital, in the district of Ballylessan, and union of Lisburn ; so that altogether, out of a total of 137 deaths from scarlet fever, 77 belonged to Belfast co. borough.

WHOOPIING-COUGH.—The deaths from whooping-cough during the quarter numbered 119, and were equal to an annual death rate of 0·11 per 1,000. In the December quarter of 1912 such deaths were 125, and in each of the March, June, and September quarters of the year 1913 deaths from whooping-cough were 173, 158, and 122 respectively.

The unions of Belfast and Galway were the principal areas in which the mortality from whooping-cough occurred ; in the former 24 and in the latter 31 deaths from the disease were registered.

DIPHTHERIA.—Deaths from diphtheria, which in the December quarter of 1912 were 82, rose in the March quarter of 1913 to 96, declined in the June quarter of that year to 55, rose slightly to 57 in September quarter, and increased to 90 in the period now under notice. This latter figure is equal to an annual death rate of 0·08 per 1,000 from this disease. The average number of deaths from diphtheria in the corresponding quarter of the five years 1908–1912 was 93. Of the total, 25 belonged to Dublin co. borough, and 12 to Belfast co. borough, 8 of these occurring in Purdysburn Fever Hospital.

DIARRHOEAL DISEASES.—The aggregate number of deaths under this title includes 517 deaths from diarrhoea and enteritis of children under two years of age, and 72 deaths from diarrhoea at all other ages. The annual rate for the former figure is 0·47 per 1,000. Of the 517 deaths of children, 138 were referred to Dublin county borough ; 85 to Cork

county and Cork county borough : 17 to Limerick county and Limerick county borough : 15 to Waterford county and Waterford county borough ; 47 to Belfast county borough : and 21 to Londonderry county and Londonderry county borough.

TUBERCULOUS DISEASE.—As returned by the Registrars, the deaths registered from tuberculous disease amounted to 1,921, and are equal to an annual death rate of 1·75 per 1,000 of the population estimated to the middle of the year.

The following notes have been made by the Registrars on the status of tuberculous disease and other matters relating to public health :—

TULLAMORE ; Kilbeggan.—The continued rarity of cases of tuberculous disease is a gratifying feature.

LISTOWEL ; Ballylongford.—No death from consumption to record. This disease seems to get a great checking in this district compared to old times, thanks to sound advice and new remedies.

LIMERICK ; Caherconlish.—There ought to be some provision made for cases of tuberculosis which are considered incurable.

CAVAN ; Killeshandra.—District healthy, notwithstanding the insanitary state of many of the labourers' cottages that are unfit for human habitation, but which are good breeding houses for pulmonary tuberculosis from rain and insufficient light and ventilation ; also the cubic space for fresh air is inadequate. The Jubilee nurse is doing good work in the district.

COLERAINE ; Portstewart.—I am of opinion that the proper housing of the poor, or working classes, and the thorough disinfecting of houses in which tuberculous patients have lived and died, will do more to stamp out tuberculosis than the building and equipment of costly sanatoria, however necessary the latter may be as a help to this desirable end. The notification and disinfecting of the tuberculous houses has been too long delayed.

CLAREMORRIS ; Ballyhaunis.—Sanitation progressive, a marked improvement being everywhere observable in the dwellings in regard to cleanliness, light, and ventilation.

If, as suggested by me to the District Council, the registration of common lodging-houses in this town was made compulsory, it would go far towards restricting and stamping out epidemic disease.

CASTLEREAGH ; Loughglynn.—There is a continued improvement in the houses of the people. There was one death from tuberculosis.

KENMARE ; Kilgarvan.—Pulmonary tuberculosis seems to be on the increase in this district.

ROSCREA ; Shinrone.—Five of the thirteen deaths registered during quarter were from pulmonary tuberculosis.

CANCER.—There were 946 deaths from cancer or malignant disease, equal to an annual rate of 0·86 per 1,000 ; in each of the preceding quarterly periods the rates for cancer were 0·79, 0·77, and 0·84 respectively.

POLIOMYELITIS.—Six cases, with 2 deaths, are reported from Dirraw, Ballymoney union : one fatal case from Caledon and Ballymagran district, Dungannon union ; another fatal case from Stewartstown, Cookstown union ; a severe epidemic, with 8 deaths, in Coagh, Cookstown union ; in Aghadowey, Coleraine, there were 10 cases and 3 deaths. The Registrar of the latter district remarks :—“The epidemic appeared only along the margin of the river Bann, where during the wet season the lands were considerably flooded.”

VIOLENCE.—The deaths attributed to violence, in number 212, include those deaths returned as being caused by accident, homicide, or suicide.

The Registrars, in their Notes, report the presence of the following diseases:—Enteric fever in 19 districts, typhus in one district, measles in 27 districts, scarlet fever in 41, whooping-cough in 23, diphtheria in 25, influenza in 11, mumps in 3, chicken pox in 3, and poliomyelitis in 6. [See Appendix to this Report commencing on page 291.]

INQUESTS.—There were 457 inquests reported to the Registrars during the quarter; this number being equal to 1 in every 36 of the total deaths registered.

In Leinster there was 1 inquest to every 32 deaths registered, in Munster 1 to 48, in Ulster 1 to 29, and in Connaught 1 to 116.

DEATHS IN PUBLIC INSTITUTIONS.—Of the 16,479 deaths registered, 3,307, or 20·1 per cent., occurred in public institutions. In Leinster the percentage was 26·1, in Munster 23·4, in Ulster 15·6, and in Connaught 12·6.

UNCERTIFIED DEATHS.—According to the returns, 3,566 of the 16,479 deaths which were registered during the quarter were uncertified, being 22 per cent. of the total. In Leinster the percentage was 15, in Munster 25, in Ulster 16, and in Connaught the uncertified deaths were 50 per cent. of the total deaths registered in the province.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 31st December, 1913, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population:—

PERIOD.		Total Deaths registered.	Deaths from Principal Epidemic Diseases.										
			Enteric Fever.	Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Diarrhical Diseases.	Total.	Percentage of Total Deaths.	Number in every 100,000 of the Population.

URBAN DISTRICTS.

Separate Statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 17·1, and the birth-rate 24·3 per 1,000 of the population; in the remainder of the country the death-rate was 14·0 and the birth-rate 19·8 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases † in the Urban Districts during the quarter was 2·1 per 1,000 of the population; in the remainder of the country the rate was 0·5 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the FOURTH QUARTER of the year 1913, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES †; from TUBERCULOUS DISEASE, and from CANCER, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-six Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 27th December, 1913.

(a) Including the deaths of 6 persons from enteric fever, 31 from scarlet fever, 7 from diphtheria, and 3 from tuberculous meningitis, admitted from the City of Belfast to the hospital for infectious diseases at Purdysburn, in the Registrar's District of Ballyleson, and Union of Lisburn, and one death from cerebro-spinal meningitis registered in Belfast.

* Enteric fever, typhus, small-pox, measles, scarlet fever, whooping-cough, diphtheria, dysentery, and diarrhoeal diseases.

† The rates for the districts in the Dublin Registration Area and for Belfast and Londonderry have been calculated on the population estimated to the middle of 1913.

VACCINATION.

According to the Returns of Primary Vaccinations received for the fourth quarter of the year 1913, there were 15,872 persons successfully vaccinated.

EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 31st December last was 4,561 (2,123 males and 2,438 females), being 314 less than in the corresponding quarter of the year 1912, and 667 below the average number for the fourth quarter of the ten years 1903-1912.

TABLE VI.—EMIGRATION from IRELAND during the months of October, November, and December in 1912 and 1913 :—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1912.	1913.	In-crease.	De-crease.	1912.	1913.	In-crease.	De-crease.	1912.	1913.	In-crease.	De-crease.
October, .	1,406	1,262	—	144	1,723	1,717	—	6	3,129	2,979	—	150
November,	668	598	—	70	606	553	—	53	1,274	1,151	—	123
December,	274	263	—	11	198	168	—	30	472	431	—	41
TOTAL,	2,348	2,123	—	225	2,527	2,438	—	89	4,875	4,561*	—	314

* Including 3,325 emigrants to the United States of America, viz. :—2,342 in the month of October, 757 in November, and 226 in December. Of 2,738 steerage passengers, 696 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 6*d.*, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the fourth quarter of the year 1912 the average price was 6½*d.*, and in the corresponding quarter of 1903 it was 5½*d.*

The average price of oatmeal (1st quality) in Dublin for the quarter was 16*s.* per cwt. For the corresponding quarter of the year 1912 the average price was also 16*s.*, and for the fourth quarter of 1903 the average price was 14*s.* 6*d.* per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 2*s.* 11*d.* to 3*s.* 3*d.* In the fourth quarter of 1912 the average prices were 4*s.* 2*d.* to 4*s.* 7*d.*, and the prices for the corresponding quarter of 1903 were 3*s.* 3*d.* to 3*s.* 10*d.*

The average price per cwt. of beef at the Dublin Cattle Market was 48*s.* to 64*s.*, as against 46*s.* 6*d.* to 57*s.* 6*d.* for the fourth quarter of 1912, the price for the fourth quarter of 1903 ranging from 50*s.* to 55*s.*

The price (including cartage) of Whitehaven coal in the City of Dublin ranged from 26*s.* to 33*s.* per ton nett.

The highest price of Consols at the Dublin Stock Exchange for the quarter was 73½, and the lowest 71.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during last quarter was 5 per cent.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the fourth quarter of 1913 was 35,897, or 1,668 below the average for the corresponding period in 1912.

The average weekly number of persons receiving out-door relief during the quarter was 37,524, being 2,182 below the average for the fourth quarter of 1912.

Of the persons receiving in-door relief during the fourth quarter of 1913, an average number of 1,662 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1912 the average weekly number was 1,651.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FOURTH QUARTER of the year 1913, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES OF PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM.	
									No. OF PERSONS RELIEVED.	
	BREAD (4lb. Loaf.)		OATMEAL (Corn Exchange), per Cwt. 1st quality.	POTATOES (at Potato Market) per Cwt.		BEEF (at the Dublin Cattle Market), per Cwt.		In-door.	Out-door.

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4-lb. loaf delivered; the price in Messrs Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4-lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the "Dublin Gazette"; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the fourth

* Latitude 53° 21' 48.25" north; longitude 6° 20' 59.15" west. Height above the mean sea level 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

quarter of the years 1908 to 1913, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 241).

The mean height of the barometer during the fourth quarter of 1913 was 29·896 inches, being 0·226 above the average for the corresponding quarter of the five years 1908–1912; the highest reading (30·724 inches) was on the 21st December at 9 A.M., air calm, and the lowest (28·934 inches) on the 29th October, at 9 A.M., wind S.E.

The mean temperature of the air during the quarter was 46·2°, being 1·3° above the average for the fourth quarter of the 5 years, 1908–1912.

The maximum temperature of the air during the quarter was 66·0° and the minimum 19·0°. The maximum heat in sun was 101·8°.

Rain or snow fell on 52 days during the quarter. The rain-fall measured 8·585 inches being 0·917 inches above the average for the fourth quarter of the five years, 1908–1912. The greatest monthly rainfall was in October, when 4·430 inches were registered.

The wind blew on 36 days from W., on 11 days from S.W., on 9 days from S., on 7 days from S.E., on 4 days from E., on 2 days from N.E., on 2 days from N.W., on one day from N., and the air was calm on 20 days at 9 A.M.

October.—The mean height of the barometer during this month was 29·780 inches; the highest reading (30·336 inches) was on the 23rd, at 9 P.M., air calm; and the lowest (28·934 inches) on the 29th, at 9 A.M., wind S.E. The mean temperature of the air was 50·7°, the maximum registered was 66·0°, and the minimum 25·4°. The 19th was the warmest day, and the 24th the coldest night. The mean of the dry bulb was 50·9°, and of the wet bulb, 49·0°. The maximum heat in the sun was 101·8°, and the minimum on the grass 22·0°. The total amount of sunshine recorded was 88·2 hours, the greatest daily amount being 8·3 hours on the 20th. The minimum on the grass was below 30° on 4 nights. The maximum ozone was 0·8, the minimum 0·0, and the mean 0·5. Rain or snow fell on 18 days. The rain-fall measured 4·430 inches; the greatest amount in 24 hours was 1·420 inches on the 5th.

November.—The mean height of the barometer during this month was 29·795 inches; the highest reading (30·449 inches) was on the 28th, at 9 A.M., wind W., and the lowest (29·069 inches) on the 12th, at 9 A.M., wind W. The mean temperature of the air was 46·4°, the maximum registered was 60·0°, and the minimum 29·0°. The 1st was the warmest day, and the 4th the coldest night. The mean of the dry bulb was 46·4°, and of the wet bulb 44·9°. The maximum heat in sun was 86·0°, and the minimum on the grass 26·0°. The total amount of sunshine recorded was 80·0 hours, the greatest daily amount being 7·1 hours on the 3rd. The minimum on the grass was below 30° on 2 nights. The maximum ozone was 0·8, the minimum 0·2, and the mean 0·6. Rain or snow fell on 22 days. The rain-fall measured 2·240 inches; the greatest amount in 24 hours was 0·500 inch on the 7th.

December.—The mean height of the barometer during this month was 30·112 inches, the highest reading (30·724 inches) was on the 21st at 9 A.M., air calm, and the lowest (29·190 inches) on the 3rd, at 9 P.M., wind W. The mean temperature of the air was 41·4°; the maximum registered was 55·6°, and the minimum 19·0°. The 26th was the warmest day, and the 31st the coldest night. The mean of the dry bulb was 40·6°, and of the wet bulb 39·4°. The maximum heat in sun was 66·1°, and the minimum on the grass 16·2°. The total amount of sunshine recorded was 35·9 hours, the greatest daily amount being 5·7 hours on the 29th. The minimum on the grass was below 30° on 9 nights. The maximum ozone was 0·7, the minimum 0·0, and the mean 0·4. Rain or snow fell on 12 days. The rain-fall measured 1·915 inches; the greatest amount in 24 hours was 0·380 inch on the 3rd.

THE YEAR 1913.

The total number of births registered in Ireland during the year 1913 (as returned by the Registrars) was 100,232, or 22·9 per 1,000 of the population estimated in the middle of the year, and the total number of deaths was 74,713, or 17·1 per 1,000. Of the 74,713 deaths, 4,581, equal to 1·0 per 1,000 living, were caused by one or other of the principal epidemic diseases,† in the Urban Districts, which contain nearly one-third of the total population, the birth-rate was 26·6 per 1,000 of the population; the death-rate (all causes), 19·0, and the epidemic death-rate, 2·1 per 1,000. The corresponding rates for the remainder of the country are—births, 21·0; deaths from all causes, 16·1; and deaths from the principal epidemic diseases, 0·5. According to the returns of Vaccination furnished by the Registrars there were 67,907 successful primary vaccinations performed during the year.

URBAN DISTRICTS.

TABLE VIII.—BIRTHS and DEATHS registered during the YEAR 1913, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of Deaths from each of the PRINCIPAL EPIDEMIC DISEASES,† from all forms of TUBERCULOUS DISEASE, and from CANCER, Malignant Disease, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin, and the Urban Districts of Rathmines and Rathgar, Penbrooke, Blackrock, and Kingstown. The details for it and for each of the twenty-six Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars and relate to the fifty-two weeks ending Saturday, 27th December, 1913.

METEOROLOGY.*

[Prepared in the Meteorological Office under the direction of W. N. Shaw, Esq., LL.D., Sc.D.
F.R.S.]

The weather of the quarter was upon the whole very mild, no frost of any consequence being reported until very nearly the end of December. The earlier half of the period was marked by frequent heavy falls of rain, accompanied in some instances by thunder and lightning. In the latter half the weather became drier, and at many places in the south the rainfall of December amounted to much less than the average. Fog or mist occurred rather frequently on the coast, and snow or sleet fell generally during the spell of northerly winds which set in at the close of the quarter.

October was marked by a predominance of winds from some southerly quarter (South-East to South-West), a strong south-easterly gale being experienced on the 9th in nearly all districts. Mild weather prevailed with scarcely any interruption, the highest temperatures occurring as a rule about the middle of the month, mostly between the 12th and 17th, when the thermometer rose to between 60° and 65° in all places. At Dunfanaghy a reading of 67° was recorded on the 17th, while at Lisburn a similar reading was observed as early as the 4th. The only frost of any note occurred early on the 24th, when the thermometer in the screen fell to 20° at Limerick (Mungret College) and to 23° at Clongowes Wood. Heavy falls of rain occurred over the southern half of the country on the 4th or 5th (as much as 2.1 in. being measured at Killarney on the former day, and 1.4 in. at Dublin, Phoenix Park, on the latter), on the coast of Mayo on the 13th (1.6 in. at Blacksod Point), and in many isolated places on the 19th and 20th. The sunshine of October was rather deficient in the eastern districts, but was in excess of the average in the west and south.

In *November* there was an unusual predominance of strong winds from the south-westward, with gales between the 1st and 3rd, on the 13th and 15th, and on the 19th and 20th. Owing to the almost constant prevalence of equatorial breezes the weather remained very mild, the rarity of frost being more noticeable even than in October. At a large majority of the meteorological stations the thermometer failed to sink as low as 30° , and in many places it did not fall to 35° . The only instance, in fact, of any frost worthy of mention was on the early morning of the 22nd, when the sheltered thermometer fell to 27° at Kilkenny and 28° at Lisburn. Rain, although frequent, was seldom very heavy, the most noticeable exceptions occurring on the 10th, when 1.2 in. fell at Ballinacurra, and on the 23rd, when 1.3 in. fell at Dunfanaghy, 1.6 at Blacksod Point, and 2.0 in. at Enniscoe. The amount of bright sunshine in November was generally a little in excess of the average, but at Valencia (Cahirciveen) there was a large deficiency, the mean duration showing a loss of nearly one hour per day.

In *December* the winds were mainly from the westward or north-westward, and although the weather until very nearly the end of the month was again mild, the excess of warmth was less marked than in October or November. Strong gales were experienced on the 3rd-4th, on the 16th and on the 26th; on the 4th the wind at Quilty, Co. Clare, blew in gusts with a velocity of 72 miles per hour. The highest temperatures occurred on the 8th, when the thermometer exceeded 55° in most parts of the country, and touched 59° at Dublin and Kingstown. No frost of any note was experienced until the closing week, when a strong breeze swept down from the northward, the squalls being accompanied by hail, sleet, or snow, and in a few places by thunder and lightning. After Christmas Day the thermometer fell steadily, the frost reaching its maximum severity early on the 31st when the sheltered thermometer fell below 20° in nearly all the inland districts. In the southern parts of the country December was a very dry month, but in the north a heavy fall of rain on the 3rd raised the total to a point slightly in excess of the average. The largest amounts of rain reported on that day were 1.5 in. at Killarney, 1.4 at Mount Callan, and 1.3 in. at Caragh Lake. Bright sunshine in December was mostly a little below the average.

* For Meteorology of the Fourth Quarter at Phoenix Park see "Quarterly Summary."

The *mean temperature* of the quarter was above the normal (the excess being greatest over the northern half of the country), and was higher than in any recent year excepting 1908, when the quarter was much milder than in 1913. The highest temperatures occurred around the middle of October, when the thermometer touched 65 in several parts of the country, and rose slightly above that level at a few places in the north. The lowest temperatures were recorded quite at the close of the period, when a sharp frost was experienced, for the first time in the season, over the entire country. On December 31st, the thermometer in the screen fell below 20° at most of the inland stations and touched 17° at Markree Castle, Armagh, and Newtownforbes. In the earlier part of the quarter the only frost of any consequence occurred on or about October 24th, when the thermometer sank below 25° in a few isolated places, and reached 20° at Limerick.

The *Rainfall* of the quarter was slightly in excess of the average to the extent of 4 per cent. in the northern half of the country and 3 per cent. in the south. In the north the number of days with a measurable quantity agreed precisely with the normal, but in the south it was above the average. Individual falls of considerable weight were common in October and November, but in the second and third weeks of December the weather was mostly dry, few places experiencing in the fortnight as much as half an inch of rain.

The total duration of *Bright Sunshine* was a trifle below the average in the southern parts of the country, but above it in the north. The brightest weather occurred during the week ended October 25th, when most places recorded between 55 and 60 per cent. of the possible amount, and Phoenix Park as much as 69 per cent. of the possible.

MARRIAGES Registered during the Quarter ending 30th September, 1913, in PROVINCES, COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS (or POOR LAW UNIONS) of IRELAND; **BIRTHS AND DEATHS** Registered during the Quarter ending 31st December, 1913; Deaths from ENTERIC FEVER, TYPHUS, SMALL-POX, MEASLES, SCARLET FEVER, WHOOPING-COUGH, DIPHTHERIA, DYSENTERY, TUBERCULOUS DISEASE, CANCER, DIARRHŒA AND ENTERITIS OF CHILDREN under 2 years, DIARRHŒA OF PERSONS aged 2 years and upwards; also VIOLENT DEATHS,* INQUEST CASES, DEATHS IN PUBLIC INSTITUTIONS, and NUMBER OF UNCERTIFIED DEATHS Registered during the Quarter ending 31st December, 1913, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS OF IRELAND; with a Return of **VAGGINATIONS** for that Quarter.

ABSTRACT I.—PROVINCES AND COUNTIES.

* Throughout this Return the Unions and Districts have been grouped according to the Administrative Counties as formed under the Local Government (Ireland) Act, 1898.

† Including accidental deaths, homicides, and suicides.

‡ The Returns for Fortive District, in Nenagh Union, and for Ballaghaderreen District, in Castlereagh Union, not having been received in time for press, the numbers of Births and Deaths registered in the corresponding Quarter of 1912 have been adopted.

NOTE.—This table has been constructed for the years 1839 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1913.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—There were four deaths from measles registered during last quarter. The sewerage system of the Hacketstown portion of my district is very defective.

CARLOW; *Bagenalstown*.—Health of the district during the quarter has been good. Eleven deaths registered, ages of seven ranging from 70 to 86 years.

CARLOW; *Carlow No. 1, W*.—Sanitation of town very bad. Diarrhoea prevalent.

CARLOW; *Fennagh and Myshall*.—There was a severe epidemic of bronchial influenza during the quarter.

CARLOW; *Leighlinbridge*.—Health of district good; no tuberculosis in district.

NEW ROSS; *St. Mullins*.—Sanitary arrangements in the district good.

Dublin County.

BALROTHERY; *Kilsallaghan*.—District healthy.

CELBRIDGE; *Rathcoole*.—District healthy.

DUBLIN, SOUTH; *Rathmines No. 1*.—A very considerable number of cases of diphtheria and pseudo-diphtheria present in district.

RATHDOWN; *Blackrock and Stillorgan No. 2*.—District very healthy during the quarter.

RATHDOWN; *Dundrum and Glencullen No. 1*.—One unknown death, as only a portion of the body was found. Inquest held on same. Two other inquest cases from Criminal Asylum, Dundrum.

Dublin County Borough.

DUBLIN, NORTH; *North City, No. 1, West*.—No special illness.

DUBLIN, SOUTH; *New Kilmainham*.—The sanitary arrangements are very good; there has been no epidemic in the district.

Kildare County.

ATHY; *Athy, W*.—General sanitation of district is good. District has been very free from infectious disease.

ATHY; *Castledermot*.—Mild scarlatina prevalent during quarter.

ATHY; *Monasterevin*.—The sanitary arrangements have improved very much.

CELBRIDGE; *Maynooth*.—District fairly healthy, except for an epidemic of measles in Leixlip E. D.

EDENDERRY; *Carbury*.—A few mild cases of scarlatina.

NAAS; *Ballymore Eustace*.—The health of the district is good, and free from infectious disease.

NAAS; *Newbridge*.—Of the four uncertified deaths in this quarter's returns, three occurred in people over 60 years of age, one of whom died somewhat suddenly. The fourth death occurred in an infant a few minutes after birth, no doctor being present.

NAAS; *Kilmeage*.—Sanitary condition of district good.

Kilkenny County.

CALLAN; *Callan, W*.—An epidemic of measles of a severe form occurred in the early part of the quarter. The district is now free from infectious disease, and is in a healthy condition.

CALLAN; *Kilmaganny*.—District healthy.

CASTLECOMER; *Castlecomer W*.—The district is in a healthy state, and free from any epidemic.

KILKENNY; *Freshford*.—There were several cases of infectious jaundice.

KILKENNY; *Gowran*.—The sanitary condition of the district is good.

KILKENNY; *Tiscoffin*.—District in a healthy condition.

KILKENNY; *Tullaroan*.—District in a healthy condition.

NEW ROSS; *Dysartmoon*.—District healthy.

THOMASTOWN; *Inistioge*.—District healthy.

THOMASTOWN; *Knocktopher*.—There was a very severe epidemic of measles during the early portion of quarter just ended, which was followed by pulmonary complications. However, it passed over without causing any mortality.

URLINGFORD; *Urlingford, W.*—Health of district fairly good. No epidemics. One case of mild form of scarlet fever treated in fever hospital.

King's County.

BIRR; *Birr, W.*—I had a few cases of catarrhal jaundice in children.

BIRR; *Frankford*.—District fairly healthy. Two deaths from tuberculosis.

BIRR; *Killyon*.—District healthy.

BIRR; *Kinnitty*.—Sanitary state of district good; no contagious or infectious disease.

MOUNTMELICK; *Clonygowan, No. 2*.—The district is fairly healthy. Sanitary condition satisfactory.

ROSCREA; *Roscrea No. 2*.—District healthy.

ROSCREA; *Shinrone*.—Five of the thirteen deaths registered during quarter were from pulmonary tuberculosis. Sanitary condition of district good.

TULLAMORE; *Clara*.—District in sanitary condition.

TULLAMORE; *Killoughy*.—Whooping-cough very prevalent; no deaths from same.

TULLAMORE; *Philipstown*.—District healthy.

Longford County.

BALLYMAHON; *Abbeyshrule*.—Sanitary arrangements good.

BALLYMAHON; *Ballymahon, W.*—The sanitary condition of the district is satisfactory. There has been a very large increase of rheumatic trouble during the past quarter.

GRANARD; *Ballinalee*.—I beg to state that the sanitary condition of the district is fair, and free from contagious disease.

GRANARD; *Granard, W.*—The district is free from contagious disease at present. There were a few cases of diphtheria, but they were removed to hospital, and are now cured.

GRANARD; *Scrabby, No. 2*.—Health of the district good. Almost three times as many births as deaths are recorded.

Louth County.

ARDEE; *Castlebellingham*.—District very healthy.

ARDEE; *Collon No. 1*.—District healthy.

ARDEE; *Dunleer*.—District healthy.

DROGHEDA; *Drogheda, No. 2*.—There were some cases of measles in the district, but no death resulted from this disease.

DUNDALK; *Barronstown*.—The district is in a healthy state.

Meath County.

ARDEE; *Collon, No. 2*.—District in a very healthy state.

ARDEE; *Drumcondra*.—District in a very healthy state.

DROGHEDA; *St. Mary's*.—Sanitary state of district good.

DUNSHAUGHLIN; *Killeen*.—The district is in a most satisfactory condition.

EDENDERRY; *Ballyboggan*.—Health of district good.

KELLS; *Nobber*.—The district upholds its position, free from contagious diseases; it also maintains its longevity record, as eleven of the deaths registered average 74 years.

NAVAN; *Painestown*.—No epidemic disease prevalent in district during quarter. Sanitary condition good.

OLDCASTLE; *Oldcastle, W.*—The district continues in a satisfactory condition.

TRIM; *Athboy*.—Sanitary condition of district satisfactory.

TRIM; *Summerhill*.—Health of district good; only one case in which death was due to tuberculosis.

Queen's County.

ABBEYLEIX; *Durrow*.—District in a very healthy state. Sanitation very fair.

ABBEYLEIX; *Rathdowney*.—The sanitary arrangements in district are good.

ATHY; *Stradbally*.—The sanitary condition of the district is fairly good at present.

CARLOW; *Carlow, No. 2*.—Sanitation fairly good.

MOUNTMELICK; *Clonygowan No. 1*.—The district is fairly healthy. Sanitary condition satisfactory.

ROSCREA; *Borris-in-Ossory*.—The health of this district has been fair during the past quarter.

Westmeath County.

ATHLONE; *Glassan*.—There were some cases of typhoid in the district during the quarter.

BALLYMAHON; *Ballymore*.—The district is in a healthy condition. One death from cancer. No deaths from tubercular disease.

DELVIN; *Clonmellon*.—Public health satisfactory.

MULLINGAR; *Ballynacarrigy*.—The quarter under review was remarkable for being mild, and the majority of deaths was of persons over 65 years. One death is attributed to pulmonary tuberculosis, and two are attributed to carcinoma.

MULLINGAR; *Castletown Geoghegan*.—For a rural district, sanitary condition satisfactory.

MULLINGAR; *Killucan*.—District is healthy.

MULLINGAR; *Milltown*.—The sanitary arrangements are now all that can be desired.

MULLINGAR; *Mullingar, W.*—Health of the district is good.

TULLAMORE; *Kilbeggan*.—District free from zymotic disease. The continued rarity of cases of

tuberculous disease is a gratifying feature. Digestive disturbances, beginning in early middle age, and often terminating in malignant growths, appear to be common, and in part, at least, are due to dietetic errors, especially excessive tea-drinking.

Wexford County.

ENNISCORTHY; *Killann*.—Some cases of scarlatina and whooping-cough.

GOREY; *Camolin*.—District continues healthy.

GOREY; *Killenagh and Wells*.—The district is free from infectious disease.

NEW ROSS; *Fethard, No. 2*.—Measles was prevalent early in the quarter.

NEW ROSS; *Templeludigan*.—District healthy.

WEXFORD; *Bannow*.—The sanitary condition is very satisfactory. There are no infectious diseases.

WEXFORD; *Bridgetown*.—Measles of a severe type has been prevalent in district during past quarter.

Wicklow County.

BALTINGLASS; *Kiltegan*.—Health of district normal.

NAAS; *Blessington*.—The health of the district has been good; no infectious disease prevalent during quarter.

RATHDOWN; *Bray, No. 1*.—Births and deaths about the average.

RATHDOWN; *Delgany*.—Health of district good.

RATHDRUM; *Annamoe*.—District healthy during quarter.

RATHDRUM; *Newcastle*.—General health of district very good.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; *Ballyvaghan, W*.—Health of district fairly good.

CORROFIN; *Corrofin, W*.—Health of district good.

ENNIS; *Crusheen*.—Health of district good.

ENNIS; *Newmarket*.—The sanitary condition of the district is satisfactory, and the general health of the people good. There have been no outbreaks of infectious diseases during the quarter.

ENNISTIMON; *Ennistimon, W*.—The health of the district is satisfactory.

ENNISTIMON; *Milltown-Malbay*.—The sanitary arrangements are fair. Some houses in Ennistimon road in town are practically unfit for human habitation. The schools are in a very wretched condition.

ENNISTIMON; *Roadford*.—District very healthy. Sanitary arrangements satisfactory.

KILLADYSERT; *Labasheeda*.—The health of the district continues good.

KILRUSH; *Carrigaholt*.—A few cases of scarlet fever in month of October, and three or four cases of whooping-cough in December, otherwise health of district very good.

KILRUSH; *Kilkee*.—The health of the district is fairly good.

KILRUSH; *Kilrush, W*.—District healthy.

LIMERICK; *Bridgetown*.—District healthy.

LIMERICK; *Coolacasey*.—The health of the district is very good, and the sanitary condition is satisfactory. There was one case of scarlet fever, which was promptly removed to hospital.

SCARRIFF; *Feakle*.—Health of district good.

SCARRIFF; *Mountshannon, W*.—District continues in a healthy state.

SCARRIFF; *Quin*.—Sanitary condition of Quin village bad. Two cases of enteric during quarter; probably due to bad sanitary surroundings.

Cork County.

BANDON; *Innishannon*.—Sanitation fair and district healthy.

BANDON; *Kilbrittain*.—District very healthy.

BANTRY; *Bantry, W*.—The sanitary condition of district is good. Two cases of cancer.

BANTRY; *Durrus and Kilcrohane*.—The sanitary arrangements are pretty good. Some persons keep manure heaps too close to their dwellinghouses. The general health of the district is good.

BANTRY; *Glengarriff*.—The district is very healthy.

BANTRY; *Kealkill*.—Health and sanitary condition of district good.

CORK; *Carrigaline, No. 1*.—A few mild cases of influenza during the quarter; district otherwise in its usual healthy condition.

CORK; *Dripsey*.—There were a few cases of infantile diarrhoea for the early part of this quarter, and one death.

CORK; *Queenstown, No. 2*.—Mumps prevalent.

CORK; *Whitechurch*.—District healthy.

DUNMANWAY; *Ballineen*.—Birth rate reduced.

DUNMANWAY; *Coolmountain*.—An epidemic of measles occurred all through the district during the quarter, happily without a single fatal result. Otherwise the health of the district is particularly good. Six of the nine deaths registered were of persons over 68 years, and three of those were over 80. There was one accidental death. There were no deaths registered as a result of cancer or tuberculosis. Gastro-enteritis attacked a goodly number of adults during the first month of the quarter. The people are keeping their dwellings more cleanly, and the labourers are realising the importance of paying more attention to the sanitary condition of their cottages, which compare favourably with those of other unions.

DUNMANWAY; *Dunmanway, W*.—The sanitary condition of the district continues fairly satisfactory. There was one death registered "tuberculous disease of hip." This had existed for a number of years.

FERMOY; *Rathcormack*.—The district has been free from zymotic disease during the quarter.

KANTURK; Kanturk, W.—District free from infectious diseases, with the exception of a few cases of scarlet fever.

KANTURK; Milford.—The district is healthy.

KILMALLOCK; Charleville.—The district is very healthy.

KINSALE; Ballyfeard.—General health good. One death at 93, one at 80, one at 77, one at 75, two at 72, and one at 70, were registered.

KINSALE; Courceys.—District in a fairly good sanitary condition.

MACROOM; Macroom, W.—A severe epidemic of measles overran the district during the quarter. Children were universally stricken down, resulting in a mortality of three. It is now fortunately abated.

MALLOW; Ballyclogh.—District healthy.

MALLOW; Rahan.—District healthy during past quarter. There have been many cases of influenza towards the end.

MIDDLETON; Cloyne.—Epidemics of scarlatina and zymotic enteritis were prevalent during the quarter.

MIDDLETON; Middleton, No. 2.—District has been very healthy during the quarter.

SKIBBEREEN; Dromdaleague.—District healthy.

Kerry County.

CAHERSIVEEN; Caher, W.—Sanitary condition of district good.

CAHERSIVEEN; Darrynane.—The sanitary condition of the district is fairly satisfactory, with the exception of the sewerage in Waterville village, which is in rather a deplorable condition, and eminently calculated in the summer months to cause an epidemic.

CAHERSIVEEN; Emlagh.—District in a good sanitary condition. Had two epidemics of typhoid fever; no deaths.

CAHERSIVEEN; Glanbehy.—District healthy.

CAHERSIVEEN; Valencia.—Sanitary arrangements, to the best of my knowledge, are fairly good, and the district is free from any of the diseases named in the abstracts.

DINGLE; Dingle, W.—District healthy.

KENMARE; Kenmare, W.—District healthy.

KENMARE; Kilgarvan.—Pulmonary tuberculosis seems to be on the increase in this district.

KENMARE; Tuosist.—District in a very sanitary and healthy condition. No epidemic of any sort for many years. Only six deaths for quarter, ages varying from 87 to 64 years, averaging 77½ years.

KILLARNEY; Coom.—A severe outbreak of measles in the district at present.

KILLARNEY; Killorglin.—District has been fairly healthy during past quarter. Two cases of enteric fever occurred.

KILLARNEY; Milltown.—District very healthy.

KILLARNEY; Molahiffe.—The sanitary condition of the district is satisfactory.

LISTOWEL; Ballybunion.—Sanitary arrangements good.

LISTOWEL; Ballyhorgan.—There have been a few cases of whooping-cough; otherwise district healthy.

LISTOWEL; Ballylongford.—District very healthy for quarter. Out of 20 deaths registered, 15 were more than 70 and upwards. No death from consumption to record. This disease seems to get a great checking in this district, compared to old times, thanks to sound advice and new remedies.

LISTOWEL; Listowel, W.—Health of district good.

LISTOWEL; Tarbert.—No death, certified to be due to tuberculosis of any kind, was registered in the Tarbert district during the quarter ending 31st December, 1913.

TRALEE; Castlemaine.—The health of the district continues good.

TRALEE; Kilgobban.—District healthy.

TRALEE; Tralee, No. 1, W.—Epidemic of whooping-cough amongst the children during quarter.

TRALEE; Tralee No. 2.—An epidemic of whooping-cough now on. Six cases of enteric occurred in the district during the quarter.

Limerick County and County Borough.

CROOM; Castletown.—Healthy quarter. Some severe cases of diarrhoea amongst adults.

KILMALLOCK; Bruff.—Sanitary arrangements fairly satisfactory. No zymotic diseases prevalent.

KILMALLOCK; Bruree.—The district is healthy.

KILMALLOCK; Hospital.—District healthy.

KILMALLOCK; Kilfinnane.—District healthy.

KILMALLOCK; Kilmallock, W.—District healthy.

LIMERICK; Annacotty.—Sanitary arrangements good. District very healthy.

LIMERICK; Caherconlish.—One death from cancer. No death registered this time from tuberculosis. District very healthy. There ought to be some provision made for cases of tuberculosis which are considered incurable.

LIMERICK; Clarina.—District in a very healthy condition. There were two deaths from tuberculosis, and two from cancer.

LIMERICK; Limerick, No. 3.—The health of the district has been good during quarter.

LIMERICK; Moroe.—District generally healthy. High birth-rate and low death-rate reported in last return three months ago maintained, and even accentuated. Births to deaths as three to one this quarter.

LISTOWEL; Glin.—There was one bad case of diphtheria, but I am glad to be able to state that recovery took place under the serum treatment; otherwise the public health in this district was satisfactory.

MITCHELSTOWN; Galbally.—Vomiting, diarrhoea and bronchial catarrh were prevalent amongst the children.

NEWCASTLE; Ardagh.—The sanitary state of the district is pretty fair.

NEWCASTLE; Feenagh.—The health of the district has been good during the quarter. The sanitary arrangements are fairly good.

RATHKEALE; *Askeaton*.—Phthisis pulmonalis caused two deaths during the last quarter; cancer caused one death. There was one case of scarlatina of a mild form.

RATHKEALE; *Pallaskenry*.—A mild epidemic of influenza; otherwise a healthy quarter.

RATHKEALE; *Rathkeale, No. 1, W.*—Health of district satisfactory, with the exception of several cases of broncho-pneumonia.

RATHKEALE; *Rathkeale, No. 2*.—There was not a single case of infectious disease in my district during the quarter.

TIPPERARY; *Grean*.—Three cases of diphtheria and one of enteric fever occurred during the quarter, and terminated favourably.

Tipperary County, North Riding.

BORRISOKANE; *CloghJordan*.—Two deaths from cancer and one death from pulmonary tuberculosis were registered during the quarter.

BORRISOKANE; *Terryglass*.—District generally healthy, and in good sanitary condition. Two isolated cases of scarlet fever occurred during the quarter.

NENAGH; *Nenagh, W.*—District healthy.

NENAGH; *Newport*.—District healthy; no infectious diseases reported during quarter.

THURLES; *Moyne*.—District healthy.

THURLES; *Templemore*.—District healthy. No prevailing disease.

Tipperary County, South Riding.

CALLAN; *Ballingarry*.—The health of the district for the quarter has been very good. Free from infectious disease.

CALLAN; *Mullinahone*.—The general health of the district is good at present; there was a smart epidemic of measles and whooping-cough in early half of quarter. One death from pulmonary tuberculosis; none from cancer.

CASHEL; *Kilpatrick*.—District free from zymotic disease.

CLOGHEEN; *Caher*.—One case of diphtheria occurred in the district during the past quarter. Mild influenza was also prevalent.

CLOGHEEN; *Clogheen, W.*—District free from epidemic disease.

CLONMEL; *Kilsheelan No. 1*.—Three cases of scarlet fever in district.

TIPPERARY; *Bansha*.—District healthy.

TIPPERARY; *Cappagh*.—Influenza prevalent.

TIPPERARY; *Emly*.—District healthy.

URLINGFORD; *Kilcooly*.—The health of the district was good during the past quarter. Sanitary arrangements good. There was a slight epidemic of whooping-cough during month of December.

Waterford County and County Borough.

CARRICK-ON-SUIR; *Rathgormuck*.—The sanitary condition of the district is satisfactory. The district is quite free from epidemic disease.

CLONMEL; *Ballymacarbry*.—Sanitary condition good. No infection during quarter.

CLONMEL; *Kilsheelan No. 2*.—Six cases of scarlet fever in district.

DUNGARVAN; *Dungarvan, W.*—Some cases of enteric fever in urban district during past quarter (probably due to defective sewerage system of the town).

DUNGARVAN; *Whitechurch*.—An extensive epidemic of mumps. Two cases of scarlet fever.

LISMORE; *Ballyduff*.—Sanitation and general health of district satisfactory.

WATERFORD; *Kilmeadan*.—The health of the district was very good during the quarter. No epidemic diseases.

WATERFORD; *Waterford No. 1 Urban W.*—Health of district good. Sanitary condition generally improving.

WATERFORD; *Woodstown*.—The health of the district is very good.

YOUGHAL; *Clashmore*.—District healthy.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; *Antrim, W.*—Scarlet fever epidemic abating.

ANTRIM; *Crumlin*.—There have been a few cases of diphtheria in the district this quarter, but all the cases were mild. No fatalities.

ANTRIM; *Doagh*.—A considerable number of mild cases of scarlet fever occurred towards the end of the quarter; also two of diphtheria.

ANTRIM; *Templepatrick*.—The sanitary arrangements of the district (with few exceptions) are good. No epidemic during the quarter.

BALLYCASTLE; *Ballycastle W.*—There have been nine cases of scarlet fever and three cases of diphtheria during the quarter. District otherwise healthy.

BALLYCASTLE; *Cushendall*.—Sanitary arrangements excellent.

BALLYMENA; *Ballymena, W.*—Town and district healthy.

BALLYMENA; *Broughshane*.—The health of district is good.

BALLYMENA; *Clogh*.—The health of the district has been very fair during the quarter. Six cases of scarlatina, but no deaths. Sanitary arrangements good.

BALLYMENA; *Galgorm*.—Sanitary condition of the district is good. Two cases of scarlatina of a mild type. No other infectious disease in the district.

BALLYMENA; *Glenwhirry*.—Public health of district good. Death-rate very low. No epidemic.

BALLYMENA; *Portglenone*.—Health of the district is good.

BALLYMENA; *Toome*.—Health of the district good. There has been an epidemic of chicken pox of a mild variety. No deaths resulted.

BALLYMONEY; *Dirraw*.—Sanitary arrangements of district good. Weather changeable, alternating with high temperature and sudden cold or low temperature, during month of November. In past quarter six cases of poliomyelitis occurred, with two deaths.

BELFAST; Belfast Rural No. 4.—The health of the district for the quarter has been very satisfactory. The sanitary arrangements are improved, and are now pretty well up to date for a rural district.

LARNE; Ballycarry.—District in fairly good sanitary condition. Slight outbreak of diphtheria amongst children attending one school in village. School closed and disease did not spread.

LARNE; Waterfoot.—Sanitary arrangements excellent.

LISBURN; Dunmurry.—The health of the district has been on the whole good during the past quarter; there have been some isolated cases of scarlatina and diphtheria, two of the latter of which have been fatal.

LISBURN; Glenavy.—There was a smart epidemic of chicken pox in the first month of the quarter, and in the last month there were four cases of scarlatina, three of these being in one family. No fatalities.

Armagh County.

ARMAGH; Armagh, W.—An epidemic of measles prevails extensively over the whole of this dispensary district.

ARMAGH; Blackwatertown.—There is at present an epidemic of measles, but so far there have been no deaths due to it.

ARMAGH; Loughgall.—District during the quarter healthy. Very few deaths.

ARMAGH; Markethill.—Mild scarlet fever was epidemic in the district. There were two cases of diphtheria, one of which died. There were seven cases of enteric fever, and three of them died.

ARMAGH; Rich Hill.—Measles has been very prevalent in this district during the last month, but up to the present no deaths have been registered from this cause, though the type of measles has been fairly severe.

ARMAGH; Tynan.—There was a pretty severe epidemic of measles in the district during the quarter, with but one death, though the disease was of a severe type.

LURGAN; Lurgan No. 2.—The district is in a healthy condition.

NEWRY; Meigh.—District healthy.

NEWRY; Mountnorris.—Scarlatina has been epidemic since early in December; there have been no deaths from it. There has also been a form of epidemic sore throat, which does not appear to have any necessary or pathological relation to scarlatina; this sore throat has occurred in families previous to and along with scarlatina; it has occurred in one case which had scarlatina inside the past three years. Patients have got well from it and afterwards taken scarlatina.

NEWRY; Mullaghglass.—There has been an epidemic of scarlatina of mild form, principally in the village of Bessbrook; almost all patients removed to hospital; no deaths so far as I have heard.

Belfast County Borough.

BELFAST; Belfast Urban No. 3.—Scarlet fever was very prevalent during the quarter, but all these were removed to hospitals situated outside this district.

BELFAST; Belfast Urban No. 4., W.—No deaths from cerebro-spinal fever.

BELFAST; Belfast Urban No. 5.—No outbreak of any infectious diseases.

BELFAST; Belfast Urban No. 11.—During the quarter there has been a considerable number of cases of scarlatina and diphtheria. During the latter end of the quarter there have been a good many cases of bronchitis and broncho-pneumonia in young children.

BELFAST; Belfast Urban No. 13.—No deaths from cerebro-spinal meningitis.

Cavan County.

BAILIEBOROUGH; Bailieborough, W.—District in a fairly healthy condition.

BAILIEBOROUGH; Shercock.—District healthy.

BAWNBOY; Swanlinbar.—An epidemic of measles in district.

CAVAN; Belturbet.—The district is in a very healthy condition. No case of infectious disease brought under my notice.

CAVAN; Killashandra.—One case of cancer and one of pulmonary tuberculosis registered during the quarter. District healthy, notwithstanding the insanitary state of many of the labourers' cottages that are unfit for human habitation but which are good breeding houses for pulmonary tuberculosis, from rain and not sufficient light and ventilation; also the cubic space for fresh air is inadequate. The Jubilee nurse is doing good work in district.

CAVAN; Stradone.—Typhoid prevalent during the quarter.

ENNISKILLEN; Dowra.—The sanitary condition of district is good. No infectious disease.

GRANARD; Scrabby No. 1.—Health of district fairly good. Two deaths from pulmonary tuberculosis were recorded; one a farmer's wife aged 30 years, the other a labourer aged 43. Both lived in low, damp, dark, insanitary dwellings.

OLDCASTLE; Ballyjamesduff.—District healthy.

OLDCASTLE; Virginia.—District healthy.

Donegal County.

BALLYSHANNON; Ballintra.—Sanitary arrangements good.

DONEGAL; Donegal, W.—District healthy.

DONEGAL; Dunkineely.—A few cases of whooping-cough; district otherwise healthy, and death-rate below the average.

DONEGAL; Laghy.—District healthy.

DONEGAL; Mountcharles.—District healthy. No outbreak of any infectious disease.

DONEGAL; Pettigoe.—The health of the district has not been satisfactory.

DUNFANAGHY; Crossroads.—District free from infectious disease during quarter.

DUNFANAGHY; Dunfanaghy, W.—District healthy.

GLENTIES; Ardara.—District healthy.

GLENTIES; Doocherry.—District healthy.

GLENTIES; Dunglow, W., No. 2.—A very large number of cases of kidney trouble occurred during the quarter.

INISHOWEN; Buncrana.—District healthy.

INISHOWEN; *Malin*.—There were eleven cases of diphtheria during quarter. Two deaths occurred where serum was late in being administered. The others did well after being injected. Disease severe, but sporadic and dying out. Isolation and thorough disinfection carried out in each instance.

LETTERKENNY; *Church Hill*.—Measles has been prevalent in the district for some time, but so far no deaths have occurred from this disease. Otherwise district healthy.

LETTERKENNY; *Manorcunningham*.—The health of the district is very good.

LONDONDERY; *Killea*.—District healthy.

MILLFORD; *Fanad*.—Health of district good. No outbreak of any infectious disease occurred during quarter. One death at 102 years.

MILLFORD; *Rathmullen*.—District has been healthy during quarter.

MILLFORD; *Rosguill*.—One case each of laryngeal diphtheria, pulmonary tuberculosis, and carcinoma registered during the quarter. District free from epidemics.

STRABANE; *Raphoe*.—Hygienic conditions fairly good. Tubercular affections prevalent.

STRANORLAR; *Cloghan*.—Sanitary arrangements satisfactory. Most of the deaths were at an advanced age.

Down County.

BANBRIDGE; *Ballyward*.—Sanitary arrangements satisfactory.

BANBRIDGE; *Banbridge W.*—Death-rate very low.

BELFAST; *Castlereagh No. 1*.—No deaths from cerebro-spinal meningitis.

DOWNPATRICK; *Ballynahinch*.—There have been numerous cases of whooping-cough in the district during the quarter. Number of deaths much below the average, mostly of aged persons.

DOWNPATRICK; *Downpatrick, W.*—There have been a good many (hidden) mild cases of scarlatina, though only one death registered. The town is pretty full of measles, one death registered. I advised the sanitary authority to procure the closing of schools in Downpatrick; but at first all managers refused. Subsequently two managers closed after measles had infected their own families.

DOWNPATRICK; *Killyleagh*.—The public health is good. There is no epidemic, and the death-rate is low. I have registered more deaths from cancer (4) this quarter than I have done for some time.

DOWNPATRICK; *Portaferry*.—Four cases of scarlet fever occurred during quarter, one of which was sent to Union Hospital. Otherwise district was healthy.

KILKEEL; *Kilkeel No. 2*.—Health of district good.

KILKEEL; *Rosstrevor*.—No particular disease or epidemic in district this quarter. Three or four cases of whooping-cough, confined to two families. Sanitary arrangements satisfactory. The deaths were principally amongst the old, nine out of the fifteen being over 65 years.

LISBURN; *Annahilt*.—The sanitary arrangements in the district are good.

LISBURN; *Ballylesson*.—The sanitary arrangements are fair.

LISBURN; *Drumbeg*.—Births under the average. Of the eleven deaths registered, seven were persons aged 65 years and upwards.

LISBURN; *Hillsborough*.—The smallest number of births and deaths I have ever registered.

LISBURN; *Saintfield*.—Healthy quarter. No epidemic. No infectious disease.

LURGAN; *Moir*.—There has been a recrudescence of the epidemic of scarlatina in the district during the last quarter. It was of the usual mild type. It was very difficult to trace the origin, as everybody denied everything.

LURGAN; *Waringstown*.—District healthy. Two cases of scarlet fever were reported to me during the quarter, one of which came from a neighbouring district, where he had been at school. The other was an isolated case, infected probably from an outside source. Measles and whooping-cough combined caused death in one case.

NEWRY; *Rathfriland*.—Sanitary condition of district is much improved.

NEWTOWNARDS; *Bangor*.—Public health and sanitary arrangements good.

NEWTOWNARDS; *Comber*.—There have been a few cases of scarlatina, which was to be expected, with such a widespread epidemic in Belfast, and such close connection with the town. Measles has been very prevalent, mostly of a mild type, and some children have taken it the second time within three months.

NEWTOWNARDS; *Kilmood*.—District free from infectious disease.

NEWTOWNARDS; *Newtownards, W.*—A good number of cases of scarlet fever have been notified during the quarter which is past. The disease is generally of very mild form. Most of the cases have been sent to hospital and disinfection carefully carried out. There is an epidemic of pertussis among the children in the district at present. In other respects the health of the district is, and has been, good.

Fermanagh County.

ENNISKILLEN; *Ely*.—The public health of the district for the past quarter has been very good.

ENNISKILLEN; *Enniskillen W.*—Sanitary arrangements fairly good.

ENNISKILLEN; *Florencecourt*.—Two cases of diphtheria occurred in the second month of quarter, which were removed to fever hospital. One death registered at the age of 104 years. District free from zymotic disease.

ENNISKILLEN; *Lisbellaw*.—Health of the district satisfactory.

IRVINESTOWN; *Clonelly*.—District in a healthy condition. No epidemic of any kind. Sanitation improving.

IRVINESTOWN; *Ederney*.—District at present healthy. One death registered at 98 years.

LISNASKEA; *Lisnaskea, W.*—Sanitary state of district fair. The majority of deaths were those of persons aged between 75 and 85 years.

Londonderry County.

COLERAINE; *Aghadowey*.—District very healthy, save for an outbreak of infantile paralysis, during which we had ten cases and three deaths. The epidemic appeared only along the banks of the River Bann, where during the wet season the lands were constantly flooded.

COLERAINE; *Garvagh*.—Health of district good. One case of scarlatina during the quarter; but no further outbreak.

COLERAINE; *Kilrea*.—District healthy.

COLERAINE; *Portstewart*.—I am of opinion that the proper housing of the poor, or working classes, and the thorough disinfecting of houses in which tuberculous patients have lived and died will do more to stamp out tuberculosis than the building and equipment of costly sanatoria, however necessary the latter may be as a help to this desirable end. The notification and disinfection of tuberculous houses has been too long delayed.

LIMAVADY; *Ballykelly*.—Epidemic of measles during quarter.

LIMAVADY; *Bellarena*.—District healthy.

LIMAVADY; *Limavady, W.*—There is an epidemic of measles in the district at present.

MAGHERAFELT; *Moneymore*.—During October and November there were a number of cases of typhoid fever, most of which were removed to hospital, two deaths occurring there, but none in this district. Most of the cases were supposed to be from milk infection. The disease now seems to have disappeared. At present the district is in a healthy condition.

Monaghan County.

CARRICKMACROSS; *Carrickmacross, W.*—District in fair sanitary condition.

CARRICKMACROSS; *Donaghmoynne*.—District healthy.

CARRICKMACROSS; *Raferagh*.—There has been a small outbreak of diphtheria in the district during the quarter.

CASTLEBLAYNEY; *Castleblayney, W.*—An epidemic of influenza of a very severe type occurred in the district during the quarter. Five deaths attributed to tuberculosis, and three to cancer, were registered.

CLONES; *Clones, W.*—The district has been very free from infectious diseases during the quarter.

COOTEHILL; *Dawsonsgrove*.—The district is in fair sanitary condition. One sporadic case of scarlet fever occurred during the quarter.

MONAGHAN; *Castleshane*.—District sanitary. No epidemic of any sort during the quarter.

MONAGHAN; *Emyvale*.—Health of district fairly good, except for a slight outbreak of diphtheria at end of quarter.

MONAGHAN; *Kilmore*.—One case of enteric fever (imported), removed immediately to hospital. District healthy.

MONAGHAN; *Monaghan, W.*—The sanitary condition of the district, so far as the town of Monaghan is concerned, is in an unsatisfactory condition.

MONAGHAN; *Scotstown*.—Sanitary condition on the whole good.

Tyrone County.

CASTLEDERG; *Castlederg, W.*—District healthy. No epidemic of any kind.

CASTLEDERG; *Drumquin*.—The sanitary arrangements in the district are satisfactory, and none of the diseases mentioned in the abstracts were present during the quarter.

CASTLEDERG; *Castlederg and Killeter No. 2*.—State of district healthy.

CLOGHER; *Aughnacloy*.—District generally healthy.

CLOGHER; *Fivemiletown*.—The health of the district was pretty good during the quarter. There were some cases of influenza.

COOKSTOWN; *Coagh*.—A severe outbreak of poliomyelitis occurred in this district during the past quarter. Eight deaths were registered as due to the disease.

COOKSTOWN; *Pomeroy*.—District very healthy during quarter. Excluding the eight persons over 65 years, and the infant which died from enteritis, tuberculosis was responsible for three of the four remaining deaths.

COOKSTOWN; *Stewartstown*.—There has been an epidemic of scarlatina in district with three deaths. Three cases of diphtheria and one of poliomyelitis; the diphtheria cases are progressing favourably; the poliomyelitis case died.

DUNGANNON; *Benburb*.—Sanitary condition of district good.

DUNGANNON; *Caledon and Ballymagran*.—Epidemic of measles with chest complications; one fatal case in the person of a mother, who developed the rash the day after her fifth confinement. One fatal case of poliomyelitis in a boy of nine who died asphyxiated on the fifth day.

DUNGANNON; *Clonavaddy*.—Sanitary arrangements good. No infectious diseases.

DUNGANNON; *Coal Island*.—There were two cases of enteric fever in district during the quarter, both removed to hospital and recovered; the public health continues satisfactory.

OMAGH; *Dromore*.—District healthy at present. One death from diphtheria.

OMAGH; *Drumquin*.—Health of the district good; no epidemic. Sanitary condition only fair.

OMAGH; *Fintona*.—The health of the district has been good during the past quarter, and free from epidemic disease. The sanitary arrangements are satisfactory.

OMAGH; *Omagh No. 1, W.*—Health of district good. Sanitary conditions, urban fairly satisfactory, rural unsatisfactory. In the latter there is general apathy regarding sanitation. Deaths from enteric and scarlatina occurred to patients from rural district.

OMAGH; *Omagh No. 2*.—The district is in good sanitary condition; no epidemic of any kind.

OMAGH; *Sixmilecross*.—The sanitary arrangements in this district are very good; we had three cases of typhoid fever during the quarter. One death registered in the district at 103 years.

IV. PROVINCE OF CONNAUGHT.

Galway County.

CLIFDEN; *Inishbofin*.—Sanitation good.

CLIFDEN; *Roundstone No. 1*.—District healthy.

CLIFDEN; *Roundstone No. 2*.—District healthy.

GALWAY; *Galway No. 3 (Arran)*.—Health of district very good.

GALWAY; *Moycullen*.—There was a slight epidemic of chicken pox here during the quarter.

GALWAY; *Oranmore*.—District continues healthy.

GALWAY; *Spiddle*.—Health of district continues good.

GALWAY; *Turloughmore*.—Sanitary arrangements fair. District free from contagious diseases.

GLENAMADDY; *Glenamaddy, W.*—No death from cancer have been registered in the district during the quarter.

GORT; *Gort, W.*—Measles and whooping-cough were prevalent throughout the district during the last quarter.

GORT; *Kinvarra*.—There is an epidemic of whooping-cough at present, not of a severe nature; one death occurred from it in the case of a child, probably previously tubercular. Some cases of measles (one death); and two cases of diphtheria.

LOUGHREA; *Bullaun*.—The ages of those comprising five uncertified deaths were 74, 78, 80, 84, and 88 years.

OUGHTERARD; *Cloonbur No. 1*.—Whooping-cough and measles very prevalent, but of a mild type.

OUGHTERARD; *Lettermore*.—Whooping-cough is prevalent in the district at present.

OUGHTERARD; *Oughterard, W.*—No deaths from cancer.

PORTUMNA; *Eyrecourt*.—Only three deaths registered, all over 75 years of age. There has been a good deal of influenza during the quarter, some cases of measles, and one case of scarlet fever.

PORTUMNA; *Portumna No. 1, W.*—Sanitary condition of district fairly good.

TUAM; *Abbey*.—The sanitary arrangements in the district are good.

TUAM; *Tuam No. 1, W.*—There was a number of cases of measles and whooping-cough during the quarter.

TUAM; *Tuam No. 2*.—There was a widespread epidemic of measles and pertussis during the quarter. The diseases were of a mild type, and no deaths have occurred so far. Otherwise the district is free from disease.

Leitrim County.

BALLYSHANNON; *Kinlough*.—Number of deaths for quarter 16; no deaths from cancer, one death from tuberculosis, three over 90 years.

BAWNBOY; *Ballinamore*.—Measles of a mild type was prevalent during the quarter; no deaths occurred. Sanitary state of district good.

CARRICK-ON-SHANNON; *Drumshanbo*.—District healthy and in good sanitary condition.

CARRICK-ON-SHANNON; *Jamestown*.—Scarlet fever has appeared in district. Four cases up to end of quarter.

MANORHAMILTON; *Drumahaire*.—A few cases of scarlatina of a mild type during the quarter. One death occurred in the case of an adult who suffered from the disease in a most malignant form; but has not yet been registered.

MOHILL; *Carrigallen*.—The health and sanitary condition of the district have been good during the quarter. No epidemic of any kind.

MOHILL; *Mohill, W.*—No complaints about the condition of the district regarding sanitary arrangements.

MOHILL; *Rinn*.—The district is healthy and free from epidemic.

MOHILL; *Rowan*.—District in a healthy condition.

Mayo County.

BALLINA; *Ballina, W.*—The epidemic of enteric fever which broke out in the summer and autumn months has now practically abated. Two deaths from the disease were registered during the quarter. Five deaths registered from different forms of tuberculosis, and two from cancer. The condition of the district is fairly sanitary.

BALLINA; *Crossmolina*.—Four cases of typhoid fever in one house. District otherwise healthy and free from infectious disease.

BALLINROBE; *Ballinrobe, W.*—No epidemic occurred during quarter. The health of district is good.

BALLINROBE; *Cappaghduff*.—Sanitary arrangements good. No infectious disease in district.

BALLINROBE; *Cong.*—An epidemic of measles exists at present in portion of the district, otherwise the health of district is good. Of the 22 deaths registered 13 were between 65 and 90 years.

BALLINROBE; *Hollymount*.—Births and deaths rather under the average. Some cases of whooping-cough occurred in the latter months of this quarter, and there were some mild cases of influenza; otherwise the general health of the people was good.

BELMULLET; *Bangor*.—Sanitary condition of district at present satisfactory.

BELMULLET; *Binghamstown, W.*—District in a healthy state.

BELMULLET; *Knocknadower*.—District in a healthy condition.

CASTLEBAR; *Castlebar No. 1, W.*—Health of district good.

CASTLEBAR; *Castlebar No. 2*.—Sanitation very much improved all through the district.

CLAREMORRIS; *Ballindine*.—One death registered of a woman aged 108 years.

CLAREMORRIS; *Ballyhaunis*.—Health of district good. No zymotics or cancer. Sanitation progressive, a marked improvement being everywhere observable in the dwellings in regard to cleanliness, light, and ventilation. If the registration of common lodging houses in this town was made compulsory, it would go far towards restricting and stamping out epidemic diseases.

CLAREMORRIS; *Claremorris, W.*—A good many cases of whooping-cough during quarter. A few cases of diphtheria; but owing to prompt isolation the disease has not spread.

KILLALA; *Killala, W.*—The sanitary arrangements in the district are not good. Pigs and cattle are housed in many dwellings. Two cases of scarlatina occurred during the quarter.

SWINFORD; *Foxford*.—General health of district very good. A mild outbreak of whooping-cough occurred during the quarter.

WESTPORT; *Achill*.—Eczema and scabies prevalent amongst persons of all ages. No case of any of the infectious disease named in the abstracts occurred in the district during the quarter. General sanitation is fair.

WESTPORT; *Ballycroy*.—No epidemic during quarter; two deaths from pulmonary tuberculosis; one from secondary cancer, after carcinomatous tissue in primary tumour had been destroyed by radium.

WESTPORT; *Islandeedy*.—The sanitary arrangements of the district are good. A few cases of diphtheria occurred.

WESTPORT; *Louisburgh*.—Sanitary condition of district very good in general. No occurrence of any case of infectious disease during quarter.

WESTPORT; *Newport*.—Two cases of diphtheria occurred in district during quarter. Otherwise general health very satisfactory. Sanitation improving.

WESTPORT; *Westport, W*.—Exceptional infantile mortality from some undetermined cause; but possibly due to scarcity of cow's milk.

Roscommon County.

ATHLONE; *Brideswell*.—District healthy.

ATHLONE; *Kiltoom*.—The sanitary condition of district fairly satisfactory.

BOYLE; *Boyle No. 1, W*.—The district was fairly healthy and there was no epidemic during the past quarter.

BOYLE; *Keadew*.—Great improvement in the houses; bedrooms better ventilated.

CARRICK-ON-SHANNON; *Aughrim*.—There were two cases of typhus fever, one of typhoid, and two of scarlet fever, during the quarter; all recovered. There was no death from tuberculous disease in any form.

CASTLEREA; *Loughlinn*.—The past quarter has been fatal to the aged by bronchial troubles caused by the wet weather, several being over 75 and 80 years. There is a continued improvement in the homes of the people. There was one death from tuberculosis. There was no death from cancer.

ROSCOMMON; *Roscommon, W*.—There were six cases of death due to malignant disease, an unusual number, and tuberculosis was the cause of death in four cases. Health of district generally good, some cases of influenza occurred.

STROKESTOWN; *Roosky*.—The death-rate for the quarter is very low. Nearly all the deaths registered were of persons varying in age from 76 to 90 years. No deaths from cancer this time, two deaths from tuberculosis of lungs. District healthy.

STROKESTOWN; *Strokestown, W*.—Of the deaths registered during the quarter the greater number was of persons aged 60 and upwards.

Sligo County.

BOYLE; *Gurteen*.—Whooping-cough was prevalent during past quarter.

DROMORE WEST; *Castleconnor*.—The state of the district is healthy, except for several cases of diphtheria. There was one death from it.
